Mass Migration to Modern Latin America Samuel L. Baily, Eduardo José Miguez, 2003-01-01 It is well known that large numbers of Europeans migrated overseas during the century preceding the Great Depression of 1930 and that a great many of them went to the United States What is not well known particularly in the United States is that more than 20 percent of these migrants emigrated to Latin America and that they significantly influenced the demographic economic and cultural evolution of many areas in the region Individuals have migrated to Latin America since the beginning of the Conquest more than 500 years ago but by far the largest number 10 million migrated from 1870 to 1930 This incredible influx was also concentrated in terms of the origins and destinations of the individuals three quarters came from the Iberian peninsula and Italy while 91 percent relocated to just three countries Argentina 50 percent Brazil 36 percent and Uruguay 5 percent Mass Migration to Modern Latin America includes original contributions from more than a dozen of the leading scholars of the new methodologically and theoretically innovative Latin American migration history that has emerged during the past 20 years Although the authors focus primarily on the nature and impact of mass migration to Argentina and Brazil from 1870 to 1930 they place their analysis in broader historical and comparative contexts They link the mass migrations at the turn of the past century to older migratory traditions and existing social networks some of which had their roots in the colonial period The editors begin each section of

the book with personal stories of individual immigrants and their families providing students with a glimpse into the complex process of migration and how it played out in various situations This text will help readers understand that Latin America is more than a traditional society composed of the descendants of the Conquistadors and Native Americans This book demonstrates the crucial impact of the mass migrations of the late nineteenth and early twentieth centuries on the formation of some Latin American societies

Beezley, Judith Ewell, 1997-09-01 SR Books two popular Human Tradition in Latin America titles covering nineteenth and twentieth century history have been combined into one exciting new volume The most compelling chapters from these books are now presented in The Human Tradition in Modern Latin America This collection offers powerful fascinating biographies of ordinary people caught in the sometimes devastating historical changes that have occurred in Latin America From the turbulent struggles for independence in the 1800s to the profound and often overwhelming transformations that have accompanied modernization in this century The Human Tradition in Modern Latin America personalizes the impact that revolution economic upheaval urbanization the destruction of community life and the disruption of both traditional family and gender roles have had on Latin Americans The Human Tradition in Modern Latin America is an invaluable text for courses in Latin American studies Nowhere else can such varied portraits be found as in these diverse and carefully researched essays written by leading scholars

leadership and the institutionalization process on the one hand and visionary leadership and the consolidation process on the other Particular attention is given to the ongoing revolutionary process in Nicaragua with an emphasis on the implications and ramifications of the 1990 electoral process A final chapter includes brief analyses of the still unfolding revolutionary processes in El Salvador and Peru
