Interactive Political Leadership Eva Sørensen, 2020-01-09 Building on recent theories of interactive governance and political leadership Interactive Political Leadership develops a concept of interactive political leadership and a theoretical framework for studying the role of elected politicians in the age of governance The purpose of the theoretical framework is to inspire and guide empirical research into how elected politicians perform political leadership in a society where citizens and other stakeholders play an active role in making and implementing political decisions and what barriers challenges and dilemmas they encounter in relation to the performance of interactive political leadership The research framework draws extensively on recent theories of interactive governance and political leadership and other new developments in political science and public administration research Moreover it finds inspiration in current tendencies and embryonic examples of interactive political leadership performed by elected politicians operating at different levels of governance in Western liberal democracies The basic assumption is that political legitimacy is essential for the survival of a political system and that interactive political leadership stands out as a promising way of securing what political scientists denote as input throughput output and outcome legitimacy in the age of governance Hence interactive political leadership aims to establish a bridge between representative democracy and emergent forms of political participation to promote political learning and accountability to strengthen the political entrepreneurship of elected politicians and to advance the political system s implementation capacity through resource mobilization The book develops 20 propositions that sets the agenda for a new and much needed field of empirical research into political leadership in the age of governance

Global Political Leadership Małgorzata Zachara-Szymańska, 2022-10-28 Global Political Leadership explores contemporary shifts in leadership and the related leadership crisis in the global world Globalization is now perceived as a threatening and hostile force with many of its advocates and political supporters turning away from it but its processes cannot be reversed New powers emerge old ones re emerge and uncertainty about the future global order is increasing This book tells the inside stories of global power games and asks important questions about the leadership crisis in the western world The author provides an interpretative framework for contemporary shifts within the western political sphere based on the concept of global leadership This framework presents the nature of the transformation caused by global processes as part of which force and coercion have ceased to be the main modus operandi of the international realm The issue of global political leadership has often been neglected in international relations literature while being widely exploited by managerial and organizational studies However all social organizations have gone global within the last several decades they are more interconnected and more dependent on global processes so the question of effective leadership strategies matching these new realities is highly necessary even or especially at a time when globalization is no longer seen as a leading political programme This book will be of great interest to students and scholars of global affairs politics and international relations leadership and development and diplomatic studies The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Audacious Reforms Merilee S. Grindle, 2003-05-27 Audacious Reforms examines the creation of new political institutions in three Latin American countries direct elections for governors and mayors in Venezuela radical municipalization in Bolivia and direct election of the mayor of Buenos Aires in Argentina Diverging from the usual incremental processes of political change these cases marked a significant departure from traditional centralized governments Such audacious reforms explains Merilee S Grindle reinvent the ways in which public problems are manifested and resolved the ways in which political actors calculate the costs and benefits of their activities and the ways in which social groups relate to the political process Grindle considers three central questions Why would rational politicians choose to give up power What accounts for the selection of some institutions rather than others And how does the introduction of new institutions alter the nature of political actions The case studies of Venezuela Bolivia and Argentina demonstrate that institutional invention must be understood from theoretical perspectives that stretch beyond immediate concerns about electoral gains and political support building Broader theoretical perspectives on the definition of nation and state the nature of political contests the legitimacy of political systems and the role of elites all must be considered While past conflicts are

not erased by reforms in the new order there is often greater potential for more responsible accountable and democratic government
