## **Sense Dominance:**

, The Sense Connection Natalie Robinson Garfield, 2009 For parents understanding The Sense Connection enhances the skills needed to raise happy well adjusted children who will become successful emotionally balanced adults For spouses or lovers gaining insight into the ways in which primary sense channels compliment and conflict with each other can shift the balance from discord to harmony And for friends and co workers a firmer grasp of how we as individuals view the world could mean more fulfilling and productive relationships and careers Can understanding others be as simple as identifying their primary sense channels and adjusting accordingly Naturally the sense mode does not define the entire personality But it can offer you some useful short cuts to understanding Consider the many ways we put ourselves and others into neat tidy limiting pigeonholes We ve heard so many of these expressions What do you do Where are you from What s your sign These categorizations are merely stereotypes whether professional regional ethnic astrological or even the result of The Myers Briggs examination Worse than that they re dead ends He s an only child She s a Pisces These stereotypes do not allow room for adaptation for coming together and making a connection By adding The Sense Connection to our lexicon we can find a way to understand others quickly and accurately and then modify our interactive style to fit better with theirs whatever their profession cultural background or birth sign *Discourse and the Continuity of Reference* Cornelia

Zelinsky-Wibbelt, 2011-09-06 No detailed description available for *Discourse and the Continuity of Reference* Status Cecilia L. Ridgeway, 2019-11-22 Status is ubiquitous in modern life yet our understanding of its role as a driver of inequality is limited In Status sociologist and social psychologist Cecilia Ridgeway examines how this ancient and universal form of inequality influences today s ostensibly meritocratic institutions and why it matters Ridgeway illuminates the complex ways in which status affects human interactions as we work together towards common goals such as in classroom discussions family decisions or workplace deliberations Ridgeway s research on status has important implications for our understanding of social inequality Distinct from power or wealth status is prized because it provides affirmation from others and affords access to valuable resources Ridgeway demonstrates how the conferral of status inevitably contributes to differing life outcomes for individuals with impacts on pay wealth creation and health and wellbeing Status beliefs are widely held views about who is better in society than others in terms of esteem wealth or competence These beliefs confer advantages which can exacerbate social inequality Ridgeway notes that status advantages based on race gender and class such as the belief that white men are more competent than others are the most likely to increase inequality by facilitating greater social and economic opportunities Ridgeway argues that status beliefs greatly enhance higher status groups ability to maintain their advantages in resources and access to positions of power and make lower status groups less likely to challenge the status quo Many lower status people will accept their lower status when given a baseline level of dignity and respect being seen for example as poor but hardworking She also shows that people remain willfully blind to status beliefs and their effects because

recognizing them can lead to emotional discomfort Acknowledging the insidious role of status in our lives would require many higher status individuals to accept that they may not have succeeded based on their own merit many lower status individuals would have to acknowledge that they may have been discriminated against Ridgeway suggests that inequality need not be an inevitable consequence of our status beliefs She shows how status beliefs can be subverted as when we reject the idea that all racial and gender traits are fixed at birth thus refuting the idea that women and people of color are less competent than their male and white counterparts This important new book demonstrates the pervasive influence of status on social inequality and suggests ways to ensure that it has a less detrimental impact on our lives      **Computational**

Hamann, Esther Rinke, Dobrinka Genevska-Hanke, 2019-09-20 It has long been established that bilingual speakers are rarely balanced in their languages so that one language is dominant The contributions to the Research Topic Bilingual Language Development The Role of Dominance focus on the potential effects of language dominance on the competence and processing of bilinguals covering a large variety of language combinations and domains Important aspects of such work are the interplay of L1 maintenance attrition and possible L2 dominance the direction of cross linguistic influence CLI or code mixing as well as the effects of bilingualism on cognitive development each addressed in several contributions However such research presupposes a definition of dominance which is far from being settled This gives rise to considerable differences in the operationalization of the concept across studies The studies in this Research Topic present a multifaceted picture of the role of language dominance for L1 maintenance attrition L2 development and CLI Though a unified story cannot emerge for such a complex subject interesting new venues are explored including the impact of dominance shift during L1 re exposure comparisons of different types of bilingual groups or operationalization of dominance through experiential measures The variety of approaches and results is in part owed to the many language combinations studied and the fact that bilingual children adults and atypical speakers are investigated This diversity constitutes the interest of this Research Topic

