Harvey,2023-05-31 P D A Harvey is a historian of medieval rural England with a wide interest in the history of cartography this collection of his essays brings together both these strands It first looks at the English countryside from the 10th century to the 15th investigating problems in particular documents in the village community and in underlying long term changes How landlords drew profits from their property in the eleventh and twelfth

centuries how and why there followed changes in the way landed estates were run and in the written records they produced what new light their personal seals can throw on medieval peasants are all among the topics discussed while the local management of large estates and the development of the peasant land market are themes that recur throughout There follow essays on the way maps were brought into the management of landed estates in the 16th and 17th centuries starting with the introduction of consistent scale into mapping a new concept crucially important in the general history of topographical maps The collection closes by looking at some of the traps that both documents and maps set for the historian of the English countryside

*The Politics of Magnate Power in England and Wales, 1389-1413* Alastair Dunn, 2003 This book offers a dramatic revision to the historical understanding of the events surrounding the fall of Richard II and the establishment of the Lancastrian regime Rather than halting at 1399 it charts the shifting balance of power between crown and nobility until the death of Henry IV in 1413 The first major work ever to analyse the financial element of land forfeitures for treason it concludes that Richard II experienced only limited success in profiting from the destruction of his enemies This work is also the first for more than thirty years to chart the political resistance to Henry IV and assess the reasons for his avoiding the fate of his predecessor It draws the radically new conclusions that Henry IV recognized the practical limitations of his power as a usurper and in coming to a modus vivendi with his many enemies traded actual security for a diminution in the Crown's authority to command the obedience of its subjects

Government and Political Life in England and France, c.1300-c.1500 Christopher Fletcher, Jean-Philippe Genet, John Watts, 2015-04-20 How did the kings of England and France govern their kingdoms This volume the product of a ten year international project brings together specialists in late medieval England and France to explore the multiple mechanisms by which monarchs exercised their power in the final centuries of the Middle Ages Collaborative chapters mostly co written by experts on each kingdom cover topics ranging from courts military networks and public finance office justice and the men of the church to political representation petitioning cultural conceptions of political society and the role of those excluded from formal involvement in politics The result is a richly detailed and innovative comparison of the nature of government and political life seen from the point of view of how the king ruled his kingdom but bringing to bear the methods of social cultural and economic history to understand the underlying armature of royal power

*Anticorruption in History* Ronald Kroeze, André Vitória, Guy Geltner, 2018 Anticorruption in History is a timely and urgent book corruption is widely seen today as a major problem we face as a global society undermining trust in government and financial institutions economic efficiency the principle of equality before the law and

human wellbeing in general Corruption in short is a major hurdle on the path to Denmark a fated blueprint for stable and successful statebuilding The resonance of this view explains why efforts to promote anticorruption policies have proliferated in recent years But while the subject of corruption and anticorruption has captured the attention of politicians scholars NGOs and the global media scant attention has been paid to the link between corruption and the change of anticorruption policies over time and place with the attendant diversity in how to define identify and address corruption Economists political scientists and policy makers in particular have been generally content with tracing the differences between low corruption and high corruption countries in the present and enshrining them in all manner of rankings and indices The long term trends potentially undergirding the position of various countries plays a very small role Such a historical approach could help explain major moments of change in the past as well as reasons for the success and failure of specific anticorruption policies and their relation to a country's image of itself or as construed from outside as being more or less corrupt It is precisely this scholarly lacuna that the present volume intends to begin to fill The book addresses a wide range of historical contexts Ancient Greece and Rome Medieval Eurasia Italy France Great Britain and Portugal as well as studies on anticorruption in the Early Modern and Modern era in Romania the Ottoman Empire the Netherlands Germany Denmark Sweden and the former German Democratic Republic

successive upheavals have been hotly contested by historians ever since In this original and stimulating new synthesis distinguished historian Michael Hicks examines the difficult economic military and financial crises and explains for the first time the real reasons why the conflicts between the House of Lancaster and the House of York began why they kept recurring and why eventually they ceased Alongside fresh assessments of key personalities Hicks sheds new light on the significance of the involvement of the people in politics the intervention of foreign powers in English affairs and a fifteenth century credit crunch Combining a meticulous dissection of competing dynamics with a clear account of the course of events this is a definitive and indispensable history of a compelling complex period
