Process Ethics A Constructive System:

Process Ethics Kenneth Cauthen, 1984 An attempt to create a constructive and ethical system based on process philosophy which is often considered America's distinctive contribution to philosophy This work seeks to develop a system of Christian ethics based on process philosophy but without employing the highly technical language of that discipline

Whiteheadian Ethics Mihály Tóth, Theodore Walker, 2009-03-26 For deliberations on the ethical and meta ethical implications of Alfred North Whitehead's process philosophy here are abstracts and papers from the Ethics Section of the 6th International Whitehead Conference held at the University of Salzburg in Salzburg Austria in July 2006 In accordance with the conference schedule there are three subsections The subsection on Metaphysics of Morals and Moral Theory includes contributions from Franklin I Gamwell Does Morality Presuppose God John W Lango abstract only Duane Voskuil Ethics Dipolar Necessities and Theistic Implications and Theodore Walker Jr Neoclassical Cosmology and Matthew 22 36 40 The subsection on Evaluating Moral Practices includes contributions from Frederick Ferr abstract only Seung Gap Lee Hope for the Earth A Process Eschatological Eco ethics for South Korea Mary Elizabeth Mullino Moore Compassion Creativity and Form The Ethics of Institutions and George W Shields Ruse Altruism and Process Philosophy The subsection on Ethics and Aesthetic Values includes contributions from Stephen T Franklin abstract only Brian G Henning Is There an Ethics of Creativity Mihály Tóth Art of Life and the Ethics of Life Forming and Guorong Yang Problems and Perspectives in the Emerging of Global Society *Process Studies*, 1988 **The Ethics of Creativity** Brian G. Henning, 2011-12-09 Foreword by Daniel A Dombrowski A central concern of nearly every environmental ethic is its desire to extend the scope of direct moral concern beyond human beings to plants nonhuman animals and the systems of which they are a part Although nearly all environmental philosophies have long since rejected modernity's conception of individuals as isolated and independent substances few have replaced this worldview with an alternative that is adequate to the organic processive world in which we find ourselves In this context Brian G Henning argues that the often overlooked work of Alfred North Whitehead has the potential to make a significant contribution to environmental ethics Additionally inspired by classical American philosophers such as William James John Dewey and Charles Sanders Pierce and environmental philosophers such as Aldo Leopold Peter Singer Albert Schweitzer and Arne Naess Henning develops an ethical theory of which the seminal insight is called The Ethics of Creativity By systematically examining and developing a conception of individuality that is equally at home with the microscopic world of subatomic events and the macroscopic world of ecosystems The Ethics of Creativity correctly emphasizes the well being of wholes while not losing sight of the importance of the unique centers of value that constitute these wholes In this way The Ethics of Creativity has the potential to be a unique voice in contemporary moral philosophy

The Passion for Equality Kenneth Cauthen, 1987 From the Revolutionary War through the Civil War to the debates of today the passion for equality has been one of the keystones of American society This study offers an historical survey of the

idea of equality in America a philosophical analysis of the concept and a proposal for a more balanced integration of equality in the structure of American society The Passion for Equality is an important book grounded in the traditions of John Rawls and Robert Nozick It is recommended for philosophers ethicists economists political scientists and social theorists of all political persuasions **Personal Identity, the Self, and Ethics** F. Santos,Santiago Sia,2007-08-16 Going beyond the controversy surrounding personhood in non philosophical contexts this book defends the need for a credible philosophical conception of the person Engaging with John Locke Derek Parfit and P F Strawson the authors develop an original philosophical anthropology based on the work of Charles Hartshorne and A N Whitehead **Tao te Ching** Lao Tzu,2021-04-06 Although translations and interpretations of the Tao te Ching abound and new editions are released yearly few accomplish the hard work of linking and bridging the Tao s profound message to the needs of modern readers There may be a profusion of versions but our lives and our world reflect little of the deep transformative potential of this important text Marc S Mullinax s new translation grows from extensive teaching experience and combines a deep understanding of the Tao s fourth century BCE Chinese context with an exciting two part application of that text to contemporary life First each of the eighty one verses is joined by a richly curated array of quotes sayings poems and stories from wisdom traditions around the globe With quotes ranging from Emerson to Pink Floyd and from the apostle Paul to Margaret Atwood the Tao s meaning comes alive in conversation with others Second a brief reflection puts the verse in historical context and highlights the transformative power of Wu Wei the non interfering action perfectly timed to promote peace and prevent injury to bring joy and justice to a hurting world Eugen Rosenstock-Huessy M. Darrol Bryant,Hans R. Huessy,1986 A collection of 17 essays on the little known thinker Eugen Rosenstock Huessy one of the first academics to resign his post in Germany when Hitler came to power The Culture of Feedback Daniel Belgrad,2019-08-30 When we want advice from others we often casually speak of getting some feedback But how many of us give a thought to what this phrase means The idea of feedback actually dates to World War II when the term was developed to describe the dynamics of self regulating systems which correct their actions by feeding their effects back into themselves By the early 1970s feedback had become the governing trope for a counterculture that was reoriented and reinvigorated by ecological thinking The Culture of Feedback digs deep into a dazzling variety of left of center experiences and attitudes from this misunderstood period bringing us a new look at the wild side of the 1970s Belgrad shows us how ideas from systems theory were taken up by the counterculture and the environmental movement eventually influencing a wide range of beliefs and behaviors particularly related to the question of what is and is not intelligence He tells the story of a generation of Americans who were struck by a newfound interest in and respect for plants animals indigenous populations and the very sounds around them threading his tapestry with cogent insights on environmentalism feminism systems theory and psychedelics The Culture of Feedback repaints the familiar image of the 70s as a time of Me Generation malaise to reveal an era of revolutionary and hopeful social currents driven by desires
