## **Roseto Story An Anatomy Of Health:**

The Roseto Story John G. Bruhn, Stewart Wolf, 2013-04-17 Roseto is a small Italian American community in east central Pennsylvania This fifteen year study drawing on medical histories physical examinations and laboratory tests compared a large sample of Rosetans to inhabitants of two neighboring communities Bangor and Nazareth and followed up this research with a sociological study of the three communities Despite a greater prevalence of obesity in Roseto and despite similar dietary smoking and exercise habits and similar ethnic and genetic background the inhabitants of Roseto were relatively immune to heart disease at the beginning of the research in 1963 They were also strikingly tenacious in adhering to Old World values and customs When these traditional values and relationship were abandoned by the rising generation the death rate from heart disease climbed toward the American norm The study concluded that unconditional interpersonal support counteracts life stress and thus preserves life

**The Power of Clan** Stewart Wolf, 2021-12-16 Medical sociologists have long recognized the importance of community and family structure in the health of individuals However the past quarter century in America has seen an increasing emphasis on individualism and materialism that has effectively diminished the cohesiveness and emotional support provided by these basic social units The Power of Clan examines the health effects of social change in a largely Italian American town over a twenty five year period and provides substantial evidence of the protective effect of family bonds and shared social values against coronary heart disease and sudden death The unique feature of the Roseto Pennsylvania community was its remarkably low death rate from heart attacks this in spite of the fact that such risk factors as smoking lack of exercise high fat and cholesterol diet were found to be just as prevalent in Roseto as in four nearby control towns Roseto s traditional family oriented social structure however differed vastly from that of neighboring towns where materialistic values were predominant and where the individual rather than the family was considered to be the unit of society At the beginning of their study in the early 1960s the authors noted indications of imminent social change toward a more Americanized system of values and behavior Interviews with younger inhabitants revealed much respect for old world traditions but not as much enthusiasm for living by them The study s prediction that the abandonment of selfless communal standards would undermine Rosetans relative immunity to heart disease was borne out as death rates from heart attack climbed to levels comparable to those of the control towns by 1975 The Power of Clan is the product of twenty five years of continuous observation The findings of its original study have been carefully examined and its predictions largely confirmed It is a landmark volume in the longitudinal study of health in an advanced industrial society It also constitutes a large step forward in the cooperation of medical and sociological researchers

**The Italian/American Experience** Louis J. Gesualdi, 2012-04-13 The Italian American Experience A Collection of Writings represents a meaningful attempt to inform Italian Americans about their group s varied experiences in America This book unlike many works on the Italian American experience contains writings that explain why popular negative notions of Italian American life are

inaccurate The Italian American Experience lists a number of organizations and journals specializing in Italian American culture and provides brief descriptions of many leading researchers in the field of Italian American studies This unique text also contains an annotated bibliography of key books that deal with the lives of Italians and Italian Americans This collection of eleven works offers readers an in depth view of Italian American culture and heritage

**The Rabbit Effect** Kelli Harding, 2020-11-03 This groundbreaking and life changing work based on the latest research effectively demonstrates the profound impact that love connection and kindness have on our health Mark Williamson PhD director of Action for Happiness When Columbia University doctor Kelli Harding began her clinical practice she never intended to explore the invisible factors behind our health But then there were the rabbits In 1978 a seemingly straightforward experiment designed to establish the relationship between high blood cholesterol and heart health in rabbits discovered that kindness in the form of a particularly nurturing post doc who pet and spoke to the lab rabbits as she fed them made the difference between a heart attack and a healthy heart As Dr Kelli Harding reveals in this eye opening book the rabbits were just the beginning of a much larger story Groundbreaking new research shows that love friendship community and our environment can have a greater impact on our health than anything that happens in the doctor s office For instance chronic loneliness can be as unhealthy as smoking a pack of cigarettes a day napping regularly can decrease one s risk of heart disease and people with purpose are less likely to get sick At once paradigm shifting and empowering The Rabbit Effect illuminates vital public health research showing kindness in our day to day lives can make the world a healthier happier place I recommend this book highly for anyone who wants to live more healthfully Christy Turlington Burns and CEO of Every Mother Counts

**Hopelessly Alien** Louis Corsino, 2024-05-01 Hopelessly Alien is an in depth study of Italian immigration to Chicago Heights Illinois between 1910 and 1950 Drawing upon oral histories interviews historical documents and census materials Louis Corsino examines the critical concept of hope which most immigration studies have cast in privatized psychological terms as the motivation to emigrate in search of a better life This investigation offers a more contentious sociological perspective depicting hope as both an ideological lure to recruit and manage the foreign element and as a resource immigrants employed to purchase acceptance and avoid a disparaging label as a hopelessly alien stranger These dialectical processes are illustrated through the Italian immigrants pursuit of occupational mobility and homeownership and the appropriation of their children s hopes Each became forms of cultural capital that demonstrated a public commitment to the American ethos of joyful striving Each provided measures of success but these individual pursuits came at the expense of upsetting the necessary tension between individual and communal hopes

