Professionalism Under Stress Lessons For Professionalism Stress And Gunfighting In Military And Civilian Life:

Professionalism Under Stress David Hilton Dyson, C. H. Dunn, 2004 **Assembly** West Point Association of Graduates (Organization), 2003 *Rethinking Military Professionalism for the Changing Armed Forces* Krystal K. Hachey, Tamir Libel, Waylon H. Dean, 2020-06-09 This book will make a first contribution to identify the gaps in current practices and provide alternative mechanisms to conceptualize professionalism that is reflective of changing requirements culture and demographics of the contemporary military force The military profession promotes the development sustainment and embodiment of ethos which guides conduct across operational contexts from times of national and international crises and security challenges e g war natural disasters and peace support operations It is imperative for military leaders to understand how ethos and doctrine shape professional frameworks which guide the conduct of military members **Beyond the Battlefield** Sam Charles Sarkesian, 1981 *Beyond the Battlefield The New Military Professionalism* presents the nature and character of military professionalism This book describes the increasing tendency for the military to view professionalism mainly in terms of military skills Organized into five parts encompassing 13 chapters this book begins with an overview of the various concepts and definitions of military professionalism This text then reexamines military professionalism in the post Vietnam era with regard to perspectives on value convergence and empathy between military and society Other chapters consider the changes in Once Again, the Challenge to the U.S. Army During A Defense Reduction: To Remain A Military Profession (Enlarged Edition) Don M. Snider, Strategic Studies Institute, 2013-05-21 As with the post Cold War downsizing during the Clinton administration in the late 1990s one critical challenge for the U S Army centers on the qualitative institutional character of the Army after the reductions will it manifest the essential characteristics and behavior of a military profession with soldiers and civilians who see themselves sacrificially called to vocation and its service to country within a motivating professional culture that sustains a meritocratic ethic or will the Army s character be more like any other government occupation in which its members view themselves as filing a job motivated mostly by the extrinsic factors of pay location and work hours In mid 2010 the Secretary of the Army and the Chief of Staff directed the Commanding General Training and Doctrine Command then General Martin Dempsey to undertake a broad campaign of learning involving the entire Department The intent was to think through just it means for the Army to be a profession **Occupational Stress and Well-Being in Military Contexts** Peter D. Harms, Pamela L. Perrewé, 2018-08-22 This volume examines the causes and consequences of stress in the military focussing on how stress and well being shape the experiences of military personnel both in and out of the combat zone Army Professionalism, The Military Ethic, and Officership in the 21st Century, 1999 This paper jointly sponsored by SSI and CPME is intended to be the first of many whose purpose is to promote scholarship on Officership and the Professional Military Ethic as well as enhance the discussion of military professionalism within the Army and sister services **Performance Under Stress** James Szalma, Peter A Hancock, 2018-10-09 The world is a dangerous

place and recent events have served to make it less safe There are many arenas of conflict and even combat across the world Such situations are the quintessential expression of stress you stand in imminent danger and live with the knowledge that you may be attacked injured or even killed at any moment How do people perform under these conditions How do they keep a heightened level of vigilance when nothing may happen in their immediate location for weeks or even months What happens when the bullets actually start flying How is it you distinguish friend from foe and each from innocent bystanders when in immediate peril of your life Can we design technology to help people make good decisions in these ultimately hazardous situations To what degree does your membership in a team act to dissipate these particular effects Can we generate sufficiently stressful field exercises to simulate these conditions and can we train and or select those most able to withstand such adverse conditions How will the next generation of servicemen deal with these inherent problems These are the sorts of questions that Performance Under Stress addresses This book is derived largely from a multiple year multiple university initiative MURI on stress and soldier performance on the modern electronic battlefield It involved leading researchers from many institutions who have brought their individual expertise to bear on these crucial contemporary concerns United by a common research framework these groups attacked the issue from different methodological and conceptual approaches ranging from traditional laboratory modeling and experimentation to realistic simulations from involved field exercises to personal experiences of actual combat conditions The insights generated have been distilled and presented as a benchmark of current understanding and provide future directions for research in this arena Although this work focuses on soldier stress and soldier performance the principles that are derived extend well beyond this single application Their findings can be applied to people facing the demands of the business world or research as much as to those who meet life or death situations such as homeland security first responders and law enforcement personnel [Online mindful stress management for the military](#) Anthony Sorgi,2016 **Steeling the Mind** Todd C. Helmus,Russell W. Glenn,2005-06-15 Combat stress casualties are not necessarily higher in city operations than operations on other types of terrain Commanders and NCOs need to have the skills to treat and prevent stress casualties and understand their implications for urban operations The authors review the known precipitants of combat stress reaction its battlefield treatment and the preventive steps commanders can take to limit its extent and severity **Closing the Candor Chasm** Paul Paolozzi,2013 Candor stands as the keystone element in creating the foundation of trust in the Army yet the topic is muted Stewards of the Army Profession build trust through authentic communication in education training and modeled in application Candor was previously included in Army Doctrine yet nearly no mention of it currently exists in professional military education and dialogue Through personal experiences and review of literature two examples the demands placed on the Army Reserve Components and a review of the Army s counseling and evaluation environment serve as illustrations where candor requires revitalization Candor must be reinforced to be valued or it remains peripheral serving as a lesson that

