Codex Sinaiticus Arabicus and Its Family Robert Turnbull,2024-10-21 Arabic versions of the New Testament have been overlooked for too long The Sinai New Finds of 1975 unearthed Codex Sinaiticus Arabicus which preserves an Arabic translation of the Gospels differing markedly from the Majority Text Here Robert Turnbull undertakes a wide ranging study of this version discovering many lectionary manuscripts with the same text Several open access datasets are made available Bayesian phylogenetics and other computational techniques are used to draw insights into the transmission history of this version and its place in the wider New Testament textual tradition This Arabic version will be indispensable in future textual scholarship on the Gospels *Post-editing of Machine Translation* Laura Winther Balling,Michael Carl,Sharon

O'Brian,2014-03-17 Post editing is possibly the oldest form of human machine cooperation for translation It has been a common practice for just about as long as operational machine translation systems have existed Recently however there has been a surge of interest in post editing among the wider user community partly due to the increasing quality of machine translation output but also to the availability of free reliable software for both machine translation and post editing As a result the practices and processes of the translation industry are changing in fundamental ways This volume is a compilation of work by researchers developers and practitioners of post editing presented at two recent events on post editing The first Workshop on Post editing Technology and Practice held in conjunction with the 10th Conference of the Association for Machine Translation in the Americas held in San Diego in 2012 and the International Workshop on Expertise in Translation and Post editing Research and Application held at the Copenhagen Business School in 2012 *Dr. Dobb's Journal* ,1995
