Sacred Landscapes in Antiquity Ralph Haussler, Gian Franco Chiai, 2020-07-31 From generation to generation people experience their landscapes differently Humans depend on their natural environment it shapes their behavior while it is often felt that deities responsible for both natural benefits and natural calamities such as droughts famines floods and landslides need to be appeased We presume that in many societies lakes rivers rocks mountains caves and groves were considered sacred Individual sites and entire landscapes are often associated with divine actions mythical heroes and etiological myths Throughout human history people have also felt the need to monumentalize their sacred landscape But this is where the similarities end as different societies

had very different understandings, beliefs and practices. The aim of this new thematic appraisal is to scrutinize carefully our evidence and rethink our methodologies in a multi-disciplinary approach. More than 30 papers investigate diverse sacred landscapes from the Iberian peninsula and Britain in the west to China in the east. They discuss how to interpret the intricate web of ciphers and symbols in the landscape and how people might have experienced it. We see the role of performance, ritual, orality, textuality and memory in people's sacred landscapes. A diachronic view allows us to study how landscapes were rewritten, adapted and redefined in the course of time to suit new cultural, political and religious understandings, not to mention the impact of urbanism on people's understandings. A key question is how was the landscape manipulated, transformed and monumentalized, especially the colossal investments in monumental architecture we see in certain socio-historic contexts or the creation of an alternative, human-made, seemingly non-natural landscape with perfectly astronomically aligned buildings that define a cosmological order. Sacred Landscapes therefore aims to analyze the complex links between landscape, religiosity and society, developing a dialectic framework that explores sacred landscapes across the ancient world in a dynamic, holistic, contextual and historical perspective.

Mount Fuji

H. Byron Earhart, 2015-07-15. Illustrated with color and black and white images of the mountain and its associated religious practices. H. Byron Earhart's study utilizes his decades of fieldwork, including climbing Fuji with three pilgrimage groups and his research into Japanese and Western sources, to offer a comprehensive overview of the evolving imagery of Mount Fuji from ancient times to the present day. Included in the book is a link to his twenty-eight minute streaming video documentary of Fuji pilgrimage and practice. Fuji Sacred Mountain of Japan. Beginning with early reflections on the beauty and power associated with the mountain in medieval Japanese literature, Earhart examines how these qualities fostered spiritual practices such as Shugendō, which established rituals and a temple complex at the mountain as a portal to an ascetic otherworld. As a focus of worship, the mountain became a source of spiritual insight, rebirth and prophecy through the practitioners, Kakugyō and Jikigyō, whose teachings led to social movements such as Fujido, the way of

Fuji and to a variety of pilgrimage confraternities making images and replicas of the mountain for use in local rituals Earhart shows how the seventeenth century commodification of Mount Fuji inspired powerful interpretive renderings of the peerless mountain of Japan such as those of the nineteenth century print masters Hiroshige and Hokusai which were largely responsible for creating the international reputation of Mount Fuji In the eighteenth and nineteenth centuries images of Fuji served as an expression of a unique and superior Japanese culture With its distinctive shape firmly embedded in Japanese culture but its ethical ritual and spiritual associations made malleable over time Mount Fuji came to symbolize ultranationalistic ambitions in the 1930s and early 1940s peacetime democracy as early as 1946 and a host of artistic naturalistic and commercial causes even the exotic and erotic in the decades since

Visual and Spatial Structure of Landscapes Tadahiko Higuchi,1988-07-06 In this imaginative and generously illustrated book Tadahiko Higuchi applies a methodology to landscape that is similar to that developed by Kevin Lynch for investigating the extent to which urban settings are legible and imageable to their inhabitants He identifies features such as landmarks boundaries paths and nodes that enable people moving through a landscape to piece together a reliable mental map of their surroundings beginning with major structural elements and filling in with successively finer detail

Long-Term Ecosystem Changes in Riparian Forests Hitoshi Sakio,2020-05-19 This open access book presents and analyzes the results of more than 30 years of long term ecological research in riparian forest ecosystems with the aim of casting light on changes in the dynamics of riparian forests over time The research focusing on the Ooyamazawa riparian forest one of the remaining old growth forests in Japan has yielded a number of interesting outcomes First it shows that large scale disturbances afford various trees opportunities for regeneration and are thus the driving force for the coexistence of canopy trees in riparian forests Second it identifies changes in reproductive patterns highlighting that seed production has in fact quantitatively increased over the past two decades Third it describes the decline in forest floor vegetation caused by deer grazing and reveals how this decline has affected bird and insect populations The book illustrates the interconnectedness of phenomena within an ecosystem and the resultant potential for cascade effects and also stresses the need for long term ecological studies of climate change impacts on forests It will be of interest to both professionals and academics in the field of forest science