*Perspectives on Abstract Concepts* Marianna Bolognesi, Gerard J. Steen, 2019-06-15 Human language is the most powerful communication system that evolution has produced Within this system we can talk about things we can physically see such as

cats and tables but also about more abstract entities such as theories and feelings But how are these abstract concepts grounded in human cognition and represented in the mind How are they constructed in language And how are they used in natural communication settings This book addresses these questions through a collection of studies that relate to various theoretical frameworks ranging from Conceptual Metaphor Theory to Words as Social Tools Contributors investigate how abstract concepts are grounded in the mind represented in language and used in verbal discourse This richness is matched by a range of methods used throughout the volume from neuroimaging to computational modeling and from behavioral experiments to corpus analyses

*Real-Time and Deliberative Decision Making* Igor Linkov, Elizabeth A. Ferguson, Victor S. Magar, 2008-10-24 Decision making tools are needed to support environmental management in an increasingly global economy Addressing threats and identifying actions to mitigate those threats necessitates an understanding of the basic risk assessment paradigm and the tools of risk analysis to assess interpret and communicate risks It also requires modification of the risk paradigm itself to incorporate a complex array of quantitative and qualitative information that shapes the unique political and ecological challenges of different countries and regions around the world This book builds a foundation to characterize and assess a broad range of human and ecological stressors and risk management approaches to address those stressors using chemical risk assessment methods and multi criteria decision analysis tools Chapters discuss the current state of knowledge with regard to emerging stressors and risk management focusing on the adequacy of available systematic quantitative tools to guide vulnerability and threat assessments evaluate the consequences of different events and responses and support decision making This book opens a dialogue on aspects of risk assessment and decision analysis that apply to real time immediate and deliberative long term risk management processes

*Transnational and Transcultural Positionality in Globalised Higher Education* Catherine Montgomery, 2017-10-02 Transnational higher education TNHE where students study on a foreign degree programme whilst remaining in their home country has seen exponential development over the last decade In addition to the increase in students engaged in TNHE across the globe the involvement of university teachers in TNHE has also risen in response to the demand for this form of international education Although research into transnational education has doubled since 2006 there is a paucity of research focusing on transnational teacher education especially

outside of North America The global nature and scope of the expansion of TNHE remains underexplored and the ways in which different countries are realising TNHE provision is little understood This book explores the experiences and perceptions of teachers in transnational higher education interrogating the ways in which university teachers negotiate cultural linguistic and disciplinary contexts in order to provide transformative learning experiences for their students This book was originally published as a special issue of the Journal of Education for Teaching Formal approaches to number in Slavic and beyond Mojmir Dočekal, Marcin Wągiel, 2021 The goal of this collective monograph is to explore the relationship between the cognitive notion of number and various grammatical devices expressing this concept in natural language with a special focus on Slavic The book aims at investigating different morphosyntactic and semantic categories including plurality and number marking individuation and countability cumulativity distributivity and collectivity numerals numeral modifiers and classifiers as well as other quantifiers It gathers 19 contributions tackling the main themes from different theoretical and methodological perspectives in order to contribute to our understanding of cross linguistic patterns both in Slavic and non Slavic languages

Overlooking Conventions Michael Devitt, 2021-10-08 This book criticizes the methodology of the recent semantics pragmatics debate in the theory of language and proposes an alternative It applies this methodology to argue for a traditional view against a group of contextualists and pragmatists including Sperber and Wilson Bach Carston Recanati Neale and many others The author disagrees with these theorists who hold that the meaning of the sentence in an utterance never or hardly ever yields its literal truth conditional content even after disambiguation and reference fixing it needs to be pragmatically supplemented in context The standard methodology of this debate is to consult intuitions The book argues that theories should be tested against linguistic usage Theoretical distinctions however intuitive need to be scientifically motivated Also we should not be guided by Grice's Modified Occam's Razor Ruhl's Monosemantic Bias or other such strategies for meaning denialism From this novel perspective the striking examples of context relativity that motivate contextualists and pragmatists typically exemplify semantic rather than pragmatic properties In particular polysemous phenomena should typically be treated as semantic ambiguity The author argues that conventions have been overlooked that there's no extensive semantic underdetermination and that the new theoretical framework of truth conditional pragmatics is a mistake

*The Social Self* Joseph Alkana, 2021-05-11 American literary history of the nineteenth century as a conflict between individualistic writers and a conformist society In *The Social Self* Joseph Alkana argues that such a dichotomy misrepresents the views of many authors Sudden changes caused by the industrial revolution urban development increased immigration and regional conflicts were threatening to fragment the community and such writers as Nathaniel Hawthorne William James and William Dean Howells were deeply concerned about social cohesion Alkana persuasively reintroduces Common Sense philosophy and Jamesian psychology as ways to understand how the nineteenth century self society dilemma developed All three writers believed that introspection was the proper path to the discovery of truth They also felt Alkana argues that such discoveries had to be validated by society In these sophisticated readings of Hawthorne's short stories and *The Scarlet Letter* Howells's utopian Altrurian romances and James's *The Principles of Psychology* it becomes obvious that characters who isolate themselves from the community do so at considerable psychological risk *The Social Self* links these writers' interest in contemporary psychology to their concern for history and society Alkana's argument that nineteenth century expressions of individualism were defensive responses to the fear of social chaos radically revises the traditional narrative of American literary culture

