Profits From Power Readings In Protection Rent And Violence Controlling Enterprises:

Profits from Power Frederick C. Lane, 1979-06-30 Of the many sources of power these essays deal with only one physical violence and the threat of violence exerted by some men over others Thus Frederic C Lane introduces his essays on profits and protection rent or the cost of protecting economic activities from the disruption of violence With the theme of protection rent Lane analyzes both particular cases such as the development of trade in the West Indies and the prosperity of sixteenth century Venice and general questions such as the role of capitalism in economic development and the economic relationships of the West to the rest of the world In prose that is always graceful and clear Lane presents his thoughts from many years of study that will be stimulating to sociologists and anthropologists as well as to economic historians

Re-forming the State Hector E. Schamis, 2002 Compares the processes leading to market reform experiments and its political effects in Latin America and Europe

The Arabian Seas: The Indian Ocean World of the Seventeenth Century Rene J. Barendse, 2016-07-08 The Arabian Seas is a magisterial work on the world political economy trade war power that explores the intersect of the worlds of Islam including South and Southeast Asia the Middle East and East Africa and the European world economy particularly the seafaring Portuguese Dutch and British on the eve of the modern world system It is likely to become a classic in its field and one of the pillars of the emerging literature in recent years that has begun to recast our understanding of the early modern history of Asia and the world economy underlining the early and long predominance of Asia in the world economy and showing the long and deep ties between European and Asian economic and military interactions This work centrally addresses current debates on the nature of the early modern world system and the relative strengths of East and West There are no competitors for this book but it may be compared with Braudel s masterful studies of the Mediterranean in the sense that it does for the Arabian Seas Indian Ocean World spanning South Asia the Middle East and the East African Coast and beyond what Braudel did for the Mediterranean

Corporate Warriors P. W. Singer, 2011-06-16 Some have claimed that War is too important to be left to the generals but P W Singer asks What about the business executives Breaking out of the guns for hire mold of traditional mercenaries corporations now sell skills and services that until recently only state militaries possessed Their products range from trained commando teams to strategic advice from generals This new Privatized Military Industry encompasses hundreds of companies thousands of employees and billions of dollars in revenue Whether as proxies or suppliers such firms have participated in wars in Africa Asia the Balkans and Latin America More recently they have become a key element in U S military operations Private corporations working for profit now sway the course of national and international conflict but the consequences have been little explored In this book Singer provides the first account of the military services industry and its broader implications *Corporate Warriors* includes a description of how the business works as well as portraits of each of the basic types of companies military providers that offer troops for tactical operations military consultants that supply expert advice and training and military support companies

that sell logistics intelligence and engineering In an updated edition of P W Singer s classic account of the military services industry and its broader implications the author describes the continuing importance of that industry in the Iraq War This conflict has amply borne out Singer s argument that the privatization of warfare allows startling new capabilities and efficiencies in the ways that war is carried out At the same time however Singer finds that the introduction of the profit motive onto the battlefield raises troubling questions for democracy for ethics for management for human rights and for national security

The Waning of Major War Raimo Vayrynen,2013-10-31 This book is a systematic effort by leading international scholars to map the trends in major power warfare and explore whether it is waxing or waning The main point of departure is that major power war as a historical institution is in decline This does not mean though that wars between states are in general disappearing While there is some convergence in the conclusions by individual authors they are by no means unanimous about the trend The articles explore different causes and correlates of the declining trend in major power warfare including the impact of the international structure nuclear weapons international law multilateral institutions sovereignty and value changes

Seapower States Andrew Lambert,2018-11-27 A fascinating geopolitical chronicle A superb survey of the perennial opportunities and risks in what Herman Melville called the watery part of the world The Wall Street Journal In this volume one of the most eminent historians of our age investigates the extraordinary success of five small maritime states Andrew Lambert author of *The Challenge Britain Against America in the Naval War of 1812* winner of the prestigious Anderson Medal turns his attention to Athens Carthage Venice the Dutch Republic and Britain examining how their identities as seapowers informed their actions and enabled them to achieve success disproportionate to their size Lambert demonstrates how creating maritime identities made these states more dynamic open and inclusive than their lumbering continental rivals Only when they forgot this aspect of their identity did these nations begin to decline Recognizing that the United States and China are modern naval powers rather than seapowers is essential to understanding current affairs as well as the long term trends in world history This volume is a highly original big think analysis of five states whose success and eventual failure is a subject of enduring interest by a scholar at the top of his game An intriguing series of stories of communities thinking seriously about how to stand their own ground when outpowered how to do so in ways that are consistent with their values and sometimes how to negotiate the descent from being a great power when the cards just aren t in their favor any more These are timely questions Times Higher Education Supplement Lambert is without a doubt the most insightful naval historian writing today The Times

