The Social Science Encyclopedia Adam Kuper,Jessica Kuper,2004-10-14 The Social Science Encyclopedia first published in 1985 to acclaim from social scientists librarians and students was thoroughly revised in 1996 when reviewers began to describe it as a classic This third edition has been radically recast Over half the entries are new or have been entirely rewritten and most of the balance have been substantially revised Written by an international team of contributors the Encyclopedia offers a global perspective on key issues within the social sciences Some 500 entries cover a variety of enduring and newly vital areas of study and research methods Experts review theoretical debates from neo evolutionism and rational choice theory to poststructuralism and address the great questions that cut across the social sciences What is the influence of genes on behaviour What is the nature of consciousness and cognition What are the causes of poverty and wealth What are the roots of conflict wars revolutions and genocidal violence This authoritative reference work is aimed at anyone with a serious interest in contemporary academic thinking about the individual in society

Colonial Exploitation and Economic Development Ewout Frankema,Frans Buelens,2013 Since many countries in the world at present were European colonies in the not so distant past the relationship between colonial institutions and development outcomes is a key topic of study across many disciplines This edited volume from a leading international group of scholars discusses the comparative legacy of colonial rule in the Netherlands Indies and Belgian Congo during the nineteenth and twentieth centuries Whereas the Indonesian economy progressed rapidly during the last three decades of the twentieth century and became a self reliant and assertive world power the Congo regressed into a state of political chaos and endemic violence To which extent do the different legacies of Dutch and Belgian rule explain these different development outcomes if they do at all By discussing the comparative features and development of Dutch and Belgian rule the book aims to 1 to contribute to a deeper understanding of the role of colonial institutional legacies in long run patterns of economic divergence in the modern era 2 to fill in a huge gap in the comparative colonial historical literature which focuses largely on the comparative evolution of the British French Spanish and Portuguese Empires 3 to add a focused and well motivated comparative case study to the increasing strand of

literature analyzing the marked differences in economic and political development in Asia and Africa during the postcolonial era. Covering such issues as agriculture, manufacturing and foreign investment, human capital, fiscal policy, labour coercion and mineral resource management, this book offers a highly original and scholarly contribution to the literature on colonial history and development economics.

ICT-Driven Economic and Financial Development Ewa Lechman, Adam Marszk, 2019-09-04. ICT Driven Economic and Financial Development: Analyses of European Countries demonstrates the effects of ICT diffusion on economic, social and financial development by examining their impact on the structure and dynamics of national economies. It provides the insight into shifts observed in labour markets, international trade activities, productivity factors, education and use of innovative financial products. It combines empirical analyses and data sources stretching back to 1990, making it an important contribution to understanding the effects of ICT diffusion on economic and financial development. The book answers questions such as how will national and regional economies react to upcoming ICT developments and growing usage, and what is the magnitude of impact of new information and communication technologies on various aspects of social and economic life. Demonstrates the process of ICT spread across European countries. Analyzes the value of ICTs from both economic and social perspective. Examines structural changes in financial markets caused by ICTs implementation.

New Perspectives on Structural Change Ludovico Alcorta, Neil Foster-McGregor, Adam Szirmai, Bart Verspagen, 2021. A comprehensive edited volume that outlines the historical roots and state of the art debates on the role of structural change in the process of economic development, including both orthodox and heterodox perspectives and contributions from prominent scholars in this field.

Russia Yegor Gaidar, 2012-11-02. An important Russian economist and politician takes a long view of economic history and Russia's development. It is not so easy to take the long view of socioeconomic history when you are participating in a revolution. For that reason, Russian economist Yegor Gaidar put aside an early version of this work to take up a series of government positions as Minister of Finance and as Boris Yeltsin's acting Prime Minister in the early 1990s. In government, Gaidar shepherded Russia through its transition to a market economy after years of socialism. Once out of government, Gaidar turned again to his consideration of Russia's economic history and long-term economic and political challenges. This book, revised and updated shortly before his death in 2009, is the result. Gaidar's account of long-term socioeconomic trends puts his country in historical context and outlines problems faced by Russia and other developing economies that more developed countries have already encountered: aging population, migration, evolution of the system of social protection, changes in the armed forces and balancing stability and flexibility in democratic institutions. This is not a memoir, but Gaidar points out, neither is it written from the position of a man who spent his entire life in a research institute. Gaidar's long view is inevitably informed and enriched by his experience in government at a watershed moment in history.
