this study of Victorian jewels and their representation Jean Arnold explores the role material objects play in the cultural cohesion of the West Diamonds and other gems Arnold argues symbolized the most closely held beliefs of the Victorians and thus can be considered prisms of culture Mined in the far reaches of the empire they traversed geographical space and cultural boundaries representing monetary value and evoking empire class lineage class membership gender relations and aesthetics Arnold analyzes the many roles material objects fill in Western culture and surveys the cross cultural history of the Victorian diamond uncovering how this object became both preeminent and representative of Victorian values Her close readings of Wilkie Collins's *The Moonstone* George Eliot's *Middlemarch* William Makepeace Thackeray's *The Great Hoggarty Diamond* and Anthony Trollope's *The Eustace Diamonds* show gendered aesthetic economic fetishistic colonial legal and culturally symbolic interpretations of jewelry as they are enacted through narrative Taken together these divergent interpretations offer a holistic view of a material culture's affective attachment to objects As the assigned meanings of jewels turn them into symbols of power personal relationships and valued ideas human interactions with gems elicit emotional responses that bind the materialist culture together

**Memory and the English Reformation** Alexandra Walsham, Bronwyn Wallace, Ceri Law, Brian Cummings, 2020-11-12 The dramatic religious revolutions of the sixteenth and seventeenth centuries involved a battle over social memory On one side the Reformation repudiated key aspects of medieval commemorative culture on the other traditional religion claimed that Protestantism was a religion without memory This volume shows how religious memory was sometimes attacked and extinguished while at other times rehabilitated in a modified guise It investigates how new modes of memorialisation were embodied in texts material objects images physical buildings rituals and bodily gestures Attentive to the roles played by denial amnesia and fabrication it also considers the retrospective processes by which the English Reformation became identified as an historic event Examining dissident as well as official versions of this story this richly illustrated interdisciplinary collection traces how memory of the religious revolution evolved in the two centuries following the Henrician schism and how the Reformation embedded itself in the early modern cultural imagination

*"Material Cultures, 1740-1920"* Alla Myzelev, 2017-07-05

Interweaving notions of identity and subjectivity spatial contexts materiality and meaning this collection makes a significant contribution to debates around the status and interpretation of visual and material culture *Material Cultures 1740-1920* has four primary theoretical and historiographic lines of inquiry The first is how concepts of otherness and difference inform imbricate and impose themselves on identity and the modes of acquisition as well as the objects themselves The second concern explores the intricacies of how objects and their subjects negotiate and represent spatial narratives The third thread attempts to unravel the ideological underpinnings of collections of individuals which inevitably and invariably rub up against the social the institutional and the political Finally at the heart of *Material Cultures 1740-1920* is an intervention moving

beyond the disciplinary ethos of material culture to argue more firmly for the aesthetic visual and semiotic potency inseparable from any understanding of material objects integral to the lives of their collecting subjects The collection argues that objects are semiotic conduits or signs of meanings pleasures and desires that are deeply subjective more often than not they reveal racial gendered and sexual identities As the volume demonstrates through its various case studies material and visual cultures are not as separate as our current disciplinary ethos would lead us to believe *King and Collector* Linda Collins, Siobhan Clarke, 2021-04-15 Packed with absorbing detail and brilliant insights I was gripped from the first paragraph Alison Weir No English king is as well known to us as Henry VIII famous for his six marriages for dissolving the monasteries and for the ruthless destruction of his foes But Henry was also an ardent patron of the arts whose magnificent tapestries and paintings adorned his lavish court and began the Royal Collection In contrast to later royal collectors Henry was more interested in storytelling than art for its own sake and all his commissions relate to one central tale the glorification of the king and his realm Henry's life can be seen through his collection and the works reveal much about both his kingship and his insecurities *King and Collector* tells this unique story of art and power peeling back the layers of propaganda to show the true face of the Tudor monarch **The Afterlife of Used Things** Ariane Fennetaux, Amélie Junqua, Sophie

Vasset, 2014-10-03 Recycling is not a concept that is usually applied to the eighteenth century The environment may not have existed as a notion then yet practices of re use and transformation obviously shaped the early modern world Still this period of booming commerce and exchange was also marked by scarcity and want This book reveals the fascinating variety and ingenuity of recycling processes that may be observed in the commerce crafts literature and medicine of the eighteenth century Recycling is used as a thought provoking means to revisit subjects such as consumption the new science or novel writing and cast them in a new light where the waste of some becomes the luxury of others clothes worn to rags are turned into paper and into books and scientific breakthroughs are carried out in old kitchen pans **Taking Shape** Martina

Droth, Penelope Curtis, 2009 This exhibition challenges the reasons why sculpture is usually considered alone in the gallery and the decorative arts are considered as part of a period setting It suggests that by breaking away from these conventional categories we can see how sculpture is also part of a spatial conversation and how furniture and fittings can be appreciated as unique works With five original essays and forty complete catalogue entries this publication both documents an exhibition and goes beyond it opening our eyes to the fluidity of formal language in the long eighteenth century and to the ways in which objects can change according to whether they are seen together or apart as mobile or fixed as two or three dimensional as ideal or as functional Book Jacket **How to Read European Decorative Arts** Daniëlle
