Tomcats and Eagles Tal Tovy, 2022-11-15 During the first half of the 1970s two new fighter aircraft entered operational service in the United States The Navy's Grumman F 14 Tomcat and the Air Force's McDonnell Douglas F 15 Eagle These two aircraft were part of the backbone of the tactical air power of the United States their introduction was accompanied by comprehensive reforms in pilot training as well as new technologies and weapon systems In addition to the tactical significance of the two aircraft as innovative fighting platforms however their development and deployment should be viewed within a broad geopolitical and geostrategic context Tovy explains how the F 14 Tomcat and the F 15 Eagle were an integral part of the aerial component of the conventional arms race within the Cold War He argues that the trend of Soviet advanced weapon systems development created a perception of threat to the United States challenging its conventional military power Tomcats and Eagles explores how the Vietnam War accelerated the need for advanced fighter interceptors and that the lessons learned from aerial combat in Vietnam had a significant impact on the design and operational characteristics of the F 15 The author reveals that after F 14s were sold to Iran and F 15s to Israel in the second half of the 1970s these jets were integrated into their armed forces leading to Israel's use of the F 15 during the First Lebanese War Finally the author provides an in depth look at the operation of the F 14 and F 15 in U S actions in Southeast Asia beginning with the Tanker Wars in the mid 1980s through Operation Desert Storm and Operation Enduring Freedom and ending with Operation Iraqi Freedom *Eagle*, 1992 *The eagle's talons : the American experience at war*, The Leatherneck, 1989 **The**

Tan,2013-12-13 This book is the first systematic examination of the emerging arms race in Asia The global trade in arms is to a large degree underpinned by the strong demand for arms in Asia and the Middle East the two largest arms export markets in the world Of these two regions Asia has become particularly significant led by the emergence of China and India as major powers It is therefore not surprising that the rapid military modernisation in Asia accompanied by significant increases in the size and sophistication of armed forces has generated attention as to its trends key characteristics causes and implications This phenomenon which has become evident since the end of the Cold War has also been widely described as an Asian arms race This book evaluates the key conceptual ideas which can shed light on this phenomenon as well as examining the complex mix of internal external and technological factors that have led to its emergence The volume explores the way in which the arms race is leading ultimately to three distinctive blocs in the emerging geostrategic landscape a loose bloc of US allies in the region a counter bloc of potential US adversaries and a neutral bloc of states with industrial age armed forces whose allegiances will vary according to circumstances and geostrategic developments The Arms Race in Asia concludes that if the emerging arms race is left unchecked it is likely that Asia will increasingly become a region of instability marked by conflicts and interstate wars The book will be of great interest to students of Asian politics strategic studies defence studies
