The BBC and Ultra-Modern Music, 1922-1936 Jennifer Ruth Doctor, 1999 This book first published in 2000 examines the BBC's campaign to raise cultural awareness of British mass audiences in the early days of radio As a specific case it focuses on policies and plans behind transmissions of music by composers associated with Arnold Schoenberg's circle between 1922 when the BBC was founded and spring 1936 when Edward Clark a former Schoenberg pupil and central figure in BBC music resigned from the Corporation This study traces and analyses the BBC's attempts to manipulate critical and public responses to this repertory The book investigates three interrelated aspects of early BBC history Policy decisions relating to contemporary music transmissions are examined to determine why precious broadcast time was devoted to this repertory Early personnel structures are reconstructed to investigate the responsibilities attitudes and interests of those who influenced music broadcasting Finally broadcasts of Second Viennese School works are examined in detail *The Science of Sci-Fi Music* Andrew May, 2020-06-30 The 20th century saw radical changes in the way serious music is composed and produced including the advent of electronic instruments and novel compositional methods such as serialism and stochastic music Unlike previous artistic revolutions this one took its cues from the world of science Creating electronic sounds in the early days required a well equipped laboratory and an understanding of acoustic theory Composition became increasingly algorithmic with many composers embracing the mathematics of set theory The result was some of the most intellectually challenging music ever written yet also some of the best known thanks to its rapid assimilation into sci fi movies and TV shows from the electronic scores of *Forbidden Planet* and *Dr Who* to the otherworldly sounds of 2001 *A Space Odyssey* This book takes a close look at the science behind science fiction music as well as exploring the way sci fi imagery found its way into the work of musicians like Sun Ra and David Bowie and how music influenced the science fiction writings of Philip K Dick and others *Music After Deleuze* Edward Campbell, 2013-11-07 *Music After Deleuze* explores how Deleuzian concepts offer interesting ways of thinking about a wide range of musics The concepts of difference identity and repetition offer novel approaches to Western art music from Beethoven to Boulez and Bernhard Lang as well as jazz improvisation popular and

sacred music The concepts of the rhizome the assemblage and the refrain enable us to think of the specificity of musical works as the meeting of productive forces for example in the contemporary opera of Dusapin and the experimental music theatre of Aperghis The concepts of smooth and striated space form the starting point for musical and political reflections on pitch in Western and Eastern music Deleuze's notion of time as multiple illuminates the distinctive conceptions of musical time found in Debussy Messiaen Boulez Carter and Grisey Finally the innovative semiotic theory forged in Deleuze Guattarian philosophy offers valuable insights for a semiotics capable of engaging with the innovative molecular music of Lachenmann Aperghis and Levinas

Modern Music, 1924 *Alan Bush, Modern Music, and the Cold War* Joanna Bullivant, 2022-12-15 The first major study of Alan Bush this book provides new perspectives on twentieth century music and communism British communist composer of politicised works and friend of Soviet musicians Bush proved to be a lightning rod in the national musical culture His radical vision for British music prompted serious reflections on aesthetics and the rights of artists to private political opinions as well as influencing the development of state sponsored music making in East Germany Rejecting previous characterisations of Bush as political and musical Other Joanna Bullivant traces his aesthetic project from its origins in the 1920s to its collapse in the 1970s incorporating discussion of modernism political song music theory opera and Bush's response to the Soviet music crisis of 1948 Drawing on a wealth of archival sources including recently released documents from MI5 this book constructs new perspectives on the cultural Cold War through the lens of the individual artist

Opera After the Zero Hour Emily Richmond Pollock, 2019-08-20 *Opera After the Zero Hour* The Problem of Tradition and the Possibility of Renewal in Postwar West Germany presents opera as a site for the renegotiation of tradition in a politically fraught era of rebuilding Though the Zero Hour put a rhetorical caesura between National

Socialism and postwar West Germany the postwar era was characterized by significant cultural continuity with the past With nearly all of the major opera houses destroyed and a complex relationship to the competing ethics of modernism and restoration opera was a richly contested art form and the genre's reputed conservatism was remarkably multi faceted Author Emily Richmond Pollock explores how composers developed different strategies to make new opera new while still deferring to historical conventions all of which carried cultural resonances of their own Diverse approaches to operatic tradition are exemplified through five case studies in works by Boris Blacher Hans Werner Henze Carl Orff Bernd Alois Zimmermann and Werner Egk Each opera alludes to a distinct cultural or musical past from Greek tragedy to Dada bel canto to Berg Pollock's discussions of these pieces draw on source studies close readings unpublished correspondence institutional history and critical commentary to illuminate the politicized artistic environment that influenced these operas creation and reception The result is new insight into how the particular opposition between a conservative genre and the idea of the Zero Hour motivated the development of opera's social aesthetic and political value after World War II