Dangerous Commerce Virginia Haufler,2019-06-07 As businesses search increasingly for opportunities beyond their national borders they face the risk that political change in other countries will jeopardize their efforts Anything from minor shifts in regulations to sudden revolutions can threaten business investment trade and credit Virginia Haufler shows that a crucial factor in the expansion of global markets has been the private sector s creation of a sophisticated insurance industry to redistribute the risks entailed in foreign commerce a

privately constructed safety net for international transactions Haufler believes that the network of relationships and institutions established by the insurers constituted a privately led regime for the management of international risk She analyzes political risks insurance during three periods of substantial uncertainty the era from the turn of the century to the beginning of World War I when British global power began to wane the interwar years leading up to the collapse of world trade and a second world war and the debt crisis decade of the 1980s Public and private involvement in supplying insurance against international risks has varied depending on demand the availability of resources and the norms of what can be insured As the scale and complexity of risks have expanded Haufler suggests responsibility has shifted from commercial insurers first to the state and now to multilateral institutions Medieval Urban Identity Flocel Sabaté,2015-09-04 The increasing prominence of urban life during the Middle Ages is undoubtedly one of the more transcendental and multi faceted aspects of this era having an effect on rules and laws hygiene and economic organisation This book brings together contributions from a wide range of scholars who adopt a new approach to medieval urban life using health the economy and regulations and laws as frames of reference for gaining a greater understanding of this historical period Through these vectors interesting insights are provided into medieval housing cures for diseases the work of artisans and merchants and the relationship between the town and the wider region in which it was located *Religion and Trade* Francesca Trivellato,Leor Halevi,Catia Antunes,2014-08-20 Although trade connects distant people and regions bringing cultures closer together through the exchange of material goods and ideas it has not always led to unity and harmony From the era of the Crusades to the dawn of colonialism exploitation and violence characterized many trading ventures which required vessels and convoys to overcome tremendous technological obstacles and merchants to grapple with strange customs and manners in a foreign environment Yet despite all odds experienced traders and licensed brokers as well as ordinary people travelers pilgrims missionaries and interlopers across the globe concocted ways of bartering securing credit and establishing relationships with people who did not speak their language wore different garb and worshipped other gods *Religion and Trade Cross Cultural Exchanges in World History 1000 1900* focuses on trade across religious boundaries around the Mediterranean Sea and the Atlantic and Indian Oceans during the second millennium Written by an international team of scholars the essays in this volume examine a wide range of commercial exchanges from first encounters between strangers from different continents to everyday transactions between merchants who lived in the same city yet belonged to diverse groups In order to broach the intriguing yet surprisingly neglected subject of how the relationship between trade and religion developed historically the authors consider a number of interrelated questions When and where was religion invoked explicitly as part of commercial policies How did religious norms affect the everyday conduct of trade Why did economic imperatives political goals and legal institutions help sustain commercial exchanges across religious barriers in different times and places When did trade between religious groups give way to more tolerant views of the other and when by contrast

did it coexist with hostile images of those decried as infidels Exploring captivating examples from across the world and spanning the course of the second millennium this groundbreaking volume sheds light on the political economic and juridical underpinnings of cross cultural trade as it emerged or developed at various times and places and reflects on the cultural and religious significance of the passage of strange persons and exotic objects across the many frontiers that separated humankind in medieval and early modern times

