battlespace emphasis on coalition warfare and defence industrial cooperation and reform of the financial procurement and logistical systems The contributors to this book evaluate these environmental changes within a defence management context

Fighting Corruption in Public Procurement Sope Williams-Elegbe, 2012-11-06 Anti corruption measures have firmly taken centre stage in the development agenda of international organisations as well as in developed and developing countries One area in which corruption manifests itself is in public procurement and as a result States have adopted various measures to prevent and curb corruption in public procurement One such mechanism for dealing with procurement corruption is to debar or disqualify corrupt suppliers from bidding for or otherwise obtaining government contracts This book examines the issues and challenges raised by the debarment or disqualification of corrupt suppliers from public contracts Implementing a disqualification mechanism in public procurement raises serious practical and conceptual difficulties which are not always considered by legislative provisions on disqualification Some of the problems that may arise from the use of disqualifications include determining whether a conviction for corruption ought to be a pre requisite to disqualification bearing in mind that corruption thrives in secret resulting in a dearth of convictions Another issue is determining how to balance the tension between granting adequate procedural safeguards to a supplier in disqualification proceedings and not delaying the procurement process A further issue is determining the scope of the disqualification in the sense of determining whether it applies to firms natural persons subcontractors subsidiaries or other persons related to the corrupt firm and whether disqualification will lead to the termination of existing contracts The book compares and contrasts the legal practical and institutional approaches to the implementation of the disqualification mechanism in the European Union the United Kingdom the United States the Republic of South Africa and the World Bank

Public Procurement and the EU Competition Rules Albert Sánchez Graells, 2011-01-29 Shortlisted for the 2012 Prix Vogel in Economic Law Public procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market Hitherto their close connection has been noted but not closely examined This new work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market In this process of convergence between competition and public procurement law the need for this joint study is clearly apparent As such the book asks whether competition law principles inform or condition public procurement rules and whether they are adequate to ensure that competition is not distorted in markets where public procurement is particularly significant The book moves away from the classical focus of public procurement on the activities of private actors developing instead an analytical framework for the appraisal of the market behaviour of the public buyer from a competition perspective The analysis is both legal and economic Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of the rules in competition and public procurement against a standard of the proper functioning of undistorted competition in the market for public

Smith,2011-04-15 The Socialist Revolutionaries SRs were the largest political party in Russia in the crucial revolutionary year of 1917 Heirs to the legacy of the People s Will movement the SRs were unabashed proponents of peasant rebellion and revolutionary terror emphasizing the socialist transformation of the countryside and a democratic system of government as their political goals They offered a compelling but still socialist alternative to the Bolsheviks yet by the early 1920s their party was shattered and its members were branded as enemies of the revolution In 1922 the SR leaders became the first fellow socialists to be condemned by the

Bolsheviks as counter revolutionaries in the prototypical Soviet show trial In Captives of the Revolution Scott B Smith presents both a convincing account of the defeat of the SRs and a deeper analysis of the significance of the political dynamics of the Civil War for subsequent Soviet history Once the SRs decided to openly fight the Bolsheviks in 1918 they faced a series of nearly impossible political dilemmas At the same time the Bolsheviks fatally undermined the revolutionary credentials of the SRs by successfully appropriating the rhetoric of class struggle painting a simplistic picture of Reds versus Whites in the Civil War a rhetorical dominance that they converted into victory over the SRs and any left wing alternative to Bolshevik dictatorship In this narrative the SRs became a bona fide threat to national security and enemies of the people a characterization that proved so successful that it became an archetype to be used repeatedly by the Soviet leadership against any political opponents even those from within the Bolshevik party itself In this groundbreaking study Smith reveals a more complex and nuanced picture of the postrevolutionary struggle for power in Russia than we have ever seen before and demonstrates that the Civil War and in particular the struggle with the SRs was the formative experience of the Bolshevik party and the Soviet state *Contractual Procedures in the Construction Industry* Allan Ashworth, Srinath

Perera, 2018-03-13 *Contractual Procedures in the Construction Industry* 7th edition aims to provide students with a comprehensive understanding of the subject and reinforces the changes that are taking place within the construction industry The book looks at contract law within the context of construction contracts it examines the different procurement routes that have evolved over time and the particular aspects relating to design and construction lean methods of construction and the advantages and disadvantages of PFI PPP and its variants It covers the development of partnering supply chain management design and build and the way that the clients and professions have adapted to change in the procurement of buildings and engineering projects This book is an indispensable companion for students taking undergraduate courses in Building and Surveying Quantity Surveying Construction Management and Project Management It is also suitable for students on HND C courses in Building and Construction Management as well as foundation degree courses in Building and Construction Management Key features of the new edition include A revised chapter covering the concept of value for money in line with the greater emphasis on added value throughout the industry today A new chapter covering developments in information technology applications building information modelling blockchains data analytics smart contracts and others and construction procurement Deeper coverage of the strategies that need to be considered in respect of contract selection Improved discussion of sustainability and the increasing importance of resilience in the built environment Concise descriptions of some of the more important construction case laws [Daily Report, Foreign Radio](#)
