Challenging Neoliberalism in Latin America Eduardo Silva, 2009-08-31 At the turn of the twentieth century a concatenation of diverse social movements arose unexpectedly in Latin America culminating in massive anti free market demonstrations These events ushered in governments in Argentina Bolivia Ecuador and Venezuela that advocated socialization and planning challenging the consensus over neoliberal hegemony and the weakness of movements to oppose it Eduardo Silva offers the first comprehensive comparative account of these extraordinary events arguing that the shift was influenced by favorable political associational space a reformist orientation to demands economic crisis and mechanisms that facilitated horizontal linkages among a wide variety of social movement organizations His analysis applies Karl Polanyi s theory of the double movement of market society to these events predicting the dawning of an era more supportive of government intervention in the economy and society

Dilemmas of Modernity Mark Goodale, 2008-10-29 Dilemmas of Modernity provides an innovative approach to the study of contemporary Bolivia moving telescopically between social political legal and discursive analyses and drawing from a range of disciplinary traditions Based on a decade of research it offers an account of local encounters with law and liberalism Mark Goodale presents through a series of finely grained readings a window into the lives of people in rural areas of Latin America who are playing a crucial role in the emergence of postcolonial states The book contends that the contemporary Bolivian experience is best understood by examining historical patterns of intention as they emerge from everyday practices It provides a compelling case study of the appropriation and reconstruction of transnational law at the local level and gives key insights into this important South American country

Meaningful Resistance Erica S. Simmons, 2016-06 Exploring marketization local practices and protests this book shows how market driven subsistence threats can be powerful loci for resistance movements

Religion and Politics in Europe and Latin America Andrés Pérez-Baltodano, 2025-09-22 This book presents a comparative interpretation of the socio emotional histories of Europe and Latin America offering a novel perspective on the roles of religion and politics in managing collective fear and insecurity in these two regions Emphasizing the historical fears and insecurities faced by underprivileged sectors of Latin American society the book draws on cognitive and social sciences to

compile political socioeconomic and cultural landmarks identifying continuities and ruptures in European and Latin American histories The volume highlights Europe's success and Latin America's relative failure in crafting political visions capable of taming fear and insecurity It shows how this largely correlates with how meticulous providentialism the belief that God governs history has been supplanted by general providentialism the belief that God does not intervene in history in the religious cultures of the two regions This shift corresponds to the degree of control individuals feel they have over their history and destiny which typically aligns with their actual social affordances At the heart of these discussions is the notion that the authenticity of the theoretical foundations of political visions is conditioned by society's view of the divine which ultimately determines the capacity of these visions potential to impact history Religion and Politics in Europe and Latin America is a useful resource for students and academics interested in Latin American and European history politics and culture

The Lettered Indian Brooke Larson, 2023-11-17 Bringing into dialogue the fields of social history Andean ethnography and postcolonial theory The Lettered Indian maps the moral dilemmas and political stakes involved in the protracted struggle over Indian literacy and schooling in the Bolivian Andes Brooke Larson traces Bolivia's major state efforts to educate its unruly Indigenous masses at key junctures in the twentieth century While much scholarship has focused on the Indian boarding school and other Western schemes of racial assimilation Larson interweaves state centered and imperial episodes of Indigenous education reform with vivid ethnographies of Aymara peasant protagonists and their extraordinary pro school initiatives Exploring the field of vernacular literacy practices and peasant political activism she examines the transformation of the rural alphabet school from an instrument of the civilizing state into a tool of Aymara cultural power collective representation and rebel activism From the metaphorical threshold of the rural school Larson rethinks the politics of race and indigeneity nation and empire in postcolonial Bolivia and beyond

Sustaining Civil Society Philip Oxhorn, 2011-01-01 South America is not the poorest continent in the world but it may very well be the most unjust This statement by Ricardo Lagos then president of Chile at the Summit of the Americas in January 2004 captures nicely the dilemma that faces Latin American countries in the wake of the transition to democracy that swept across the continent in the last two decades of the twentieth century While political rights are now available to citizens at unprecedented levels social and economic rights lag far behind and the fledgling democracies struggle with long legacies of poverty inequality and corruption Key to understanding what is happening in Latin America today is the relationship between the state and civil society In this ambitious book Philip Oxhorn sets forth a theory of civil society adequate for explaining current developments in a way that such controversial neoconservative theories as Francis Fukuyama's liberal triumphalism or Samuel Huntington's clash of civilizations cannot Inspired by the rich political sociology of an earlier era and the classic work of T H Marshall on citizenship Oxhorn studies the process by which social groups are incorporated or not into national socioeconomic and political development through an approach that focuses on the social construction of citizenship

Brazil, 1964-1985 Herbert S. Klein, Francisco Vidal Luna, 2017-04-25 An insightful study of the political economic and social changes Brazil experienced during the twenty year rule of its Cold War military regime Cuba's revolution in 1959 fueled powerful anti Communist fears in the United States As a result in the years that followed governments throughout Central and South America were toppled in U S backed military coups and by 1977 only three democratically elected leaders remained in all of Latin America This perceptive study coauthored by a revered historian and a prominent economist examines how the military rulers of Brazil profoundly altered the nation's economy politics and society during their two decades in power and it explores the lasting impact of these changes after democracy was restored Comparing and contrasting the history programs methods and goals of Brazil's Cold War era authoritarian government with the military regimes of Peru Chile Argentina Bolivia and Uruguay authors Herbert Klein and Francisco Vidal Luna offer a fascinating detailed analysis of the Brazilian experience from 1964 to 1985 one of the darkest most difficult periods in Latin American history

Pérez, 2015-03-02 More than thirty years have passed since Latin America began the arduous task of transitioning from military led rule to democracy In this time more countries have moved toward the institutional bases of democracy than at any time in the region's history Nearly all countries have held free competitive elections and most have had peaceful alternations in power between opposing political forces Despite these advances however Latin American countries continue to face serious domestic and international challenges to the consolidation of stable democratic governance The challenges range from weak political institutions corruption legacies of militarism transnational crime and globalization among others In the second edition of Latin American Democracy contributors both academics and practitioners North Americans Latin Americans and Spaniards explore and assess the state of democratic consolidation in Latin America by focusing on the specific issues and challenges confronting democratic governance in the region This thoroughly updated revision provides new chapters on the environment decentralization the economy indigenous groups and the role of China in the region

ReVista, 2003 The Great Curse R. Albert Berry, 2024 Land is the key input for economies in the earliest stages of development when seventy five percent to ninety percent of the labor force is engaged in agriculture Concentration of land ownership has been a common and usually quite damaging feature of most societies throughout history as both the cause and the result of access to power Highly unequal control of land typically implies severe inequality of income and welfare as well Landlessness has been at the root of many of the world's most serious and persistent problems including severe exploitation and the deprivation of political rights and basic human needs Historically the motivation for many revolutions has been access to land This volume reviews the land reform experiences of multiple countries during the twentieth century The experiences I covered illustrate the widespread need for reform the great difficulties facing major changes and the extreme cost of failure in delicate political moments Looking ahead the biggest challenge will be to avoid the injustices and inequality that have accompanied land concentration
