Senile Dementia A Biomedical Approach:

Senile Dementia, a Biomedical Approach Kalidas Nandy, 1978 **Senile Dementia** Kalidas Nandy, 1978 **Senile Dementia**, 1978 Materialities of Age and Ageing: Concepts of a Material Gerontology Grit Höppner, Monika Urban, 2019-06-18

In gerontological research the understanding of age and ageing changed in the last decade. Biologic determined explanations no longer prevail in this research field. Instead, ideas of social constructivism are frequently used. These ideas define the state of age and the process of ageing as social constructions steeping ageing in social and cultural assumptions, ascriptions and expectations. From a social constructivist perspective, age and ageing are not just identified as dependency deficit and need for care as it was foremost accelerated from a biological perspective but with the life course and thus with individual lifestyles, experiences, attitudes and practices as well as institutional and economic structures. A prominent social constructivist concept is doing age. Similar to doing gender, the concept of doing age assumes age as taking place in the form of a social praxis within everyday life interactions between people and thus in performances embedded in discourses through which social hierarchies and ideals proceed. Despite the paradigm shift that social constructivist concepts enable in gerontological thinking, they reveal their blind spot when it comes to the materiality of ageing and thus to fleshy, sensual experiences, human and non-human ontologies and agencies. Addressing these materialities of ageing brings up its own critique on definitions of ageing, bodies and material environments. This framing does not presume that age and ageing are solely products of human-to-human interactions or those of formative environments or of discourses. Rather, humans, non-humans and discourses become essential parts of ageing processes. Such a material framing enables us new insights into forms of age and ageing and thus offers an opportunity for scholars to engage critically with materialities of age and ageing. This eBook explores theoretical, methodological and empirical concepts of such a Material Gerontology. Senile Dementia Kalidas Nandy, 1978 *Care-Related Quality of Life in Old Age* Marja Vaarama, Richard Pieper, Andrew Sixsmith, 2007-10-27

The ageing of populations across the world poses a crucial challenge for the twenty-first century. Society faces three major changes: firstly, increasing numbers of active older people demanding new social structures and opportunities; secondly, increasing numbers of frail or disabled older people requiring new interventions and improved health and social care with resulting economic consequences; and finally, complex economic, technological, organisational and social challenges involved in the ageing of society. If society wants to benefit from these changes, innovative social, organisational and technological responses are needed. This book presents the findings of the Care Keys project: Keys for Quality Performance Management of the Care of Older Persons in Europe, and is an example of how research can respond to the challenges outlined above. Care Keys was the fruit of European Union research funding made possible under the Quality of Life and Management of Living Resources specific programme 1 (1998-2002) under the EC's Fifth Framework Programme for Research, Technological Development and Demonstration. The activity promoting such research was Key Action 6 on the Ageing Population and their

Disabilities *Anthropological Perspectives on Aging* Britteny M. Howell, Ryan P. Harrod, 2023-02-21 Taking a holistic approach to the study of aging this volume uses biological archaeological medical and cultural perspectives to explore how older adults have functioned in societies around the globe and throughout human history *Self, Senility, and Alzheimer's Disease in Modern America* Jesse F. Ballenger, 2006-03-31 Historian Jesse F. Ballenger traces the emergence of senility as a cultural category from the late nineteenth century to the 1980s a period in which Alzheimer's disease became increasingly associated with the terrifying prospect of losing one's self Changes in American society and culture have complicated the notion of selfhood Ballenger finds No longer an ascribed status selfhood must be carefully and willfully constructed Thus losing one's ability to sustain a coherent self narrative is considered one of life's most dreadful losses As Ballenger writes senility haunts the landscape of the self made man Stereotypes of senility and Alzheimer's disease are related to anxiety about the coherence stability and agency of the self stereotypes that are transforming perceptions of old age in modern America Drawing on scientific clinical policy and popular discourses on aging and dementia Ballenger explores early twentieth century concepts of aging and the emergence of gerontology to understand and distinguish normal aging from disease In addition he examines American psychiatry's approaches to the treatment of senility and scientific attempts to understand the brain pathology of dementia Ballenger's work contributes to our understanding of the emergence and significance of dementia as a major health issue *Aging of the Brain and Alzheimer's Disease*, 2011-09-22 Aging of the Brain and Alzheimer's Disease **Handbook of Psychiatry: Volume 2, Mental Disorders and Somatic Illness** M. H. Lader, 1983-08-31 This 1986 volume of the Handbook of Psychiatry covers that area of psychiatry contiguous with general medicine and in particular neurology It raises general issues especially with respect to fundamental problems of the mind body relationship and deals with medical disorders related to psychiatry The topics discussed include ischaemic heart disease peptic ulcers bronchial asthma renal failure endocrine disorders and ageing as well as neuropsychiatry There is also an account of selected aspects of severe subnormality concentrating on the practical management of the severely handicapped child and adult Throughout this volume the contributors provide a clinically relevant account of their topics The volume will continue to hold value as a comprehensive survey of the medical history of mental disorders associated with somatic illness

Social Work and Disadvantage Peter Burke, Jonathan Parker, 2007 Providing key messages for practice they outline a range of protection measures against disability by association to reduce the risk of stigma and victimisation *Alzheimer's Family Support Groups* Lillian Middleton, 1984 **Psychosocial Studies of the Individual's Changing Perspectives in Alzheimer's Disease** Dick-Muehlke, Cordula, Li, Ruobing, Orleans, Myron, 2015-08-31 Cognitive impairment through Alzheimer's disease or other related forms of dementia is a serious concern for afflicted individuals and their caregivers Understanding patients mental state and combatting social stigmas are important considerations in caring for cognitively impaired individuals Psychosocial Studies of the Individual's Changing Perspectives in Alzheimer's Disease describes
