Vitanza, 2021-01-16 The field of rhetoric and composition has at last received a long lost message delivered in the form of Victor J Vitanza's seminar on James A Berlin In this book that is an untext on Berlin's work and its impact on the field Vitanza acquaints us with Berlin by virtue of many Berlins in multiplicity and via the figure of an excluded third that wants to deliver to us a new message that was undelivered from Berlin to us and from Vitanza to Berlin after Berlin's untimely death in 1994 A seminar on a seminar on the teaching of writing it is teaching all the way down They met at the historical NEH seminar at Carnegie Mellon in 1978 Their friendship and rhetorical dialogues spanned only sixteen years but Vitanza continues the conversation through the seminar through this book rife with reflections and yes homework for his readers and through our reception of it It is up to us now to carry it forward As Vitanza writes I would prefer not to not think that what remains unsaid stays undelivered **Theorizing**

**Composition** Mary Kennedy, 1998-06-25 The last 25 years have witnessed extraordinary growth in the academic specialization variously described as composition studies or rhetoric and composition What was noticeable about the field in its infancy was a preoccupation with practice a lack of emphasis on theory and an exclusive reliance on the writing process As its disciplinary status has grown the field has become far more theoretical Composition studies has expanded its focus reconceptualized the writing process and embraced a wide range of critical perspectives The result of this change is that terms such as poststructuralism social construction gender and genre which were largely unknown in 1965 now dominate discussion This reference book is a guide to the multiplicity of theories that have emerged to form the disciplinary foundation of composition studies The volume consists of 66 entries each of which is written by an expert contributor and focuses on a particular theory or group of theories While the entries show how various individuals have contributed to theoretical movements very few concentrate on the work of a single theorist Each entry first provides a critical summary of a particular theory or group of theories including key elements basic concepts and claims and information about seminal or particularly influential works It then reviews the theory's critical reception in composition studies and discusses its significance in the field The bibliography at the end of each entry lists primary texts and major scholarship related to the theory and provides additional suggestions for further reading The volume closes with a selected bibliography of important works *Many Sides: A Protagorean Approach to the Theory, Practice and Pedagogy of Argument* M. Mendelson, 2013-06-29 Many Sides is the first full length study of Protagorean antilogic an argumentative practice with deep roots in rhetorical history and renewed relevance for contemporary culture Founded on the philosophical relativism of Protagoras antilogic is a dynamic rather than a formal approach to argument focused principally on the dialogical interaction of opposing positions anti logoi in controversy In ancient Athens antilogic was the cardinal feature of Sophistic rhetoric In Rome Cicero redefined Sophistic argument in a concrete set of dialogical procedures In turn Quintilian inherited this dialogical tradition and made it the

centrepiece of his own rhetorical practice and pedagogy Many Sides explores the history theory and pedagogy of this neglected rhetorical tradition and by appeal to recent rhetorical and philosophical theory reconceives the enduring features of antilogical practice in a dialogical approach to argumentation especially suited to the pluralism of our own age and the diversity of modern classrooms

Ecclesiastes and the Riddle of Authorship Thomas M. Bolin, 2017-03-27 In Ecclesiastes the authorial voice of Qohelet presents an identity that has challenged readers for centuries This book offers a reception history of the different ways readers have constructed Qohelet as an author Previous reception histories of Ecclesiastes group readings into premodern and critical or separate Jewish from Christian readings In deliberate contrast this analysis arranges readings thematically according to the interpretive potential inherent in the text a method of biblical reception history articulated by Brennan Breed Doing so erases the artificial distinctions between so called scholarly and confessional readings and highlights the fact that many modern academic readings of the authorship of Ecclesiastes travel in well worn interpretive paths that long predate the rise of critical scholarship Thus this book offers a reminder that while critical biblical scholarship is an essential part of the interpretive task academic readings are themselves indebted to the Bible's reception history and a part of it

*The Sophists*, 2013-10-10 The Sophists were bold exciting innovators with new ideas about Athenian society The first to arrive in about 444 BC was Protagoras During the last half of the fifth century BC he was followed by a succession of new age itinerant instructors who were skilled in teaching Mainly they taught the young ambitious men of Athens instilling in them the skills they sought in order to become successful that is rich and influential The Athenians flocked to hear them and enrol in their courses The Sophists dared to charge high fees for their instruction and their students willingly paid The Sophists were versatile and multi talented It seems that there was nothing one or other of them could not teach but perhaps their greatest legacy to western society was their development of language which naturally also benefited them in their work Plato criticised the Sophists for promoting dangerous ideas which threatened the traditional structure of society They taught their students how to argue convincingly and to turn the weaker argument into a winning argument against the stronger Plato was markedly vitriolic in his criticism of the Sophists Perhaps he was justified Were the Sophists clever rather than wise Where does the truth lie This book with its lively comprehensive treatment of the subject by twenty leading scholars in the field will help the reader to decide