Diverging Paths? ,2014-09-04 Diverging Paths investigates an important question to which the answers must be very complex why did certain sorts of institutionalisation and institutional continuity characterise government and society in Christendom by the later Middle Ages but not the Islamic world whereas the reverse end point might have been predicted from the early medieval situation This core question lies within classic historiographical debates to which the essays in the volume written by leading medievalists make significant contributions The papers drawing on a wide range of evidence and methodologies span the middle ages chronologically and geographically At the same time the core question relates to matters of strong contemporary interest notably the perceived characteristics of power exercised within Islamic Middle Eastern regimes Contributors are Stuart Airlie Gadi Algazi Sandro Carocci Simone Collavini Emanuele Conte Nadia El Cheikh Maribel Fierro John Hudson Caroline Humfress Michel Kaplan Hugh Kennedy Simon MacLean Eduardo Manzano Susana Naroztky Annliese Nef Vivien Prigent Ana Rodriguez Magnus Ryan and Bernard Stolte

The Making of New World Slavery Robin Blackburn,2010-08-02 The Making of New World Slavery argues that independent commerce geared to burgeoning consumer markets was the driving force behind the rise of plantation slavery The baroque state sought successfully to feed upon this commerce and with markedly less success to regulate slavery and racial relations To illustrate this thesis Blackburn examines the deployment of slaves in the colonial possessions of the Portuguese the Spanish the Dutch the English and the French Plantation slavery is shown to have emerged from the impulses of civil society not from the strategies of individual states Robin Blackburn argues that the organization of slave plantations placed the West on a destructive path to modernity and that greatly preferable alternatives were both proposed and rejected Finally he shows that the surge of Atlantic trade predicated on the murderous toil of the plantations made a decisive contribution to both the Industrial Revolution and the rise of the West

Bringing the People Back In Knut Dørum,Mats Hallenberg,Kimmo Katajala,2021-03-17 The formation of states in early modern Europe has long been an important topic for historical analysis Traditionally the political and military struggles of kings and rulers were the favoured object of study for academic historians This book highlights new historical research from Europe's northern frontier bringing the people back into the discussion of state politics presenting alternative views of political and social relations in the Nordic countries before industrialisation The early modern period was a time that witnessed initiatives from people from many groups formally excluded from political influence operating outside the structures of central government and this book returns to the subject of contentious politics and state building from below

Chaos and Governance in the Modern World System Giovanni

Arrighi,1999 In a period of dramatic transformation and upheaval as we wonder what the future holds this book reminds us that the world has undergone enormous changes before and that an understanding of those changes may tell us something about our own turbulent time The authors look to two earlier periods that resemble the present in key respects the transition from Dutch to British world hegemony in the eighteenth century and the transition from British to U S world hegemony in the late nineteenth and early twentieth centuries In each case a system wide expansion culminated in crisis and systemic chaos eventually a new hegemonic power reorganized the system to solve the problems and contradictions that underlay the chaos The authors find recurrent characteristics in these transitions such as the resurgence of finance capital and the intensification of interstate rivalries and social conflict They also recognize however how the present transition differs from the previous patterns Among the anomalies are the proliferation of transnational organizations and communities increased social conflict in driving systemic change a geographical split between military and financial powers and a shift in the processes of capital accumulation away from the West Chaos and Governance in the Modern World System addresses controversies affecting a range of fields political economic social and cultural concerned with global change Though written from a world systems perspective it emphasizes the instability and adaptability of world capitalism and the role played by hegemonic states in periodically reorganizing the system

State, Economy and the Great Divergence Peer

Vries,2015-02-26 State Economy and the Great Divergence provides a new analysis of what has become the central debate in global economic history the great divergence between European and Asian growth Focusing on early modern China and Western Europe in particular Great Britain this book offers a new level of detail on comparative state formation that has wide reaching implications for European Eurasian and global history Beginning with an overview of the historiography Peer Vries goes on to extend and develop the debate critically engaging with the huge volume of literature published on the topic to date Incorporating recent insights he offers a compelling alternative to the claims to East West equivalence or Asian superiority which have come to dominate discourse surrounding this issue This is a vital update to a key issue in global economic history and as such is essential reading for students and scholars interested in keeping up to speed with the on going debates

