steeped in meaning and stunning in its beauty **Louisiana Coughatta Basket Makers** Linda Langley, Denise E. Bates, 2021-04-21 Louisiana Coughatta Basket Makers brings together oral histories tribal records archival materials and archaeological evidence to explore the fascinating history of the Coughatta Tribe's famed basket weavers After settling at their present location near the town of Elton Louisiana in the 1880s the Coughatta Koasati tribe developed a basket industry that bolstered the local tribal economy and became the basis for generating tourism and political mobilization The baskets represented a material culture that distinguished the Coughattas as Indigenous people within an ethnically and racially diverse region Tribal leaders serving as diplomats also used baskets as strategic gifts as they built political and economic allegiances throughout the twentieth century thereby securing the Coughattas future Behind all these efforts were the basket makers themselves Although a few Coughatta men assisted in the production of baskets it was mostly women who put in the long hours to gather and process the materials then skillfully stitch them together to produce treasures of all shapes and sizes The art of basket making exists within a broader framework of Coughatta traditional teachings and educational practices that have persisted to the present As they tell the story of Coughatta basket makers Linda P Langley and Denise E Bates provide a better understanding of the tribe's culture and values The weavers own language of baskets shapes this narrative which depicts how the tribe survived repeated hardships as weavers responded on their own terms to market demands The work of Coughatta basket makers represents the perseverance of traditional knowledge in the form of unique and carefully crafted fine art that continues to garner greater recognition and appreciation with every successive generation

The Material Culture of Basketry Stephanie Bunn, Victoria Mitchell, 2020-10-29 The Material Culture of Basketry celebrates basketry as a culturally significant skilled practice and as a theoretically rich discipline which has much to offer contemporary society While sometimes understudied and underappreciated it has much in common with mathematics and engineering art craft and design and can also act as a socially beneficial source of skill and care Contributors show how local knowledge of materials plants and place are central to the craft Case studies include the skill in weaverbird nest building challenging how we perceive learning in craft and nature an engineer's perspective on twining Peruvian grass bridges and the local knowledge embodied in Pacific plaited patterns and knots Photo essays explore materials and techniques from the point of view of artists anthropologists and mathematicians revealing how the structure and skill in basketwork illustrate a significant form of textile technology Thus the book argues that the textures patterns and geometric forms that emerge through basketwork reflect an embodied knowledge which expresses mathematical and engineering comprehension The therapeutic value of the craft is recognised through a selection of case studies which consider basketry as a healing process for patients with brain injury mental health problems and as a memory aid for people living with dementia This reclaims basketry's significant role in occupational therapy as an agent of recovery and well being Finally basketry's inherently sustainable nature is also considered demonstrating the continuation of basketry in spite of handwork's general decline and profiling new and recycled materials Above all the book envisages basketry as an intellectually rewarding means of knowing It presents the craft as embodying care for skilled making and for the social and natural environments in which it flourishes
