The Virtual Utility Shimon Awerbuch, Alistair Preston, 2012-12-06

In the winter of 1996, after 4 years of planning and research, the Symposium on the Virtual Utility was held in Saratoga Springs, New York. It was sponsored by Niagara Mohawk Power Corporation. Co-sponsored by CSC Index and the New York State Energy Research and Development Authority and hosted by Rensselaer Polytechnic Institute, Troy, NY. The symposium sought to identify new areas of inquiry by presenting cutting edge academic and practitioner research intended to further our understanding of the strategic, technologically driven issues confronting the electricity production and distribution process. The program sought to offer new insights into rapid changes in the utility industry in part by examining analogues from manufacturing and telecommunications. In addition to identifying new research areas, the symposium yielded a number of important findings and conclusions. This volume contains the presented papers of the meeting, the discussant reports and

two special papers prepared by the meeting rapporteurs who performed superbly in analyzing synthesizing explaining and generally bringing a cohesive perspective to the interesting yet complex set of ideas presented at this unique meeting We would like to acknowledge the people and organizations that contributed to this effort We thank Niagara Mohawk Power Corporation and Albert Budney its President Chief Operating Officer for sponsoring this project and Andrew Vesey Vice President I whose vision support and championing made this project possible

Global Companies, Local Innovations Yasuyuki Motoyama, 2016-04-22 Investigating the innovation activities of multinational corporations this book uncovers and examines why the geography of innovation by multinationals is overwhelmingly local in spite of their global operations in manufacturing and sales through case studies of produce development by three global players Toyota Sony and Canon The microdynamic approach of the book allows an in depth investigation of the engineering and technical aspects of innovation making The book unfolds the complex and constant process of trial and error in innovation and reveals three fundamental natures of innovation making complexity interdisciplinarity and prototyping and testing In order to manage these three natures of innovation firms have to plan ironically for unplanned situations and to collocate knowledge people and resources *The Oxford Handbook of Comparative Institutional Analysis* Glenn Morgan, John Campbell, Colin Crouch, Ove Kaj Pedersen, Richard Whitley, 2010-04-08 It is increasingly accepted that institutions matter for economic organization and outcomes The last decade has seen significant expansion in research examining how institutional contexts affect the nature and behaviour of firms the operation of markets and economic outcomes Yet institutions conceal a multitude of issues and perspectives Much of this research has been comparative and followed different models such as varieties of capitalism national business systems and social systems of production This Handbook explores these issues perspectives and models with the leading scholars in the area contributing chapters to provide a central reference point for academics scholars and students *Knowledge Integration* Antonie Jetter, Jeroen Kraaijenbrink, Hans-Horst Schröder, Fons Wijnhoven, 2006-01-19 The ability to manage knowledge is relevant for millions of small and medium sized enterprises SMEs that operate in high tech environments They strongly depend on external knowledge about customers technologies and competitors because as opposed to large companies they have limited internal knowledge resources and little power to control their business environments Present KM literature however mainly focuses on large companies and therefore does not explain how SMEs for example can successfully apply groupware data mining semantic networks and knowledge maps This book addresses this problem by introducing the concept of knowledge integration KI that places emphasis on the identification acquisition and use of external knowledge Drawing from this theoretical basis the book presents concepts and instruments specifically designed for SMEs as well as

examples of their implementation and use in practice
