Designing Sustainable Residential and Commercial Interiors

Lisa M. Tucker, 2014-09-11 *Designing Sustainable Commercial Interiors Applying Concepts and Practices* is a core text that teaches students and designers how to apply sustainable principles to all stages of the design process for residential and commercial interiors. An overview of the types of design projects emphasizes a three pronged approach to sustainability: equity, economy, and ecology. Through case studies for a range of project types including retail, healthcare, hospitality, corporate, adaptive reuse, civic, and institutional, and residential, readers will learn how to use a sustainable concept as the foundation for well designed projects.

Another Modernism Anna Myjak-Pycia, 2025-06-12 Filling an important gap in design history, *Another Modernism* examines how domestic space was conceived by the US home economics movement in the first half of the 20th century. In doing so, it tells the story of how home economists, mainly women, developed design that challenged the traditional architecture of American farm communities and countered the approach of modernist architects. Uncovering unacknowledged contributions of women to domestic architecture and design history, it reveals early instances of participation, sustainability, and accommodating the disabled body in domestic design. In contrast to the canonical modernist model of space, which is primarily visual, home economists centered on a user who interacts with the interior in a tactile, bodily way. Although both strove for efficiency, they understood it differently; whereas for many of the mainstream modernists, the term efficiency meant functionalist aesthetics, for home economists, it signified design solutions intended to ease the labor of an average American homemaker. The book argues that the home economists' focus on tactility, the user's corporeality, movement, access, preferences, and her engagement in the design process constituted an alternative model of modern architecture: a popular and largely rural modernism centered on the specificity of the female user and her personal experience of the domestic interior. Based on little known archival material and with an emphasis on mostly female researchers, designers, and users/occupants, *Another Modernism* will appeal to architects, design historians, and anyone interested in gender, women's, and disability studies, as well as non-visual approaches to design.
