Food Materials Science and Engineering Bhesh Bhandari, 2012-07-30 Food Materials Science and Engineering covers a comprehensive range of topics in

relation to food materials their properties and characterisation techniques thus offering a new approach to understanding food production and quality control The opening chapter will define the scope and application of food materials science explaining the relationship between raw material structure and processing and quality in the final product Subsequent chapters will examine the structure of food materials and how they relate to quality sensory perception processing attributes and nutrient delivery The authors also address applications of nanotechnology to food and packaging science Methods of manufacturing food systems with improved shelf life and quality attributes will be highlighted in the book Gluten-Free Food Science and Technology Eimear Gallagher, 2009-09-08 Coeliac disease CD and other allergic reactions intolerances to gluten are on the rise largely due to improved diagnostic procedures and changes in eating habits The worldwide incidence of coeliac disease has been predicted to increase by a factor of ten over the next number of years and this has resulted in a growing market for high quality gluten free cereal products However the removal of gluten presents major problems for bakers Currently many gluten free products on the market are of low quality and short shelf life exhibiting poor mouthfeel and flavour This challenge to the cereal technologist and baker alike has led to the search for alternatives to gluten in the manufacture of gluten free bakery products This volume provides an overview for the food industry of issues related to the increasing prevalence of coeliac disease and gluten intolerance The properties of gluten are discussed in relation to its classification and important functional characteristics and the nutritional value of gluten free products is also addressed The book examines the diversity of ingredients that can be used to replace gluten and how the ingredient combinations and subsequent rheological and manufacturing properties of a range of gluten free products e g doughs breads biscuits and beer may be manipulated Recommendations are given regarding the most suitable ingredients for different gluten free products The book is directed at ingredient manufacturers bakers cereal scientists and coeliac associations and societies It will also be of interest to academic food science departments for assisting with undergraduate studies and postgraduate research The Author Dr Eimear Gallagher Ashtown Food Research Centre Teagasc The Irish Agriculture and Food Development Authority Dublin Ireland Also available from Wiley Blackwell Management of Food Allergens Edited by J Coutts and R Fielder ISBN 9781405167581 Bakery Manufacture and Quality Water Control and Effects Second Edition S Cauvain and L Young ISBN 9781405176132 Whole Grains and Health Edited by L Marquart et al ISBN 9780813807775 **Food Technology in Australia**, 1985 Storage of Cereal Grains and Their Products Kurt A.