**Contemporary Composition Studies** Edith Babin, Kimberly Harrison, 1999-12-30 Composition studies is a rapidly growing and constantly changing field At present however graduate students new to the field and writing teachers who want to make new connections between theory and practice have little choice of current reference works that define key terms in composition studies and provide information about the scholars and researchers who have shaped and are shaping the discipline This book supplies this information in an easily accessible format and places both scholars and terms in the context of the field's development Included are alphabetically arranged entries for 108 individuals who have developed the field and 128 terms central to the discipline The first part of the book provides entries for leaders in

composition studies Each entry identifies the areas in which the scholar has contributed most influentially to the field and provides both a chronological overview of the person's contributions and a bibliography of representative works The second part includes entries for terms that are problematic both for newcomers and for those already familiar with the discipline The entries for the terms show how the disciplinary context has shaped the ways in which they have been used The entries also indicate how established thinkers in composition studies and other disciplines have explained or defined the terms provide examples of the terms in context and list scholars often associated with them An appendix includes entries for scholars from other disciplines who have contributed to the field

#### Digital Game Culture in Korea Florence M.

Chee, 2023-04-24 Digital Game Culture in Korea The Social at Play is a critical ethnographic investigation of media discourses surrounding online game addiction and the sociocultural roles fulfilled by games in everyday life Florence M Chee argues that the casting of online games as singularly problematic or addictive largely ignores the socially generative and at times pivotally important means of connection among games players and the communities they foster Through focusing on Korea's sociohistorical and technocultural context this work celebrates and recognizes the foundational role of Korean game culture in shaping global games and play Scholars of game studies communication and technoculture will find this book of particular interest

#### **Visual Representations and Interpretations**

Ray Paton, Irene Neilsen, 2012-12-06 The value of multi disciplinary research and the exchange of ideas and methods across traditional discipline boundaries are well recognised Indeed it could be justifiably argued that many of the advances in science and engineering take place because the ideas methods and the tools of thought from one discipline become re applied in others Sadly it is also the case that many subject areas develop specialised vocabularies and concepts and can consequently approach more general problems in fairly narrow subject specific ways Consequently barriers develop between disciplines that prevent the free flow of ideas and the collaborations that on Visual Representations could often bring success VRI 98 a workshop focused Interpretations was intended to break down such barriers The workshop was held in the Foresight Conference Centre which occupies part of the former Liverpool Royal Infirmary a Grade 2 listed building which has been recently restored The building combines a

majestic architecture with the latest in new conference facilities and technologies and thus provided a very suitable setting for a workshop aimed at bringing the Arts and the Sciences together of the workshop was to promote inter disciplinary awareness across The main aim a range of disciplines where visual representations and interpretations are exploited Contributions to the workshop were therefore invited from researchers who are actively investigating visual representations and interpretations artists architects biologists chemists clinicians cognitive scientists computer scientists educationalists engineers graphic designers linguists mathematicians philosophers physicists psychologists and social scientists

**Transforming Ethos** Rosanne Carlo, 2020-09-01 In Transforming Ethos Rosanne Carlo synthesizes philosophy rhetorical theory and composition theory to clarify the role of ethos and its potential for identification and pedagogy for writing studies Carlo renews focus on the ethos appeal and highlights its connection to materiality and place as a powerful instrument for writing and its teaching one that insists on the relational and multimodal aspects of writing and makes prominent its inherent ethical considerations and possibilities Through case studies of professional and student writings as well as narrative reflections Transforming Ethos imagines the ethos appeal as not only connected to style and voice but also a process of habituation related to practices of everyday interaction in places and with things Carlo addresses how ethos aids in creating identification transcending divisions between the self and other She shows that when writers tell their experiences they create and reveal the ethos appeal and this type of narrative multimodal writing is central to scholarship in rhetoric and composition as well as the teaching of writing In addition Carlo considers how composition is becoming compromised by professionalization particularly through the idea of transfer which is overtaking the critical work of self development with others that a writing classroom should encourage in college students Transforming Ethos cements ethos as an essential term for the modern practice and teaching of rhetoric and places it at the heart of writing studies This book will be significant for students and scholars in rhetoric and composition as well as those interested in higher education more broadly **Selected**

**Writings of Richard McKeon, Volume Two** Richard P. McKeon, 1998 Richard McKeon was a philosopher of extraordinary creativity who brought profoundly original ideas to bear on more standard ways of thinking and learning A classicist medievalist and revolutionary intellectual he fashioned an approach to philosophy as a plural conversation among varied traditions of thought epochs and civilizations This second volume of McKeon's selected works demonstrates his approach to inquiry and practice in culture education and the arts Together the writings in this book show how McKeon reinvented the ancient arts of rhetoric grammar logic and dialectic for the new circumstances of a global culture In essays on creation and criticism for instance rhetoric is distinguished from grammar and shown to be the master art of invention judgment and pluralistic interpretation Writings on themes of culture meanwhile explore the self invention of mankind as justification for the arts the development of the humanities and the organization of the sciences In the closing essays on education and philosophy McKeon considers the implications of his ideas for the future of the liberal arts and higher learning
