

Fostering New Relational Experience: Clinical Process in Couple Psychotherapy

Cheri L. Marmarosh
The George Washington University

One of the most critical goals for couple psychotherapy is to foster a new relational experience in the session where the couple feels safe enough to reveal more vulnerable emotions and to explore their defensive withdrawal, aggressive attacking, or blaming. The lived intimate experience in the session offers the couple an opportunity to gain integrative insight into their feelings, expectations, and behaviors that ultimately hinder intimacy. The clinical processes that are necessary include empathizing with the couple and facilitating safety within the session, looking for opportunities to explore emotions, ruptures, and unconscious motivations that maintain distance in the relationship, and creating a new relational experience in the session that has the potential to engender integrative insight. These clinical processes will be presented with empirical support. Exports from a session will be used to highlight how these processes influence the couple and promote increased intimacy.¹

Keywords: couples, marital therapy, psychotherapy process, empathy

As a psychodynamic clinician, there are a few empirically supported clinical objectives that I hold in mind in each and every session. My overall goal is to re-create a new relational experience in the session where the couple feels safe enough to reveal more vulnerable emotions and to explore their defensive withdrawal, aggressive attacking, or blaming. This new relational experience offers the couple an opportunity to gain insight into their implicit feelings, expectations, and behaviors that hinder intimacy. The most important things I try to do in each session are (1) empathize with the couple and facilitate safety within the session, (2) look for opportunities to explore emotions, ruptures, and unconscious motivations that maintain distance, and (3) create a new relational experience in the session that has the potential to engender integrative insight and emotional closeness.

Empathic Attunement: Theory, Research, and Couple Psychotherapy

Psychoanalytic/dynamic couple therapists (Bagnini, 2012; Clulow, 2001; Livingston, 1995; McCormack, 2000; Scharff & Scharff, 1991; Zinner, 2008) and nondynamic couple therapists and researchers (Gottman, 1993; Johnson & Greenberg, 1985) emphasize the necessity for the couple therapist to facilitate each partner's ability to begin to move toward one another. The therapist provides the environment needed for couples to begin the process of uncovering the complex interpersonal and intrapersonal struggles that hinder closeness.

McCormack (2000) argues that the affect-regulating function that couple therapists perform, similar to the early attachment figure, is the primary task of the therapist and provides this safety. The therapist creates the environment where both partners can feel their feelings, think their thoughts, and have the experience of being understood. This experience of feeling understood fosters the regulation of difficult emotions, encourages risk taking and trust, allows each partner to explore his or her own personal struggles that hinder intimacy, and allows for the necessary repair of relationship ruptures. It is not surprising that the emphasis on empathy underlies many diverse approaches to couple psychotherapy, including Object Relational perspectives (Bagnini, 2012; Scharff & Scharff, 1991; McCormack, 2000; Siegel, 1992), Self-Psychological approaches (Leone, 2008; Livingston, 1995; Solomon, 1985), Attachment-Focused treatment (Johnson & Whiffen, 2005), Behavioral approaches (Jacobson & Margolin, 1979), and Cognitive Behavioral treatment (Patterson, 2005).

In addition to theory, empirical research has demonstrated that empathy is a critical component of effective psychotherapy (Elliot, Bohart, Watson, & Greenberg, 2011), is strongly related to satisfaction with romantic partners (Cramer & Jowett, 2010), and that the manner in which a partner responds unempathically relates to increases in the tension in the relationship and the escalation of conflict (Carrière, Buellman, Gottman, Coan, & Ruckstuhl, 2000). A recent study found that it is not only the accuracy of empathy that relates to satisfaction and conflict resolution, but it is also the partner's perception of empathic effort (Cohen, Shale, Weiss, & Waldinger, 2012). These researchers found that empathic effort by one partner was more related to both partner's relationship satisfaction compared with the rating of the empathic accuracy of the response. In essence, the perception that the partner is trying to

Prescriptive Psychotherapies Arnold P. Goldstein, Norman Stein, 2013-10-22. *Prescriptive Psychotherapies* describes a prescriptive approach to psychotherapeutic treatment. At the heart of this prescriptive model is the patient X therapist X treatment interactionist view of the question: Which type of patient, meeting with which type of therapist, for which type of treatment, will yield which outcomes? The diagnostic research and therapeutic implications of this viewpoint are examined. Attention is also devoted to the question of how prescriptive psychotherapy research might be most advantageously conducted to yield prescriptive information leading to increasingly successful treatment outcomes. This book is comprised of 15 chapters and begins by explaining the value and development of prescriptive psychotherapies and suggesting a schema for both conceptualizing and generating investigations that may yield progressively more useful psychotherapeutic prescriptions. The next chapter considers the views of others regarding issues bearing upon the prescriptive process, particularly the role of diagnosis. The treatment and research implications of psychological testing are then explored, along with the role of assessment in behavior modification. Several of the key issues in the process of achieving effective application of the integrated insight behavioral approach to psychobehavioral counseling and therapy are also examined. Examples of clinical prescriptions of prescriptive psychotherapies are given, including psychoneuroses, psychophysiological disorders, and sexual deviations. This monograph is addressed to both clinicians and researchers concerned with the conduct and effectiveness of psychotherapy. *Comprehensive Handbook of Psychotherapy Integration* George Stricker, Jerold R. Gold, 2013-06-29. This Handbook is the culmination of an interest in psychotherapy integration that led to our first professional collaboration in 1978. At that time, we undertook research conducted for a doctoral dissertation by the second editor and supervised by the senior editor to understand from and within a psychodynamic perspective the experiences of patients who had completed behavioral therapies. At that time, psychotherapy integration was a topic considered viable and interesting by only a few clinicians and scholars, with little communication among them and less awareness, concern, and appreciation on the part of psychotherapists in general. The situation today has changed. The appearance of this Handbook may be taken as a significant sign of maturation and legitimacy of work in psychotherapy integration. It is our hope and expectation that this volume will serve as an up-to-date and exhaustive overview of the status of ongoing scholarly and

clinical work in the integration of the major schools of psychotherapy The Handbook opens with a section that will provide the reader with an overview of the history sociocultural context and empirical status of the broad field of psycho therapy integration **Erosion** Golan Shahar,2015 Erosion offers a comprehensive treatment of self criticism based in philosophy developmental science personality and clinical psychology social theories and cognitive affective neuroscience
