**Integrating Gender**

**Equality into Business and Management Education** Patricia M. Flynn, Kathryn Haynes, Maureen A. Kilgour, 2017-09-08

This volume addresses the need to integrate gender equality into business and management education and provides examples of leading initiatives illustrating how this can occur from various disciplinary and global perspectives. Gender inequality has a long history in business schools and the workplace and traditions are hard to change. Some disciplines remain resolutely gendered, affecting both women and men, and case materials on women leaders and managers are still rare. The chapters provide conceptual and research rationales as to why responsible management education must address the issue of gender equality. They also identify materials and resources to assist faculty in integrating gender issues and awareness into various disciplines and fields. These include specific case studies and innovations that assess or address the role of gender in various educational environments. The book is designed to help faculty integrate the topic of gender equality into their own teaching and research and gain support for the legitimacy of gender equality as an essential management education topic. This is the first book in a series on gender equality as a challenge for business and management education published with the Principles of Responsible Management Education (PRME) Working Group on Gender Equality.

*Sustainable Fashion Supply Chain Management* Tsan-Ming Choi, T. C. Edwin Cheng, 2015-03-20. This handbook is a compilation of comprehensive reference sources that provide state of the art findings on both theoretical and applied research on sustainable fashion supply chain management. It contains three parts organized under the headings of Reviews and Discussions, Analytical Research, and Empirical Research, featuring peer-reviewed papers contributed by researchers from Asia, Europe, and the US. This book is the first to focus on sustainable supply chain management in the fashion industry and is therefore a pioneering text on this topic. In the fashion industry, disposable fashion under the fast fashion concept has become a trend. In this trend, fashion supply chains must be highly responsive to market changes and able to produce fashion products in very small quantities to satisfy changing consumer needs. As a result, new styles will appear in the market within a very short time, and fashion brands such as Zara can reduce the whole process cycle from conceptual design to a final ready-to-sell, well-produced and packaged product on the retail sales floor within a few weeks. From the supply chain's perspective, the fast fashion concept helps to match supply and demand and lowers inventory. Moreover, since many fast fashion companies, e.g. Zara, H&M, Green Brand, Strategies in the Fashion Industry, Impacts of Social Media on Consumers, Disposals of Apparel, Fashion Supply Chain Network, Competition with Eco-labelling, Reverse Logistics as a Sustainable Supply Chain Practice for the Fashion Industry, Apparel Manufacturers' Path to World-class Corporate Social Responsibility, Sustainable Supply Chain Management in the Slow Fashion Industry, Mass Market Second-hand Clothing Retail Operations in Hong Kong, Constraints and Drivers of Growth in the Ethical Fashion Sector, The case of France and Effects of Used Garment Collection Programmes in Fast Fashion Brands.
