Modern Architecture Of Northern England:

Modern Architecture of Northern England Bruce Allsopp, 1969 **Modern Architecture of Northern England** Bruce Allsopp, 1969 *Modern Buildings in Britain* Owen Hatherley, 2022-04-07 The definitive illustrated guide to modern British architecture from one of the most acclaimed critics at work today Modernism is now a century old and its consequences are all around us built into our everyday lived environments Its place in Britain's history is fiercely contested and its role in our future is the subject of ongoing controversy but modernist buildings have undoubtedly changed our cities politics and identity forever In *Modern Buildings in Britain* Owen Hatherley applauds the ambition and explores the significance of this most divisive of architectures travelling from Aberystwyth to Aberdeen from St Ives to Shetland in search of our most important and distinctive modern buildings Drawing on hundreds of examples we learn how the concrete of Brutalism embodies post war civic principles how corporate values were expressed in the glass facades of the International Style and why Ecomodernist experimentation is often consigned to the geographic fringes As Hatherley considers the social political and cultural value of these structures a number of which are threatened by demolition two linked questions emerge what happens to a building after it has been lived in and what becomes of an idea when its time has passed With more than six hundred pages of trenchantly opinionated often witty analysis and with three hundred photographs in duotone and colour *Modern Buildings in Britain* is a landmark contribution to the history of British architecture *A Bibliography of British History, 1914-1989* Keith Robbins, American Historical Association, Royal Historical Society (Great Britain), 1996 Containing over 25 000 entries this unique volume will be absolutely indispensable for all those with an interest in Britain in the twentieth century Accessibly arranged by theme with helpful introductions to each chapter a huge range of topics is covered There is a comprehensive index **Structure and Style** Michael Stratton, 1997 This book looks at approaches to appraising and conserving mainstream architecture of the 20th century commercial buildings industrial buildings and housing

Northern Landscapes Tom E. Faulkner, Helen Berry, Jeremy Gregory, 2010 How distinctive is the landscape of the North East of England How far does its distinctive nature contribute to region's identity These are key questions addressed by this book drawing on hitherto little known detail and many new research findings **Modern Architecture and the Sacred** Ross Anderson, Maximilian Sternberg, 2020-11-26 This edited volume *Modern Architecture and the Sacred* presents a timely reappraisal of the manifold engagements that modern architecture has had with the sacred It comprises fourteen individual chapters arranged in three thematic sections Beginnings and Transformations of the Modern Sacred Buildings for Modern Worship and Semi Sacred Settings in the Cultural Topography of Modernity The first interprets the intellectual and artistic roots of modern ideas of the sacred in the post Enlightenment period and tracks the transformation of these in architecture over time The second studies the ways in which organized religion responded to the challenges of the new modern self understanding and then the third investigates the ways that abstract modern notions of the sacred have been embodied in

the ersatz sacred contexts of theatres galleries memorials and museums While centring on Western architecture during the decisive period of the first half of the 20th century a time that takes in the early musings on spirituality by some of the avant garde in defiance of Sachlichkeit and the machine aesthetic the volume also considers the many varied appropriations of sacrality that architects have made up to the present day and also in social and cultural contexts beyond the West

British Architect and Northern Engineer, 1878 *The Life and Death of the Shopping City* Alistair

Kefford, 2022-04-07 How have British cities changed in the years since the Second World War And what drove this transformation This innovative new history traces the development of the post war British city from the 1940s era of reconstruction through the rise and fall of modernist urban renewal up to the present day crisis of high street retailing and central area economies Alistair Kefford shows how planners property developers councils and retailers worked together to create the modern shopping city remaking the physical fabric economy and experience of cities around this retail driven developmental model This book also offers a wider social history of mass affluence showing how cities were transformed to meet the perceived demands of a society of shoppers and why this effort was felt to be so urgent in an era of urban deindustrialisation By bringing the story of the shopping city right up to its present day crisis and collapse Kefford makes clear how the historical trajectories traced in this book continue powerfully to shape urban Britain today **London's**

