**Processing Interclausal Relationships** Jean Costermans, Michel Fayol, 1997 First Published in 1996 Routledge is an imprint of Taylor Francis an informa company Processing interclausal Relationships Jean Costermans, Michel Fayol, 2014-03-18 During the last 10 years more and more linguistic and psycholinguistic research has been devoted to the study of discourse and written texts Much of this research deals with the markers that underline the connections and the breaks between clauses and sentences plus the use of these markers by adults and children in the production and comprehension of oral and written material In this volume major observations and theoretical views from both sides of the Atlantic are brought together to appeal to a wide range of linguists psychologists and speech therapists The volume presents contributions from researchers interested specifically in adult language and from others concerned with developmental aspects of language Some contributors deal primarily with production whereas others concentrate on comprehension Some direct their attention to oral discourse while others focus on written texts To preserve overall coherence however the contributors were given the following recommendations With regard to the level of linguistic analysis the emphasis should be on the clause level more particularly on the relationships between clauses Special emphasis should also be placed on linguistic markers e g connectives markers of segmentation punctuation An overview of a given field of research should be offered and current research should be put into perspective For contributors in the developmental field attention should be paid to the fact that an account of the acquisition of some language functions throughout childhood should be included only if general principles of interclause relations that might be masked by the exclusive examination of adult evidence could be derived from it The Theory and Practice of Discourse Parsing and Summarization Daniel Marcu, 2000 Most discourse researchers assume that full semantic understanding is necessary to derive the discourse structure of texts This book documents an attempt to construct and use automatic and non semantic computational structures for text summarization

Roger Beard, Debra Myhill, Jeni Riley, Martin Nystrand, 2009-07-09 Writing development is currently the focus of substantial international debate because it is the aspect of literacy education that has been least responsive to central government and state reforms Teaching approaches in writing have been slower to change than those in teaching reading and pupil attainment in writing has increased at a much more modest rate than pupil attainment in reading This handbook critically examines research and theoretical issues that impact on writing development from the early years through to adulthood It

provides those researching or teaching literacy with one of the most academically authoritative and comprehensive works in the field. With expert contributors from across the world, the book represents a detailed and valuable overview of a complex area of study.

**Causal Categories in Discourse and Cognition** Ted Sanders, Eve Sweetser, 2009. Review text. With all these contributions, this collection definitely constitutes a high quality volume in this research area and is a valuable reference to anyone who is interested in discourse and cognition.

**Visual language** Wendy Sandler, Marianne Gullberg, Carol Padden, 2019-11-04. Traditionally, research on human language has taken speech and written language as the only domains of investigation. However, there is now a wealth of empirical studies documenting visual aspects of language, ranging from rich studies of sign languages, which are self-contained visual language systems, to the field of gesture studies, which examines speech-associated gestures, facial expressions, and other bodily movements related to communicative expressions. But despite this large body of work, sign language and gestures are rarely treated together in theoretical discussions. This volume aims to remedy that by considering both types of visual language jointly in order to transcend artificial theoretical divides and to arrive at a comprehensive account of the human language faculty. This collection seeks to pave the way for an inherently multimodal view of language in which visible actions of the body play a crucial role. The 19 papers in this volume address four broad and overlapping topics: 1. the multimodal nature of language; 2. multimodal representation of meaning; 3. multimodal and multichannel prosody; and 4. acquisition and development of visual language in children and adults.

**Text Representation** Ted Sanders, Joost Schilperoord, Wilbert Spooren, 2001-01-01. The chapters of this volume are all based on papers presented at the International workshop on text representation: Linguistic and psycholinguistic aspects, held at Utrecht University. The theme of this title is text representation, or more specifically, the linguistic and psycholinguistic aspects thereof. Text representation is a cognitive entity, a mental construct that plays a crucial role in both text production and text understanding. In text production, it is the basis for lexical retrieval and for producing and combining the discourse units. In text understanding, it is the result of the decoding of the linguistic information in a discourse. This book characterizes a field of study in which the two disciplines, linguistics and psycholinguistics, are growing together.

**Unity and Diversity in Language Use** Kristyan Miller, Paul Thompson, 2006-01-23 The papers in this collection drawn from the 34th Annual Conference of the British Association for Applied Linguistics reflect a number of different perspectives within the field of applied linguistics at the start of the twenty first century While addressing the theme of unity and diversity each paper prompts critical reflection on tensions within the discipline between stability and change consensus and controversy similarity and variation The interpretation of language use is broad and varied taking both macro and micro perspectives Topics addressed range from issues of global communication in a world of shifting demographics and technological advances to analyses of specific contexts of interaction both professional and personal Contexts of language use frequently coincide with settings of language acquisition both within and beyond the language classroom and this opens up discussion of the focus scope and appropriateness of research stances in applied linguistics and practices in language pedagogy Furthermore variation is considered from a number of social cultural gender related linguistic and discourse perspectives calling into question terminology definitions and the nature of evidence at the heart of applied linguistic theory and practice