**MYTHOLOGY, PHILOSOPHY, AND SCIENCE. Book for the New Generations. Volume I** Bijon Karmakar, 2022-05-15

The idea of writing this book is MYTHOLOGY PHILOSOPHY and Science Book for the New Generations Volume I is about a slight breakthrough as an expansion project of Physics values As a bio intelligent species in general we have the limitation of directly accessing the frame of objects and objectual items like matters materials and the Materialistic groups shaped from diversifying grades of energies as a unit value sack of energy or their union as mass state energy Clinching and respecting the esteemed formula  $E = mc^2$  which defined the equivalence relationship with differentially shaped Mass energy And hailing the highest degree of intelligent scientist through whom Energy God introduced this formula  $E = mc^2$  as a complete hidden pack of all differential values works of objects keeping the position of E Energy God a universally constant in the Universe I intend to place a new Idea about the birth of the Universe from the True Singularity position of the Supreme Universe Besides in the viewpoint of energy minimum way attempted to convince our position as bio species in this adaptable nature surviving in support of bio grade energy sources somehow somehow connected throughout the distant alien species in different Cosmical Universes and even the Universe The supreme energy or say Pure energy is an inexhaustible state cohesion represented with composites containments Like energy elements and intrinsic elemental values that all are at inert state in the Supreme universe From the viewpoint of the object s say all the infinite numbers of diversifying properties of energy components like energy elements and their working essence as elemental value in a unit value pure energy completely at an absolute null position in every aspect differential way justifying ideologies Accordingly an imaginable unit value Pure energy presumed as Absoluteness status and the Supreme Universe is State of Absoluteness The Supreme Universe is the creator of our Universe So the Universe is an offspring of the Supreme universe a great great Grandmom of all objects and objectual products persistently appearing and seemingly disappearing in the matured 2nd energy belt of the Universe The Universe is restraining as an unconditional buoyant state with ever fixedness at a particular spatial point in the crammed of pure energies in the Supreme Universe A little elaboration about the hidden treasure of the highly respected formula  $E = mc^2$  The  $E = mc^2$  mass area to the power square a framework of matter as energy mass energy components as a unit value frame of the matter or material product that acknowledges by the bio Intelligent system Accordingly if endeavor expands that idea entirely for the matured Universe and the observable and non observable Cosmical universes in the 2nd energy belt it may widen the bio earthly way of defining limited areas of physics and physics value By keeping the Energy or Energy God as a Universal Constant position including its components infinite amount of Energy elements intact Like E

*The Interplay between European and National Competition Law after Regulation 1/2003* Lúcio Tomé Feteira, 2015-12-08 If we can speak of the European Community s economic constitution we can assert that competition rules together with free movement rules form its core Notably implementation of the competition rules enshrined in Articles 81 and 82 EC changed radically with the enactment of Regulation 1 2003 which in effect dispensed with mandatory prior notifications and allowed national authorities to apply Article 101 3 TFEU directly Given that national legislations perceive certain types of unilateral conduct even if adopted by a non dominant undertaking as a potential source of anticompetitive effects an important question concerns the leeway enjoyed by national authorities under the exception to the convergence rule in Article 3 2 of Regulation 1 2003 and the consequent effect on both legal practice and policy issues In this lucidly argued book focusing on national competition provisions in Germany France Italy and the United Kingdom that deal with such conduct the author provides a detailed examination of how such considerations as the following are affected by Regulation 1 2003 prohibition of abuse of economic dependence or superior bargaining power the particular susceptibility of long term contracts prohibition of resale at a loss or below cost prohibition of boycott unlawful pressures threats and other coercive tactics adopted by undertakings and the role of unfair competition law The analysis follows a functional method of comparative legal analysis reviewing the most relevant norms in the selected jurisdictions particularly in what concerns their goals and function in the context of their respective legal systems Special attention is paid to two specific sectors the motor vehicle and the retailing industries which have most often triggered relevant legislation and case law in the jurisdictions covered Legal scholarship in the field is also drawn upon In its clarification of the meaning of Regulation 1 2003 this book allows practitioners to fully grasp its scope The author s thorough masterful analysis of the statutory framework of Article 3 of the regulation also reveals the variety of reasons why different Member States have different competition policies on the scope of the exception to the rule of convergence and in this way provides lawyers policymakers and academics with welcome insights on how major EU jurisdictions apply European competition law
