Pontius,1966 The Pilot Program for mass measurement is the result of a consideration in which the values produced are thought of as the products of a mass measurement process The collective performance of elements of the mass measurement process results in establishing the process precision which under certain conditions can be described quantitatively by pertinent performance parameters The uncertainty attached to the product of the process the measured value is computed from these parameters and reflects the total performance of the process rather than the immediate measurement which might have produced the value Interpretations of uncertainty and surveillance tests are discussed The Pilot Program in mass measurement whereby suitable process performance parameters can be established for precise mass measurement processes in other facilities is discussed Author **Program Guide on the Mass Transportation Loan Program** United States. Urban Mass Transportation Administration,1988 Fractal Analysis of Breast Masses in Mammograms Thanh M. Cabral,Rangaraj M. Rangayyan,2022-06-01 Fractal analysis is useful in digital image processing for the characterization of shape roughness and gray scale texture or complexity Breast masses present shape and gray scale characteristics in mammograms that vary between benign masses and malignant tumors This book demonstrates the use of fractal analysis to classify breast masses as benign masses or malignant tumors based on the irregularity exhibited in their contours and the gray scale variability exhibited in their mammographic images A few different approaches are described to estimate the fractal dimension FD of the contour of a mass including the ruler method box counting method and the power spectral analysis PSA method Procedures are also described for the estimation of the FD of the gray scale image of a mass using the blanket method and the PSA method To facilitate comparative analysis of FD as a feature for pattern classification of breast masses several other shape features and texture measures are described in the book The shape features described include compactness spiculation index fractional concavity and Fourier factor The texture measures described are statistical measures derived from the gray level cooccurrence matrix of the given image Texture measures reveal properties about the spatial distribution of the gray levels in the given image therefore the performance of

texture measures may be dependent on the resolution of the image For this reason an analysis of the effect of spatial resolution or pixel size on texture measures in the classification of breast masses is presented in the book The results demonstrated in the book indicate that fractal analysis is more suitable for characterization of the shape than the gray level variations of breast masses with area under the receiver operating characteristics of up to 0.93 with a dataset of 111 mammographic images of masses The methods and results presented in the book are useful for computer aided diagnosis of breast cancer Table of Contents Computer Aided Diagnosis of Breast Cancer Detection and Analysis of newline Breast Masses Datasets of Images of Breast Masses Methods for Fractal Analysis Pattern Classification Results of Classification of Breast Masses Concluding Remarks Handbook of Research on Information Security in Biomedical Signal Processing Pradhan, Chittaranjan, Das, Himansu, Naik, Bighnaraj, Dey, Nilanjan, 2018-04-13 Recent advancements and innovations in medical image and data processing have led to a need for robust and secure mechanisms to transfer images and signals over the internet and maintain copyright protection The Handbook of Research on Information Security in Biomedical Signal Processing provides emerging research on security in biomedical data as well as techniques for accurate reading and further processing While highlighting topics such as image processing secure access and watermarking this publication explores advanced models and algorithms in information security in the modern healthcare system This publication is a vital resource for academicians medical professionals technology developers researchers students and practitioners seeking current research on intelligent techniques in medical data security Comprehensive Readiness Program for Countering Proliferation of Weapons of Mass Destruction United States.