"Music after Hitler, 1945-1955" Toby Thacker, 2017-07-05 The political control of music in the Third Reich has been analysed from several perspectives and with ever increasing sophistication However music in Germany after 1945 has not received anything like the same treatment Rather there is an assumption that two separate musical cultures emerged in East and West alongside the division of Germany into two states with differing economic and political systems There is a widely accepted view of music in West Germany as free and in the East subject to party control Toby Thacker challenges these assumptions asking how and why music was controlled in Germany under Allied Occupation from 1945-1949 and in the early years of semi sovereignty between 1949 and 1955 The re education of Germany after the Hitler years was a unique historical experiment and the place of music within this is explored here for the first time While emphasizing political economic and broader social structures that influenced the production and reception of different musical forms the book is informed by a sense of human agency and explores the role of salient individuals in the reconstruction of music in post war Germany The focus is not restricted to any one kind of music but concentrates on those aspects of music professional and amateur live and recorded which appeared to be the mostly highly charged politically to contemporaries Particular attention is given to denazification and to the introduction of international music Thacker traces the development of a divide between Communist and liberal democratic understandings of the place of music in society The contested celebrations of the Bach Year in 1950 are used to highlight the role of music in the broader cultural confrontation between East and West Thacker examines the ways in which central governments in East and West Germany sought to control and influence music through mechanisms of censorship and positive support The book will therefore be of interest not only

Music, Collective Memory, Trauma, and Nostalgia in European Cinema after the Second World War Michael Baumgartner, Ewelina Boczkowska, 2019-09-23 In the wake of World War II the arts and culture of Europe became a site where the devastating events of the 20th century were remembered and understood Exploring one of the most integral elements of the cinematic experience music the essays in this volume consider the numerous ways in which post war European cinema dealt with memory trauma and nostalgia showing how the music of these films shaped the representation of the past The contributors consider films from the United Kingdom Poland the Soviet Union France Italy Germany Sweden Austria and the Netherlands providing a diverse and well rounded understanding of film music in the context of historical memory Memory is often underrepresented within scholarly musical studies with most of these applications found in the disciplines of ethnomusicology popular music studies music cognition and psychology and music therapy Likewise trauma has mainly been studied in relation to music in only a few historical contexts while nostalgia has attracted even less academic attention In three parts this volume addresses each area of study as it relates to the music of European cinema from 1945 to 1989 applying an interdisciplinary approach to investigate how films use music to negotiate the precarious relationships we maintain with the past *Music Collective Memory Trauma and Nostalgia in European Cinema after the Second World War* offers compelling arguments as to what makes music such a powerful medium for memory trauma and nostalgia

Music after Hitler, 1945-1955 Toby Thacker, 2017-07-05 The political control of music in the Third Reich has been analysed from several perspectives and with ever increasing sophistication However music in Germany after 1945 has not received anything like the same treatment Rather there is an assumption that two separate musical cultures emerged in East and West alongside the division of Germany into two states with differing economic and political systems There is a widely accepted view of music in West Germany as free and in the East subject to party control Toby Thacker challenges these assumptions asking how and why music was controlled in

Germany under Allied Occupation from 1945 1949 and in the early years of semi sovereignty between 1949 and 1955 The re education of Germany after the Hitler years was a unique historical experiment and the place of music within this is explored here for the first time While emphasizing political economic and broader social structures that influenced the production and reception of different musical forms the book is informed by a sense of human agency and explores the role of salient individuals in the reconstruction of music in post war Germany The focus is not restricted to any one kind of music but concentrates on those aspects of music professional and amateur live and recorded which appeared to be the mostly highly charged politically to contemporaries Particular attention is given to denazification and to the introduction of international music Thacker traces the development of a divide between Communist and liberal democratic understandings of the place of music in society The contested celebrations of the Bach Year in 1950 are used to highlight the role of music in the broader cultural confrontation between East and West Thacker examines the ways in which central governments in East and West Germany sought to control and influence music through mechanisms of censorship and positive support The book will therefore be of interest not only

Liveness in Modern Music Paul Sanden, 2013-01-17 This study investigates the idea and practice of liveness in modern music Understanding what makes music live in an ever changing musical and technological terrain is one of the more complex and timely challenges facing scholars of current music where liveness is typically understood to represent performance and to stand in opposition to recording amplification and other methods of electronically mediating music The book argues that liveness itself emerges from dynamic tensions inherent in mediated musical contexts tensions between music as an acoustic human utterance and musical sound as something produced or altered by machines Sanden analyzes liveness in mediatized music music for which electronic mediation plays an intrinsically defining role exploring the role this concept plays in defining musical meaning In discussions of music from both popular and classical traditions Sanden demonstrates how liveness is performed by acts of human expression in productive tension with the electronic machines involved in making this music whether on stage or on recording Liveness is not a fixed ontological state that exists in the absence of electronic mediation but rather a dynamically performed assertion of human presence within a technological network of communication This book provides new insights into how the ideas of performance and liveness continue to permeate the perception and reception of even highly mediatized music within a society so deeply invested on every level with the use of electronic technologies
