

SOFTWARE PROCESSES

- The term **software** specifies to the set of computer programs, procedures and associated documents (Flowcharts, manuals, etc.) that describe the program and how they are to be used.
- A software process is the set of activities and associated outcome that produce a software product. Software engineers mostly carry out these activities. These are four key process activities, which are common to all software processes. These activities are:

- **Software specifications**
- **Software development**
- **Software validation**
- **Software evolution**