Sentence Comprehension David J. Townsend, Thomas G. Bever, 2001 Using sentence comprehension as a case study for all of cognitive science David Townsend and Thomas Bever offer an integration of two major approaches the symbolic computational and the associative connectionist The symbolic computational approach emphasizes the formal manipulation of symbols that underlies creative aspects of language behavior The associative connectionist approach captures the intuition that most behaviors consist of accumulated habits The authors argue that the sentence is the natural level at which associative and symbolic information merge during comprehension The authors develop and support an analysis by synthesis model that integrates associative and symbolic information in sentence comprehension This integration resolves problems each approach faces when considered independently The authors review classic and contemporary symbolic and associative theories of sentence comprehension and show how recent developments in syntactic theory fit well

with the integrated analysis by synthesis model They offer analytic experimental and neurological evidence for their model and discuss its implications for broader issues in cognitive science including the logical necessity of an integration of symbolic and connectionist approaches in the field      Thematics Max Louwerse,Willie Van Peer,2002-01-01 Themes play a central role in our everyday communication we have to know what a text is about in order to understand it Intended meaning cannot be understood without some knowledge of the underlying theme This book helps to define the concept of themes in texts and how they are structured in language use Much of the literature on Thematics is scattered over different disciplines literature psychology linguistics cognitive science which this detailed collection pulls together in one coherent overview The result is a new landmark for the study and understanding of themes in their everyday manifestation      *Through the Models of Writing* D. Alamargot,L. Chanquoy,2012-12-06 This book provides both young and senior scientists with a comparative view of current theoretical models of text production Models are clearly situated in their historical context scrutinized in their further evolution with a fine grained observation of differences between models Very complete and informative to read this book will be useful to people working in teaching of writing or studying this specific human activity      Formal Models in the Study of Language Joanna Blochowiak,Cristina Grisot,Stephanie Durrleman,Christopher Laenzlinger,2017-03-20 This volume presents articles that focus on the application of formal models in the study of language in a variety of innovative ways and is dedicated to Jacques Moeschler professor at University of Geneva to mark the occasion of his 60th birthday The contributions by seasoned and budding linguists of all different linguistic backgrounds reflect Jacques Moeschler s diverse and visionary research over the years The book contains three parts The first part shows how different formal models can be applied to the analysis of such diverse problems as the syntax semantics and pragmatics of tense aspect and deictic expressions syntax and pragmatics of quantifiers and semantics and pragmatics of connectives and negation The second part presents the application of formal models to the treatment of cognitive issues related to the use of language and in particular demonstrating cognitive accounts of different types of human interactions the context in utterance interpretation salience inferential comprehension processes figurative uses of language irony pretence the role of syntax in Theory of Mind in autism and the analysis of the aesthetics of nature Finally the third part addresses computational and corpus based approaches to natural language for investigating language variation language universals and discourse related issues This volume will be of great interest to syntacticians pragmaticians computer scientists semanticists and psycholinguists      *The Grammar of Genres and Styles* Dominique Legallois,Thierry Charnois,Meri Larjavaara,2018-04-09 The book provides new findings about the grammar of genres and styles It combines new methods with different kinds of empirical material from social reports to live TV sports commentaries or 16th century newspapers in English French Latin and Spanish The study of non discrete units suggests new ways of seeing the linguistic variation between genres and styles and the ways in which belonging to a genre predetermines linguistic choices      **Handbook of Children's Literacy** Terezinha Nunes,Peter Bryant,2013-03-09 PETER

BRYANT TEREZINHA NUNES The time that it takes children to learn to read varies greatly between different orthographies as the chapter by Sprenger Charolles clearly shows and so do the difficulties that they encounter in learning about their own orthography Nevertheless most people who have the chance to learn to read do in the end read well enough even though a large number experience some significant difficulties on the way Most of them eventually become reasonably efficient spellers too even though they go on make spelling mistakes at any rate if they are English speakers for the rest of their lives So the majority of humans plainly does have intellectual resources that are needed for reading and writing but it does not always find these resources easy to marshal What are these resources Do any of them have to be acquired Do different orthographies make quite different demands on the intellect Do people differ significantly from each other in the strength and accessibility of these resources If they do are these differences an important factor in determining children s success in learning to read and write These are the main questions that the different chapters in this section on Basic Processes set out to answer

**The Pragmatics of Discourse Coherence** Helmut Gruber, Gisela Redeker, 2014-11-15 Over the past four decades discourse coherence has been studied from linguistic psycholinguistic computational and applied perspectives This volume identifies current issues and under researched topics in the pragmatics of discourse coherence Nine studies from various disciplines address the realization and signalling of coherence relations in various genres and languages their acquisition and use by first and second language learners and university students the relationship between coherence relations and genre specific discourse structure and extensions of the coherence paradigm to multimodal discourse and visual art This collection will be of interest to researchers from linguistics applied linguistics psychology communication and multimodal semiotics
