Land Agent in Britain Peter Jones, Steven King, Geoff Monks, 2016-12-14 Despite the fact that their archives survive in volume and depth across the country relatively little is known about the fascinating and complex role of the land agent across time For the very first time this volume brings together historians practitioners and representatives of the bodies overseeing the continuing professional development of agents to explore in overview and through detailed case studies the wide variety of skills required by those entering this profession At the core of the contributions here is the sense of continuity which exists between the Anglo Saxon Reeve and the highly qualified modern land agent Skills such as a working knowledge of farming entrepreneurialism the ability to get on with a wide variety of stakeholders as well as estate owners conservation environmental management and adaptability to fast changing economic climates or technological possibilities remain as important today as they have been in the past Fusing together historical and modern perspectives the contributors both trace the development and refinement of these skills and begin to look to the future of estates and their agents in a post Brexit world characterised by uncertain subsidies persistently low food prices radical changes in the intensity of weather patterns and the need once more to build strong economic and socio cultural bridges between town and country *Ecclesiastical Lordship, Seigneurial Power and the Commercialization of Milling in Medieval England* Adam Lucas, 2016-04-29 This is the first detailed study of the role of the Church in the commercialization of milling in medieval England Focusing on the period from the late eleventh to the mid sixteenth centuries it examines the estate management practices of more than thirty English religious houses founded by the Benedictines Cistercians Augustinians and other minor orders with an emphasis on the role played by mills and milling in the establishment and development of a range of different sized episcopal and conventual foundations Contrary to the views espoused by a number of prominent historians of technology since the 1930s the book demonstrates that patterns of mill acquisition innovation and exploitation were shaped not only by the size wealth

and distribution of a house's estates but also by environmental and demographic factors changing cultural attitudes and legal conventions prevailing and emergent technical traditions the personal relations of a house with its patrons tenants servants and neighbours and the entrepreneurial and administrative flair of bishops abbots priors and other ecclesiastical officials

Library of Congress Subject Headings Library of Congress, 2011 **Library of Congress Subject Headings** Library of Congress. Cataloging Policy and Support Office, 2003 **Britain's Lost Regiments** Trevor Royle, 2014-10-02 The history of the British Army is really the story of its regiments and the men who served in them From the very beginning they formed the backbone of a singular institution that is itself a reflection of the way the people of Britain view themselves and their collective past Beginning with the Glorious revolution of 1660 and the return to the throne of King Charles II it was a time when Cromwell's Commonwealth and his military institutions were not popular But the new king had to be protected and the country had to be defended Through a process of slow growth and frequent tardiness an army eventually came into being and from the outset it was based solidly on a regimental system which needed steady supplies of recruits to keep it in being Since then men have joined up for many valid reasons such as adventure patriotism or a sense of duty but not all motives were commendable For every young man attracted by the chance to wear a uniform there would be many more who had fallen foul of the law been poverty stricken or fallen into debt or had committed a sexual indiscretion Others were simply coerced With the exception of the two great world wars of the twentieth century the Army rarely numbered more than 250 000 and in 2020 its numbers will have fallen to 82 000 a poor reward one would have thought for all past endeavours Over the years periods of warfare have always been followed by times of peace when expenditure on the armed forces dropped soldiers were made redundant and regiments mainly infantry were either disbanded or amalgamated often with painful consequences However there is a case for saying that no regiment is ever entirely lost and that it will always live on in men's minds as a mystical entity The British Army certainly makes a great deal of the golden thread which still links say the

Middlesex Die Hards to the modern Princess of Wales's Royal Regiment but the harsh reality is that those ties are only as strong as the men who made them. Like it or not the old and bold soldiers are a dwindling band and once they have fallen out for the last time the regiments will be truly lost. For this reason Trevor Royle now explores the histories of the many regiments that have disappeared to celebrate their existence as well as the men and officers who served with distinction within them.