Parsons,2021-04-30 In the early 1990s Russia experienced one of the most extreme increases in mortality in modern history Men's life expectancy dropped by six years women's life expectancy dropped by three Middle aged men living in Moscow were particularly at risk of dying early deaths While the early 1990s represent the apex of mortality the crisis continues Drawing on fieldwork in the capital city during 2006 and 2007 this account brings ethnography to bear on a topic that has until recently been the province of epidemiology and demography Middle aged Muscovites talk about being unneeded *ne nuzhny* or having little to give others Considering this concept of being unneeded reveals how political economic transformation undermined the logic of social relations whereby individuals used their position within the Soviet state to give things to other people Being unneeded is also gendered while women are still needed by their families men are often unneeded by state or family Western literature on the mortality crisis focuses on a lack of social capital often assuming that what individuals receive is most important but being needed is more about what individuals give Social connections and their influence on health are culturally specific In Soviet times needed people helped friends and acquaintances push against the limits of the state crafting a sense of space and freedom When the state collapsed this sense of bounded freedom was compromised and another freedom became deadly This book is a recipient of the annual Norman L and Roselea J Goldberg Prize for the best project in the area of medicine *Us Before Me* P. Illingworth,2016-04-30 Patricia Illingworth's short powerful and passionate book argues that social capital should be an essential ethical concept guiding our actions and explains how one might go about implementing this idea in a positive way *The Psychology of Poverty, Wealth, and Economic Inequality* Deborah Belle,Heather E. **Technically Together** Taylor Dotson, 2024-02-06 Why we should not accept networked individualism as the inevitable future of community If social interaction by social media has become the modern front porch as one sociologist argues offering richer and more various contexts for community and personal connection why do we often feel lonelier after checking Facebook For one thing as Taylor Dotson writes in Technically Together Try getting a Facebook status update to help move a couch or stay for dinner Dotson argues that the experts who assure us that networked individualism will only bring us closer together seem to be urging citizens to adapt their social expectations to the current limits of technology and discouraging them from considering how technologies could be refashioned to enable other ways of relating and belonging Dotson characterizes different instantiations of community as thick or thin depending on the facets and manifestations of togetherness that they encompass Individuating social networks are a form of community he explains but relatively thin in regard to several dimensions of communality Dotson points out that current technological practices are not foreordained but supported by policies economic arrangements and entrenched patterns of thought He examines a range of systems organizations and infrastructures from suburban sprawl and smartphones to energy grids and cry it out sleep training for infants and considers whether they contribute to the atomization of social life or to togetherness and community vibrancy Dotson argues that technology could support multifaceted communities if citizens stopped accepting the technological status quo and instead demanded more from their ever present devices

**Indians, Markets, and Rainforests** Ricardo A. Godoy, 2001 Godoy investigates five lowland Amerindian societies of tropical Latin America all of which are experiencing deep changes as they modernize to discover the results of a market economy on both indigenous peoples and the conservation of tropical rainforest flora and fauna

The Sociology of Community Connections John G. Bruhn, 2011-07-18 Many of our current social problems have been attributed to the breakdown or loss of community as a place and to the fragmentation of connections due to an extreme value of individualism in the Western world particularly in the United States Not all scholars and researchers agree that individualism and technology are the primary culprits in the loss of community as it existed in the middle decades of the 20th century Nonetheless people exist in groups and connections are vital to their

existence and in the daily performance of activities The second edition of the Sociology of Community Connections will identify and help students understand community connectedness in the present and future     *Indians, Markets, and Rainforests* Ricardo Godoy, 2001-08-01 This book addresses two important and related questions does participation in a market economy help or hurt indigenous peoples and how does it affect the conservation of tropical rainforest flora and fauna Oddly there have been few quantitative studies that have addressed these issues Ricardo Godoy's research takes an important step toward rectifying this oversight by investigating five different lowland Amerindian societies of tropical Latin America all of which are experiencing deep changes as they modernize Godoy examines the effect of markets on a broad range of areas including health conservation of flora and fauna leisure folk knowledge reciprocity and private time preference He concludes that contrary to considerable anthropological theory the effect of markets on the quality of life and the rainforest are often unclear or benign Godoy uses multivariate techniques to examine the changes modernization has had on many indicators of the quality of life and the environment and concludes that the seeds of socioeconomic differentiation may already lie dormant in simple economies The impact of modernization on lowland Amerindians is a topic of great concern to anthropologists researchers and policymakers in developing nations and this book is a significant contribution to the debate about the likely future of indigenous people
