Capital. Illustrated Karl Marx,2020-01-14

Das Kapital also called Capital A Critique of Political Economy is the most cited book in the social sciences published before 1950 Marx aimed to reveal the economic patterns underpinning the capitalist mode of production in contrast to classical political economists such as Adam Smith Jean Baptiste Say David Ricardo and John Stuart Mill Marx proposes that the motivating force of capitalism is in the exploitation of labor whose unpaid work is the ultimate source of surplus value Das Kapital proposes an explanation of the laws of motion of the capitalist economic system from its origins to its future by describing the dynamics of the accumulation of capital the growth of wage labour the transformation of the workplace the concentration of capital commercial competition the banking system the decline of the profit rate land rents et cetera

,1922 Economics, Capitalism, and Corporations Wm. Dennis Huber,2020-12-10 This book is a continuation of Corporate Law and the Theory of the Firm Reconstructing Corporations Shareholders Directors Owners and Investors The author extends his analysis of contract law property law agency law trust law and corporate statutory law and applies that analysis to defy conventional concepts and theories in economics finance investment and accounting and expose the artificial boundaries established by decades of research founded on indefensible assumptions and fallacious conclusions Using the Humpty Dumpty principle where words mean what the authors want them to mean economists have created strange new worlds where contract law property law agency law and corporate statutory law no longer apply The author dismantles the theory of the firm by proving the theory of the firm wilfully and intentionally ignores fundamental contract law property law agency law and corporate statutory law Contrary to the theory of the firm shareholders do not own corporations directors are not agents of shareholders and shareholders are not investors in corporations The author proves that by property law and corporate law capital is not privately owned by capitalists but by corporations Entire economic and social systems have been constructed that have no basis in law With the advent of publicly traded corporations the capital is there but both capitalists and capitalism have been rendered extinct This book will appeal to researchers and graduate and upper level undergraduate students in economics finance accounting law and sociology as well as legal scholars attorneys and accountants

The Micro-Politics of Capital Jason Read,2003-09-11 Re reads Marx in light of the contemporary critical interrogation of subjectivity

Rethinking Capital Richard Dien Winfield,2016-11-01 This book develops a comprehensive systematic economic theory conceiving how the dynamic of market relations generates an economy dominated by the competitive process of individual profit seeking enterprises The author shows how contrary to classical political economy and contemporary economics the theory of capital is an a priori normative account properly belonging to ethics Exposing and

overcoming the limits of the economic conceptions of Hegel and Marx Rethinking Capital determines how the system of capitals shapes economic freedom jeopardizing the very rights in whose exercise it consists Winfield thereby provides the understanding required to guide the private and public interventions with which capitalism can be given a human face