is equally damaging to individual character as is it institutionally to the Army *Stress and Performance* Jennifer Kavanagh, 2005-01-01 There are many stressors associated with military life particularly with deployments and it is important to understand how such stressors affect individual functioning and performance This report reviews literature on how stress affects performance generally and applies the most relevant findings to military operations and training **Army Professionalism, the Military Ethic, and Officership in the 21st Century** , *The Use of Stress Inoculation Training with a Military Population* David A. Crago, 1995 *Once again, the challenge to the U.S. Army during a defense reduction : to remain a military profession* Don M. Snider, 2012 As with the post Cold War downsizing during the Clinton administration in the late 1990s one critical challenge for the U S Army centers on the qualitative institutional character of the Army after the reductions will the U S Army manifest the essential characteristics and behavior of a military profession with Soldiers and civilians who see themselves sacrificially called to a vocation of service to country within a motivating professional culture that sustains a meritocratic ethic or will the Army s character be more like any other government occupation in which its members view themselves as filing a job motivated mostly by the extrinsic factors of pay location and work hours In mid 2010 the Secretary of the Army and the Chief of Staff directed the Commanding General Training and Doctrine Command then General Martin Dempsey to undertake a broad campaign of learning involving the entire Department The intent was to think through what it means for the Army to be a profession of arms and for its Soldiers and civilians to be professionals as the Army largely returns stateside after a decade of war and then quickly transitions to the new era of Defense reductions Several new conceptions of the Army as a military profession have been produced along with numerous initiatives that are currently being staffed to strengthen the professional character of the Army as it simultaneously recovers from a decade of war and transitions through reductions in force They form the descriptive content of this monograph *Alleviating Stress of the Soldier and Civilian* Sushil Sharma, 2015 Initially the author intended to write a book entitled *Alleviating Stress of the Soldier* However after going through the extensive literature and recalling his childhood memories of war times he decided to write *Alleviating Stress of the Soldier and Civilian* Sufficient historical evidence indicates that both soldiers as well as civilians have faced the war and tolerated its deleterious consequences simultaneously However a soldier and his her family face unexpected and unpredictable stresses requiring physical and mental fitness character dedication commitment communication mutual understanding adjustment discipline tolerance patience isolation resilience hyper vigilance minimum vulnerability sanitation nutritional stress sleep deprivation patriotism and sacrifice This book i confers basic knowledge of diversified stresses ii prepares readers to face stresses with patience endurance and resilience iii and presents novel strategies of alleviating physical psychological and physiological stresses of war wounded soldiers prisoners of war POWs and veterans The book guides the soldiers of the Army Navy Air Force SEALs sea air and land POWs and civilians to handle their professional and family stresses without having to suffer from Combat Stress Reaction CSR or Post Traumatic Stress

Disorder PTSD before during and or after the war or conflict It also guides those who experienced early childhood neglect physical and or sexual abuse and other stresses of diversified origin It is envisaged that this timely released book will be particularly of great interest to the soldier s family members their spouses children parents relatives and friends because of its motivational messages immediate demand and versatility The author hopes that this unique manuscript will encourage motivate excite and guide young soldiers civilians and their families to tackle stresses with courage patience and resilience to successfully accomplish their trainings adventurous professional career and married life

Healthcare Studies and Clinical Investigation Activity,1985 Professionalism in the Armed Forces David B. Novy,2017 Professionalism is a term used so frequently and in so many contexts that it is often misapplied For this reason this paper reintroduces the concept of military professionalism by drawing upon Samuel Huntington s original description of military professionalism and applying it against a case study of a prominent and in some interpretations extremely effective senior military officer SS Kommandant Rudolph H ss In this analysis a scenario develops of a disparity between personal perceptions of acting professionally and executing duties associated with the status conferred by membership in the military profession The crucial aspect of military professionalism lacking in the H ss model is the social responsibility imposed by and in the service of the society the military serves A potentially problematic scenario develops with the definition of which society is referenced the values or standards to be upheld and the motivation of the military professional to meet those standards This paper will demonstrate professionalism is more than the execution of violence on behalf of a state acquiescence to civilian authority and service in spite of self interest Military professionalism requires individual responsibility and accountability for moral agency dedication to duty and commitment to the greater good of the society the military serves For the military professional the global community of which the nation state is a participating member informs the society s interests to be served Abstract *Proceedings Fourth Users' Workshop on Combat Stress* A.
