for implementation of national agricultural censuses in the 2016-2025 decade. Volume 1 deals with the methodological and conceptual aspects of the census of agriculture. In addition to the use of international standards, the proper conduct of an agricultural census also depends on adequate planning, implementation, use of resources and quality assurance throughout all stages of the census. In light of this, Volume 2 of WCA 2020 Operational guidelines has been designed to guide national census practitioners responsible for conducting the agricultural census. It deals with the practical steps involved in actually conducting an agricultural census in the field. Volume 2 is a revised and updated edition of *Conducting Agricultural Censuses and Surveys* published by FAO in 1996. The revision is opportune not only in view of the recent publication of the new census programme and methodology but also in view of the substantial changes witnessed in the census technological environment over the last two decades. The availability of digital mobile and more affordable tools for data capture, geo-positioning, remote sensing, imaging, digital archiving and online dissemination have provided new, cost-effective alternatives to traditional ways of conducting the agricultural census.

Programme Evaluation and Treatment Choice Markus Frölich, 2012-12-06. Policy evaluation and programme choice are important tools for informed decision making for the administration of active labour market programmes, training programmes, tuition subsidies, rehabilitation programmes etc. Whereas the evaluation of programmes and policies is mainly concerned with an overall assessment of impact, benefits and costs, programme choice considers an optimal allocation of individuals to the programmes. This book surveys potential evaluation strategies for policies with multiple programmes and discusses evaluation and treatment choice in a coherent framework. Recommendations for choosing appropriate evaluation

estimators are derived Furthermore a semiparametric estimator of optimal treatment choice is developed to assist in the optimal allocation of participants