Marxism, Modernity and Postcolonial Studies Crystal Bartolovich,Neil Lazarus,2002-07-11 At a time

when even much of the political left seems to believe that transnational capitalism is here to stay Marxism Modernity and Postcolonial Studies refuses to accept the inevitability of the so called New World Order By giving substantial attention to topics such as globalisation racism and modernity it provides a specifically Marxist intervention into postcolonial and cultural studies An international team of contributors locate a common ground of issues engaging Marxist and postcolonial critics alike Arguing that Marxism is not the inflexible monolithic irrelevance some critics assume it to be this collection aims to open avenues of debate especially on the crucial concept of modernity which have been closed off by the widespread neglect of Marxist analysis in postcolonial studies Politically focused at times polemical and always provocative this book is a major

contribution to contemporary debates on literary theory cultural studies and the definition of postcolonial studies

The Size of Nations Alberto Alesina, Enrico Spolaore, 2005-01-14 The authors of this timely and provocative book use the tools of economic analysis to examine the formation and change of political borders They argue that while these issues have always been at the core of historical analysis international economists have tended to regard the size of a country as exogenous or no more subject to explanation than the location of a mountain range or the course of a river Alesina and Spolaore consider a country's borders to be subject to the same analysis as any other man made institution In *The Size of Nations* they argue that the optimal size of a country is determined by a cost benefit trade off between the benefits of size and the costs of heterogeneity In a large country per capita costs may be low but the heterogeneous preferences of a large population make it hard to deliver services and formulate policy Smaller countries may find it easier to respond to citizen preferences in a democratic way Alesina and Spolaore substantiate their analysis with simple analytical models that show how the patterns of globalization international conflict and democratization of the last two hundred years can explain patterns of state formation Their aim is not only normative but also positive that is not only to compute the optimal size of a state in theory but also to explain the phenomenon of country size in reality They argue that the complexity of real world conditions does not preclude a systematic analysis and that such an analysis synthesizing economics political science and history can help us understand real world events

Money and Banking in Medieval and Renaissance Venice Frederic Chapin Lane, Reinhold C.

Mueller, 2020-03-24 Originally published in 1985 Frederic C Lane and Reinhold C Mueller in the first volume of *Money and Banking in Medieval and Renaissance Venice* discuss Venice's economic achievement in terms of the complex system the city's inhabitants developed to manage moneys of account and coins Money merchants of Venice developed a system whereby a premium attached to moneys of account acted as a stabilizing force and allowed merchants to engage in long term trade This system according to the authors helped establish Venice as a dominant city state in international trade and exchange This book outlines the development and success of this system through 1508 At the time it was first published this book made a significant contribution to the history of money and economics by underscoring the large role that Venice played in the economic history of the West and the ascendance of capitalism as a structuring force of society

Ottoman and Dutch

Merchants in the Eighteenth Century Ismail Hakk? Kad?, 2012-05-25 This study analyses the dynamics between the non Muslim merchant elites of Ankara and Izmir mostly Greeks and Armenians and their European competitors in the 18th century particularly the mohair trade in Ankara and Ottoman infiltration of the Dutch trade between Amsterdam and Izmir

The Oxford World History of Empire Peter Fibiger Bang, C. A. Bayly, Walter Scheidel, 2020-11-07 This is the first world history of empire reaching from the third millennium BCE to the present By combining synthetic surveys thematic comparative essays and numerous chapters on specific empires its two volumes provide unparalleled coverage of imperialism throughout history and across continents from Asia to Europe and from Africa to the Americas Only a few decades ago

empire was believed to be a thing of the past now it is clear that it has been and remains one of the most enduring forms of political organization and power We cannot understand the dynamics and resilience of empire without moving decisively beyond the study of individual cases or particular periods such as the relatively short age of European colonialism The history of empire as these volumes amply demonstrate needs to be drawn on the much broader canvas of global history Volume I The Imperial Experience is dedicated to synthesis and comparison Following a comprehensive theoretical survey and bold world history synthesis fifteen chapters analyze and explore the multifaceted experience of empire across cultures and through the ages The broad range of perspectives includes scale world systems and geopolitics military organization political economy and elite formation monumental display law mapping and registering religion literature the politics of difference resistance energy transfers ecology memories and the decline of empires This broad set of topics is united by the central theme of power examined under four headings systems of power cultures of power disparities of power and memory and decline Taken together these chapters offer a comprehensive and unique view of the imperial experience in world history
