portentous conflict No citizen of a free country who takes his citizenship seriously who considers himself responsible to the full extent of his personal influence for the character and conduct of his government can without the crudest self stultification admit that he knows nothing and cares nothing about the history of Europe If he cares for his own national inheritance and tradition for its characteristic and fundamental policies and principles then he will care most emphatically about what happens in Europe Nothing that happens there is really foreign to us for the fortunes of Europe and America are inextricably intertwined This in my opinion the most outstanding fact in the modern world was exemplified in the eighteenth century in the person of Lafayette an American patriot and a French patriot a hero of two revolutions In Lafayette s library hung appropriately side by side two momentous documents the American Declaration of Independence and the French Declaration of the Rights of Man two utterances that have had memorable consequences in the world because multitudes of men have been willing to give their lives that these principles might prevail and multitudes have given their lives that they should not prevail Fundamentally this struggle for liberty has been the warp and woof of modern European history and the vicissitudes of the struggle are in the deepest sense what I have attempted to set forth in this volume About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

**Case Studies on Modern European Economy** Tibor Iván Berend,2013 The last two centuries have been the scene of dramatic change throughout Europe And one of the main causes of these tremendous and spectacular changes was the economy These transformations were achieved by people scientists and political thinkers inventors and entrepreneurs educators skilled and educated workers Who not only invented machines and computers but were able to renew economic and political systems This volume therefore presents a new approach to the period by looking at case studies to understand how these changes came about and the impact they had on modern Europe Ivan Berend presents the spectacular history of modern European economy as a chain of small events actions and the ideas of individuals as the influence of institutions and bold entrepreneurs The essays are grouped into six chapters and discuss the power of entrepreneurship the power of institutions economic regimes and the permanent renewal of capitalism the power of ideas and inventions pioneering companies from the rise of industrial cities to post industrial suburbanization bubbles great depressions and economic cycles All of the single episodes and personal stories offer a cross section of the complex and interrelated history of modern Europe Case Studies on Modern European Economy will be essential reading for students of economic and modern European history

**The Rise of Modern Europe** William Leonard Langer,1936

**Religion, Magic, and Science in Early Modern**

**Europe and America** Allison P. Coudert, 2011-10-17 This fascinating study looks at how the seemingly incompatible forces of science magic and religion came together in the 15th 16th and 17th centuries to form the foundations of modern culture As Religion Magic and Science in Early Modern Europe and America makes clear the early modern period was one of stark contrasts witch burnings and the brilliant mathematical physics of Isaac Newton John Locke s plea for tolerance and the palpable lack of it the richness of intellectual and artistic life and the poverty of material existence for all but a tiny percentage of the population Yet for all the poverty insecurity and superstition the period produced a stunning galaxy of writers artists philosophers and scientists This book looks at the conditions that fomented the emergence of such outstanding talent innovation and invention in the period 1450 to 1800 It examines the interaction between religion magic and science during that time the impossibility of clearly differentiating between the three and the impact of these forces on the geniuses who laid the foundation for modern science and culture **Early Modern Europe, 1450-1789** Merry E.
