The Oxford Handbook of Job Quality Chris Warhurst,Chris Mathieu,Rachel E. Dwyer,2022-06-20 The aim of this Handbook is to produce an interdisciplinary and international benchmark text for anyone wanting to understand job quality Job quality matters and has long and continually done so even if the terminology used to describe it has and continues to vary Debate about the future of work and job quality in the twenty first century centres on the impact of the new digital technologies of the putative fourth industrial revolution This debate compounds existing concerns about the restructuring of employment and importantly a worrying proliferation of poor quality jobs often within the context of neo liberal political economic hegemony since the early 1980s or the economic crisis that followed the Global Financial Crisis of the late 2000s Job quality is offered as a solution to challenges such as health welfare productivity innovation economic competitiveness democracy and democratic participation Bildung cultivation societal equality individual and collective quality of life and environmental sustainability As job quality is a key factor in addressing these and the other challenges it needs to be understood in all its

complexity in terms of what it affects as well as what affects it This Handbook draws together into a single volume first an explicit focus on job quality both as a significant factor in and of itself and as producing instrumental effects on a range of other processes and outcomes second a catalogue of the diverse range of multiple contributions and applications related to job quality and third the complexity and multiple interpretations of the concept of job quality Each chapter provides distinct responses to the question of why job quality matters coupled to a contention about for whom or for what job quality matters most As the chapters with their respective answers and arguments attest there are a range of ways in which job quality is relevant to an equally broad range of social economic and political concerns

General Psychology, **The Psychology of Touch** Morton A. Heller, 2013-11-12 Designed to make research on touch understandable to those not specifically involved in tactile research this book provides broad coverage of the field It includes material on sensory physiology and psychophysics thermal sensibility pain pattern participation sensory aids and tactile perception in blind people While the volume is important for researchers in the area of touch it should also prove valuable to a broad audience of experimental and educational psychologists and health professionals The book should also be of interest to scientists in perception cognition and cognitive science and can be used as a supplementary reader for courses in sensation and perception

A Geography of the Lifeworld (Routledge Revivals) David Seamon, 2015-06-11 Within the modern Western lifestyle increasing conflict is becoming apparent between that patchwork of isolated points such as the home or the office which are linked by a mechanical system of transportation and communication devices and a growing sense of homelessness and isolation This work first published in 1979 adopts a phenomenological perspective illustrating that this malaise may have partial roots in the deepening rupture between people and place Whereas the problems of terrestrial space may have been overcome technologically and economically it has been less successful regarding people Experience indicates that people become bound to locality and the quality of their life is thus reduced if these bonds are disrupted or broken in any way The relationship between community and place is investigated as is the opportunity for improving the environment both from a human and an ecological perspective This book will be of interest to students of human geography

A Theory of Sentience Austen Clark, 2000 Austen Clark offers a general account of the forms of mental representation that we call

sensory To sense something one must have some capacity to discriminate among sensory qualities but there are other requirements What are they and how can they be put together to yield full blown sensing Drawing on the findings of current neuroscience Clark proposes and defends the hypothesis that the various modalities of sensation share a generic form that he calls feature placing Sensing proceeds by picking out place times in or around the body of the sentient organism and characterizing qualities features that appear at those place times Such feature placing is a primitive kind probably the most primitive kind of mental representation Once its peculiarities have been described many of the puzzles about the intentionality of sensation and the phenomena that lead some to label it pseudo intentional can be resolved The hypothesis casts light on many other troublesome phenomena including the varieties of illusion the problem of projection the notion of a visual field the location of after images the existence of sense data and the role of perceptual demonstratives A Theory of Sentience will interest anyone interested in the topics of sensation representation or phenomenal consciousness

Problems from Reid James Van Cleve, 2015-08-03 James Van Cleve here shows why Thomas Reid 1710-96 deserves a place alongside the other canonical figures of modern philosophy He expounds Reid's positions and arguments on a wide range of topics taking interpretive stands on points where his meaning is disputed and assessing the value of his contributions to issues philosophers are discussing today Among the topics Van Cleve explores are Reid's account of perception and its relation to sensation conception and belief his nativist account of the origin of the concepts of space and power his attempt to clear the way for the belief that the things we directly perceive are external things not ideas in our minds his stand on the distinction between primary and secondary qualities his account of acquired perception whereby we come to stand in a quasi-perceptual relation to qualities not originally perceived his claim that visual space is non-Euclidean his answers to the questions why we see the world right side up with inverted retinal images and whether a newly sighted person would recognize by sight the shapes he previously knew by touch whether memory-like perception is a form of direct awareness and how we manage to conceive of things that are utterly nonexistent Also examined are Reid's account of human knowledge by means of first principles his externalist reply to philosophical skepticism his volitional theory of action his use of the distinction between event causation and agent causation to understand freedom of the will and his criticism of Hume and anticipation of Moore on the analysis of moral judgment The most comprehensive work on Reid in a quarter century this book will be welcomed by students of early modern philosophy epistemology the philosophy of perception and the philosophy of action

Modernist Magazines and the Social Ideal Tim Satterthwaite, 2020-09-03 The new photo illustrated magazines of the 1920s traded in images of an ideal modernity promising motorised leisure scientific progress and social and sexual emancipation Modernist Magazines and the Social Ideal is a pioneering history of these periodicals focusing on two of the leading European titles the German monthly UHU and the French news weekly VU taken as representative of the broad class of popular titles launched in the 1920s The book is the first major study of UHU and the first scholarly work on VU in

English Modernist Magazines explores in particular the striking use of regularity and repetition in photographs of modernity reading these repetitious images as symbolic of modernist ideals of social order in the aftermath of the First World War Introducing a novel methodology pattern theory the book argues for a critical return to the Gestalt tradition in visual studies Alongside the UHU and VU case studies Modernist Magazines offers an essential primer to interwar magazine culture in Europe Accounts of rival titles are woven into the book s thematic chapters which trace the evolution of the two magazines photography and graphic design in the tumultuous years up to 1933
