Ecology and Conservation of Butterflies A.S. Pullin,2012-12-06 This book was conceived to mark the Silver Jubilee of the British Butterfly Conservation Society Interest in the conservation of butterflies has increased so rapidly that it is difficult to relate to the situation 25 years ago Butterflies were on the decline in Britain Europe and elsewhere but we lacked data on the extent of the decline and the underlying reasons leaving us unable to implement effective conservation measures An early recognition of the plight of British butterflies and moths led to the foundation of the society by a small group of conservationists in 1968 Today the society has over 10000 members owns a number of reserves and sponsors research conservation and monitoring activities at the local and national level As part of the Silver Jubilee celebrations an international symposium was held at Keele University in September 1993 entitled *Ecology and Conservation of Butterflies* This symposium clearly showed how much important work has been done in recent years and also gave me the impression that the subject had reached a watershed This was not because the decline of butterflies has stopped or even slowed down far from it the threat to our butterflies continues to increase from habitat destruction and intensification of land use The watershed is in our understanding of the relationship between butterflies and their habitat

W. Moore,1987-02-27 This book is a plea to everyone but especially to politicians administrators farmers and businessmen to take conservation seriously and as a result to integrate conservation with other activities Through research work and land management the author shows how he came to realise that conservation matters much more fundamentally than is accepted by conventional wisdom He maintains that the significance of conservation will not be recognised until it is seen within its proper contents of time and this provides the theme of the book The newness of conservation as an idea and its complexities still provide obstacles to understanding its real significance In the past too much emphasis has been put on the negative and esoteric aspects of conservation This book is important because it emphasises its positive and common sense aspects and in so doing demonstrates that conservation should now be accepted as a major national and international objective of vital concern to everybody now and in the future , *Management Planning for Nature Conservation* Mike Alexander,2012-12-05 The first edition of Mike Alexander s *Management Planning for Nature Conservation* brought a new

dimension to the modern literature on conservation management This second edition a significant enhancement of the original deals with the development both conceptual and practical of adaptive management planning for nature conservation It is about preparing management plans and guides the reader through the entire process Case studies including a conservation and access plan demonstrate the planning process in action This approach to planning can be applied to any place which is managed entirely or in part for wildlife It can be applied to the management of species or habitats in any circumstance regardless of site designation The process is fully compatible with the Convention on Biological Diversity s ecosystem approach to conservation management Mike Alexander has long been at the forefront of developing management planning for conservation with experience ranging from Uganda to Estonia and from Costa Rica to Wales He is the General Secretary of the Conservation Management System Consortium a group of organisations with a common aim of raising standards and developing best practice in conservation management and planning In 2012 Mike Alexander was elected a Fellow of the Society of Biology in recognition of his contribution to nature conservation and in particular management planning This book has drawn on the experiences and expertise of the CMS consortium and other leaders in both conservation research and wildlife management from around the world It is essential reading for professional conservation managers and any student studying management planning for conservation within a range of degree and postgraduate courses

Storyline Marie Jeanne McNaughton, Peter J. Mitchell, 2016-05-11 This book is based on the premise that story making and storytelling are fundamental human activities shared by all cultures The power and potential of stories in learning has been recognised by practitioners of the Storyline Approach since the 1960s As can be seen from the scope and variety of contributions to this book educators from across the world continue to employ the pedagogies and strategies of Storyline to complement and extend the educational opportunities they offer to the learners in their care They demonstrate that story can be a medium for developing skills and making connections a means of social and cultural bonding and of sharing culture and belief systems and a way of sharing in common human experiences often by uniting both the cognitive and the affective domains It can tap into the imagination and emotions to form new and meaningful connections between existing areas of knowledge than can often be neglected in conventional educational practice The book provides educators and learners with examples of creative meaningful and powerful educational experiences and is the result of the extending and crafting of some of the presentations and ideas offered by delegates at the 5th International Storyline Conference held in Reykjavik in 2012
