Program Assessment:

Evaluability Assessment M.F. Smith, 2013-03-09 My interest in and appreciation for program evaluation began in the early 1970 s when conducting a curriculum development research project at the University of Florida s P K Yonge Laboratory School This interest was sparked when it became apparent that testing the success of an education program required more skills than just statistics and research methods After pursuing additional formal schooling I embarked on a career featuring educational program evaluation as its central thrust as a private consultant later in a university health sciences center involving seven academic colleges and then in the Cooperative Extension Services of Florida and Maryland Adding evaluability assessment EA to the performance of evaluations to program development and to teaching about evaluation has been a significant development for me personally and I hope to those who have been participants with me in each endeavor This book grew out of many of these experiences and involved numerous colleagues who made significant contributions First among these is Dr George Mayeske Program Evaluation Specialist Extension Service U S Department of Agriculture Washington D c The Program Evaluation Standards Joint Committee on Standards for Educational Evaluation, James R. Sanders, 1994-04-06 The Program Evaluation Standards is a must have book for anyone responsible for reviewing evaluation proposals planning and conducting evaluations managing evaluation projects or judging the merit and worth of evaluations once completed For experienced practitioners it provides a set of values and principles by which to guide successful practice that is a set of criteria that determines whether educational evaluations are trustworthy and fair The Standards sets expectations of the design and implementation of educational evaluation for all practitioners in all types of educational arenas even those involved in social programming endeavors For newcomers and those less experienced who may be responsible for commissioning and using evaluations the Standards supplies a useful framework of generating a list of questions to raise about any evaluation plan or final report in an effort to assess its pros and cons The book is an invaluable how to resource for graduate students venturing out into the field and it instills a sense of what it means to be a responsible evaluator For clients or consumers the book offers advice on what they should expect of an evaluation Publisher description **Program Assessment and Results Act** United States.
