Professional Issues in Child and Youth Care Practice Kiaras Gharabaghi, 2013-09-13 This book provides an overview of the core professional issues in the field of child and youth care practice The author explores themes ranging from relationships and the exploration of Self to career building and field specific approaches to management The book is written from a pragmatic perspective and serves both to advance current thinking in the field about professional issues as well as to provide the student of child and youth care practice and practitioners with practical and accessible approaches to developing a strong and sustainable professional identity All of the themes in this book are explored within a context of ethical decision making and practice approaches informed by a commitment to children's rights and empowerment Throughout the

discussions concepts and themes are considered in relation to four specific lenses the power lens the diversity lens the language lens and the transitioning from theory to practice lens These lenses serve to ensure that the reader adopts a critical understanding of the professional issues in the field and is able to develop his or her own professional identity while mitigating the power and identity issues necessarily associated with being a practitioner in a helping profession This book was published as a special issue of Child and Youth Services Transforming Youth Serving Organizations to Support Healthy Youth Development Ross VeLure Roholt, Michael L. Baizerman, Sheetal Rana, Kathy Korum, 2013-10-24 This volume tells the story of major organizational change efforts at one municipal youth serving organization to better support healthy youth development system wide Presenting the viewpoints of young people frontline staff supervisors managers and the director it reviews how the organization developed and transformed Each article then describes the different strategies and tactics used to support organizational transformation Learn How a youth work professional development strategy ended up as an organizational development and change strategy How the partnership with a university expanded to include community based research and evaluation to support youth program development and improvement within the organization How youth advice structures can support high quality youth programming and by extension improvements in organizational supports for quality youth programs How partnerships with other organizations supported ongoing adaptation of the organization to better address youth needs This is the 139th volume of New Directions for Youth Development the Jossey Bass quarterly report series dedicated to bringing together everyone concerned with helping young people including scholars practitioners and people from different disciplines and professions *The Changing Landscape of Youth Work* Kristen M. Pozzoboni, Ben Kirshner, 2016-07-01 The purpose of this book is to compile and publicize the best current thinking about training and professional development for youth workers School age youth spend far more of their time outside of school than inside of school The United States boasts a rich and vibrant ecosystem of Out of School Time programs and funders ranging from grassroots neighborhood centers to national Boys and Girls Clubs The research community too has produced some scientific consensus about defining features of high quality youth development settings and the importance of after school and informal programs for youth But we know far less about the people who provide support guidance and mentoring to youth in these settings What do youth workers do What kinds of training certification and job security do they have Unlike K 12 classroom teaching a profession with longstanding if contested legitimacy and recognition youth work does not call forth familiar imagery or cultural narratives Ask someone what a youth worker does and they are just as likely to think you are talking about a young person working at her first job as they are to think you mean a young adult who works with youth This absence of shared archetypes or mental models is matched by a shortage of policies or professional associations that clearly define youth work and assume responsibility for training and preparation This is a problem because the functions performed by youth workers outside of school are critical for positive youth development especially in our current context governed by

widening income inequality The US has seen a decline in social mobility and an increase in income inequality and racial segregation This places a greater premium on the role of OST programs in supporting access and equity to learning opportunities for children particularly for those growing up in neighborhoods of concentrated poverty Fortunately in the past decade there has been an emergence of research and policy arguments about the importance of naming defining and attending to the profession of youth work A report released in 2013 by the DC Children and Youth Investment Corporation suggests employment opportunities for youth workers are growing faster than the national average and as the workforce increases so will efforts to professionalize it through specialized training and credentials Our purpose in this volume is to build on that momentum by bringing together the best scholarship and policy ideas coming from in and outside of higher education about conceptions of youth work and optimal types of preparation and professional development
