Profile Of Primitive Culture:

A Profile of Primitive Culture Elman R. Service, 1958 **A Profile of Primitive Culture. Profiles in Ethnology. A Revision of A Profile of Primitive Culture. With Illustrations.** Elman Rogers Service, 1963 Profiles in Cultural Evolution A. Terry Rambo, Kathleen Gillogly, 1991-01-01 Presenting diverse viewpoints and topics this collection includes the following sections Part I presents a background on the study of cultural evolution Part II deals with the evolution of complex societies in the tropics of South America Part III discusses stage sequences and directionality in cultural evolution Part IV examines the role of prime movers in cultural evolution Part V discusses diversity and change **Profile in Ethnology** Elman Rogers Service, 1963 *History, Evolution and the Concept of Culture* Alexander Lesser, 1985-06-30 This representative selection of Lesser's work is designed to make the range of his writings accessible to a broad audience His work is of particular interest to present day readers for its advocacy of an historical evolutionary perspective in anthropology

The Norton History of the Human Sciences Roger Smith, 1997 A comprehensive history of the human sciences psychology sociology anthropology economics and political science from their precursors in early human culture to the present This erudite yet accessible volume in Norton's highly praised History of Science series tracks the long and circuitous path by which human beings came to see themselves and their societies as scientific subjects like any other Beginning with the Renaissance's rediscovery of Greek psychology political philosophy and ethics Roger Smith recounts how the human sciences gradually organized themselves around a scientific conception of psychology and how this trend has continued to the present day in a circle of interactions between science and ordinary life in which the human sciences have influenced and been influenced by popular culture The Routledge Dictionary of Anthropologists Gerald Gaillard, 2004-06-01 This detailed and comprehensive guide provides biographical information on the most influential and significant figures in world anthropology from the birth of the discipline in the nineteenth century to the present day Each of the fifteen chapters focuses on a national tradition or school of thought outlining its central features and placing the anthropologists within their intellectual contexts Fully indexed and cross referenced The Routledge Dictionary of Anthropologists will prove indispensable for students of anthropology **Making Magic** Randall Styers, 2004 Randall Styers seeks to account for the vitality of scholarly discourse purporting to define and explain magic despite its failure to do just that He argues that it can best be explained in light of the European and Euro American drive to establish and secure their own identity as normative Ecology and Biogeography in India M.S. Mani, 2012-12-06 This book describes the outstanding features of the ecology and biogeography of the Indian region comprising former British India Nepal Bhutan Ceylon and Burma It summarizes the results of nearly four decades studies and field explorations and discussions with students on the distribution of plants and animals practically throughout this vast area and on the underlying factors A number of specialists in geology meteorology botany zoology ecology and anthropology have also actively collaborated with me and have contributed valuable chapters in their respective fields India

has an exceptionally rich and highly diversified flora and fauna exhibiting complex composition character and affinities. Although the fauna of the Indian region as a whole is less completely known than its flora, we are nevertheless fairly well acquainted with at least the salient features of its faunal characters to enable us to present a meaningful discussion on some of the outstanding peculiarities of the biogeography of India. A general synthesis of the available though much scattered information should prove useful to future students of biogeography throughout the world.

Acculturative Stress and Change in Nigerian Society Ezekiel Ette, 2019-11-20. *Acculturative Stress and Change in Nigerian Society* argues that in the aftermath of European domination and colonial rule, African struggle and the relationships between social groups in Africa can be traced to the legacy of colonialism as well as events in the post colonial struggle of domination by the elites. This book locates ethnic conflict in Nigeria not only in the colonial history but in the attitude and practices of the political elites. Using the Annang of Nigeria as a case study, the book traces their history and struggle for ethnic identity and recognition from pre colonial times to the post civil war period. It further argues that colonialism destroyed the Annang identity but the struggle for power following colonialism has also raised other problems. What happened to the Annang represents an example that was repeated all over Africa. The author maintains that what is happening among the Annang is symptomatic of the African struggle. This book moves beyond the usual discussion of the effects of colonialism in the continent which views the modern state as a monolithic whole. It presents as a real life example of the effects of colonialism and power relationships in the post independent continent and therefore a window through which to see the African problems in modern times. The African elites who took power from the colonialists simply continued policies that did not promote growth and development. It further argues that specific actions and policies in the pre and post colonial period contributed to where the continent is today.

The Ancient Hawaiian State Robert J. Hommon, 2013-04-25. The well known list of cradles of civilization primary states from which all modern nation states ultimately derive has traditionally been limited to Egypt, Mesopotamia, the Indus Valley, China, Mesoamerica, and Andean South America. However, by drawing on archaeological and ethnohistorical sources, Robert J. Hommon demonstrates that Polynesia with primary states in both Hawaii and Tonga should be added to that list. The Ancient Hawaiian State offers a history of the ancient Hawaiians' transformation of their Polynesian chiefdoms into primary state societies. The emergence of primary states is one of the most revolutionary transformations in human history, and Hawaii's metamorphosis was so profound that in some ways the contact era Hawaiian states bear a closer resemblance to our world than to that of their closely related Eastern Polynesian contemporaries. In contrast to the other six regions in which states emerged in the distant proto or pre literate past, the transformation of Hawaiian states is documented in an extensive body of oral traditions preserved in written form, a rich literature of early post contact eyewitness accounts by participants and Western visitors as well as an extensive archaeological record. Tracing the roots and emergence of the Hawaiian states, this innovative study offers a detailed model that will advance the analysis of Polynesian political development and shed light on