The Landscape Archaeology of Anglo-Saxon England N. J. Higham, Martin J. Ryan, 2010. The Anglo-Saxon period was crucial to the development of the English landscape but is rarely studied. The essays here provide radical new interpretations of its development. Traditional opinion has perceived the Anglo-Saxons as creating an entirely new landscape from scratch in the fifth and sixth centuries AD, cutting down woodland and bringing with them the practice of open field agriculture and establishing villages. Whilst recent scholarship has proved this simplistic picture wanting, it has also raised many questions about the nature of landscape development at the time, the changing nature of systems of land management and strategies for settlement. The papers here seek to shed new light on these complex issues. Taking a variety of different approaches and with topics ranging from the impact of coppicing to medieval field systems, from the representation of the landscape in manuscripts to cereal production and the type of bread the population preferred, they offer striking new approaches to the central issues of landscape change across the seven centuries of Anglo-Saxon England, a period surely foundational to the rural landscape of today.

So You Think You Know About Britain? Danny Dorling, 2011-03-17. When it comes to immigration, the population explosion, the collapse of the family, the north-south divide, devolution or the death of the countryside, common wisdom tells us that we are in trouble. However, this is far from the truth. In his brilliant anatomy of contemporary Britain, leading geographer Daniel Dorling dissects the nation and reveals unexpected truths about the way we live today, contrary to what you might read in the news.

The human mosaic: Most children who live above the fourth floor of tower blocks in England are Black or Asian. The higher you go in a building, the darker-skinned children tend to be.

Relationships: The more times a person's heart is broken, the nearer they will tend to move to the sea.

If you want to find a good man to marry, head for the countryside. North and South: People in the south move home on average every seven years and job every eight years. This is a year faster than in the north of England but a year slower than is usual in Scotland.

Optimum population: Immigrant nation. There are twice as many grandchildren of British-born people living overseas as there are people living in Britain who have grandparents who were themselves born abroad.

The problem now is more about getting pregnant than a population explosion, and we need more immigration, not less.

Muslims are far more likely to marry non Muslims in Britain than Christians are to marry non Christians The elderly Most people in Britain never live long enough to experience being burgled In some areas you would have to live for over five hundred years to have an evens chance of being a crime victim Town and Country divided since the enclosures Step children are most commonly found in the most leafy of idyllic rural villages Nuclear family homogeneity is now an inner city phenomena Why are there no cheap homes in the countryside any more Transport The greatest threat to life in Britain of all those aged under 40 is the car For adults aged over 24 they most likely die as a driver over 15 as a passenger and over age 4 as a pedestrian Work There is no need for us to work until we drop all could retire early Reviews for Injustice A geographer maps the injustices of Selfish Capitalism with scholarly detachment Oliver James Dorling provides the brain cleaning software we need to begin creating a happier society Richard Wilkinson author of The Spirit Level

Who Owns the Crown Lands of Hawai'i? Jon M. Van Dyke,2007-12-31 The 1846 1848 Mahele division transformed the lands of Hawai i from a shared value into private property but left many issues unresolved Kauikeaouli Kamehameha III agreed to the Mahele which divided all

land among the m king the ali i chiefs and the maka inana commoners in the hopes of keeping the lands in Hawaiian hands even if a foreign power claimed sovereignty over the Islands The king s share was further divided into Government and Crown Lands the latter managed personally by the ruler until a court decision in 1864 and a statute passed in 1865 declared that they could no longer be bought or sold by the m and should be maintained intact for future monarchs After the illegal overthrow of the monarchy in 1893 Government and Crown Lands were joined together and after annexation in 1898 they were managed as a public trust by the United States At statehood in 1959 all but 373 720 acres of Government and Crown Lands were transferred to the State of Hawai i The legal status of Crown Lands remains controversial and misunderstood to this day In this engrossing work Jon Van Dyke describes and analyzes in detail the complex cultural and legal history of Hawai i s Crown Lands He argues that these lands must be examined as a separate entity and their unique status recognized Government Lands were created to provide for the needs of the general population Crown Lands were part of the personal domain of Kamehameha III and evolved into a resource designed to support the m who in turn supported the Native Hawaiian people The question of who owns Hawai i s Crown Lands today is of singular importance for Native Hawaiians in their quest for recognition and sovereignty and this volume will become a primary resource on a fundamental issue underlying Native Hawaiian birthrights 64 illus 6 maps **From Roman Britain to Norman England** P.H.
