Profile Of The Nation:

You and Your Profile Hans-Georg Moeller, Paul J. D'Ambrosio, 2021-05-25 More and more we present ourselves and encounter others through profiles A profile shows us not as we are seen directly but how we are perceived by a broader public As we observe how others observe us we calibrate our self presentation accordingly Profile based identity is evident everywhere from pop culture to politics marketing to morality But all too often critics simply denounce this alleged superficiality in defense of some supposedly pure ideal of authentic or sincere expression This book argues that the profile marks an epochal shift in our concept of identity and demonstrates why that matters You and Your Profile blends social theory philosophy and cultural critique to unfold an exploration of the way we have come to experience the world Instead of polemicizing against the profile Hans Georg Moeller and Paul J D Ambrosio outline how it works how we readily apply it in our daily lives and how it shapes our values personally economically and ethically They develop a practical vocabulary of life in the digital age Informed by the Daoist tradition they suggest strategies for handling the pressure of social media by distancing oneself from one's public face A deft and wide ranging consideration of our era's identity crisis this book provides vital clues on how to stay sane in a time of proliferating profiles

Climate Resilience for an Aging Nation Danielle Arigoni, 2023-10-23 Climate change is having an immediate and sometimes life threatening impact especially for older adults generally speaking people 65 or older Older adults often face mobility cognitive and resource challenges which contribute to a disproportionate number of deaths in the face of major disasters But some challenges are less visible Consider the grandparent who no longer can stand and wait at the bus stop because of the heat or the retiree who lives in a home with black mold due to chronic flooding that she can't afford to remediate or leave because of her limited fixed income Our population is aging by 2034 the US will have more people over 65 than under 18 Despite the evidence that climate change is severely impacting older adults and the reality that communities will be confronted with more frequent and more severe disasters we're not prepared to address the needs of older adults and other vulnerable populations in the face of a changing climate In Climate Resilience for an Aging Nation community resilience and housing expert Danielle Arigoni argues that we cannot achieve true resilience until communities adopt interventions that work to meet the needs of their oldest residents She explains that when we plan for those most impacted by climate and for those with the greatest obstacles to opportunity and well being we improve conditions for all Arigoni explores how to integrate age friendly resilience into community planning and disaster preparedness efforts through new planning approaches including an age friendly process and a planning framework dedicated to inclusive disaster recovery to create communities that serve the needs of older adults better not only during disasters but for all the days in between Examples are woven throughout the book including case studies of age friendly resilience in action from New York State Portland Oregon and Multnomah County and New Orleans Climate Resilience for an Aging Nation will help professionals and concerned citizens understand how to best plan for both the aging of our population and the climate changes underway so that we can create safer more livable communities for all

Nucleus and Nation Robert S. Anderson,2010-05-15 In 1974 India joined the elite roster of nuclear world powers when it exploded its first nuclear bomb But the technological progress that facilitated that feat was set in motion many decades before as India sought both independence from the British and respect from the larger world Over the course of the twentieth century India metamorphosed from a marginal place to a serious hub of technological and scientific innovation It is this tale of transformation that Robert S Anderson recounts in *Nucleus and Nation* Tracing the long institutional and individual preparations for India's first nuclear test and its consequences Anderson begins with the careers of India's renowned scientists Meghnad Saha Shanti Bhatnagar Homi Bhabha and their patron Jawaharlal Nehru in the first half of the twentieth century before focusing on the evolution of the large and complex scientific community especially Vikram Sarabhi in the later part of the era By contextualizing Indian debates over nuclear power within the larger conversation about modernization and industrialization Anderson hones in on the thorny issue of the integration of science into the framework and self-reliant ideals of Indian nationalism In this way *Nucleus and Nation* is more than a history of nuclear science and engineering and the Indian Atomic Energy Commission it is a unique perspective on the history of Indian nationhood and the politics of its scientific community