Contemporary Architecture Ken Allinson, Victoria Thornton, 2014-06-27 London is a living architectural exhibition This tried and trusted portable guide will help you to find your way around one of the world's most exciting cities offering architectural experiences and insights into London's finest contemporary architecture features more than 400 buildings including key venues from the 2012 Olympic Park provides a superb full colour photographic record of the capital aids navigation of the city's greatest architectural sights with a clear map based format considers each district in turn identifying the buildings most worthwhile visiting and providing essential information and insights into each includes a large scale portable lightweight map for use when walking the tours Jam packed with the author's intimate architectural experience and knowledge of London's buildings the accompanying commentary is both lively and entertaining providing all the information that any architectural explorer will need to appreciate and experience London's contemporary architecture Modern

North Julie Decker, 2010-03-31 The Geographic Region Around the North Pole is a Raw and Exotic Area of Untouched Nature and Inescapable Beauty Building in this extremely cold climate requires an advanced degree of ingenuity and resolve Ecological conditions including high winds snowdrifts and permafrost combined with periods of little sunlight present seemingly impossible logistical hurdles for architects Vernacular buildings have emerged but like most indigenous structures they do little more than simply enclose and protect Recent years have witnessed an explosion of exceptional new architecture and a new definition of a Northern building one that is both extraordinarily responsive to place and aesthetically provocative In *Modern North Architecture on the Frozen Edge* author Julie Decker presents thirty four of the most compelling and far

ranging possibilities of contemporary architecture in the North These buildings located in northern Canada Scandinavia and Alaska are united in the way they embrace extreme conditions and provide visual stimulation in places that sometimes offer little more than a whitescape The book contains innovative structures by both established and up and coming architects including David Chipperfield Architects Studio Granda and Shim Sutcliffe Architects as well as essays by Brian Carter Juhani Pallasmaa Edwin Crittenden and Lisa Rochon that place the projects in the context of a new architectural response to the North BOOK JACKET Bulletin of the Public Library of the City of Boston Boston Public Library,1908 **Faith in the Town** Hannah Barker,Carys Brown,Kate Gibson,Jeremy Gregory,2025-02-28 This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations Across eighteenth and early nineteenth century northern England religious faith continued to affect the lives of men women and children in profound ways Rather than abandoning their faith in the face of increasing urbanisation and industrialisation as is often assumed was the case town dwellers across the social and denominational spectrum commonly understood their relationships with their families households and the world within a framework of religious duty and virtue For urban middling and labouring individuals religious practice and the influence of faith was not limited to time spent in church or chapel but extended into all areas of activity and experience the workplace the streets and other public spaces and the home The importance of faith in the lived experience of town dwellers was not something that existed in spite of change faith was promoted by the new conditions of urban life Faith in the Town explores key decades of this transformational period encompassing almost a century of urban development between 1740 and 1830 By placing lay religious belief centre stage this book demonstrates that many of the developments associated with modernity specifically industrialisation urbanisation population growth and Enlightenment thinking were not inimical to faith Instead religious belief and lay piety was a crucial element in the formation of urban economy society and culture during the long eighteenth century meaning that northern towns were not only places where faith could both be nourished and flourish but that these urban centres were themselves shaped by faith *The British National Bibliography* Arthur James Wells,2009 Bulletin of the Public Library of the City of Boston ,1908 **A History of Architecture: Gothic in Great Britain, Renaissance, Modern architecture** Russell Sturgis,1915 *The Geography of Great Britain by George Long and George R. Porter* ,1850* *Architecture of Scotland, 1660-1750* Louisa Humm,2020-06-18 This architectural survey covers one of Scotland s most important periods of political and architectural change when mainstream European classicism became embedded as the cultural norm Interposed between the decline of the Scottish castle and its revival as Scotch Baronial architecture the contributors consider both private and public civic architecture They showcase the architectural reflections of a Scotland finding its new elites by providing new research analysing paradigms such as Holyrood and Hamilton Palace as well as external reference points such as Paris tenements Roman precedents and English parallels Typologically the book is

broad in scope covering the architecture and design of country estate and also the urban scene in the era before Edinburgh New Town Steps decisively away from the Scottish castle genre of architectureContextualises the work of Scotland s first well documented grouping of major architects including Sir William Bruce Mr James Smith James Gibbs and the Adam dynastyDocuments the architectural developments of a transformational period in Scottish history Beautifully illustrated throughout with 300 colour illustrations a Quarterly Bulletin Containing an Index of Literature from the Publications of Architectural Societies and Periodicals on Architecture and Allied Subjects American Institute of Architects,1900
