of attention that supports therapeutic change a process that has been linked in more than 50 research studies with successful outcomes in psychotherapy First developed by pioneering philosopher and psychotherapist Eugene Gendlin Focusing quietly inspired much of the somatically oriented mindfulness based work being done today Yet what makes Focusing a truly revolutionary approach to therapeutic change has been little understood until now Focusing is based on a radically different understanding of the body as inherently meaningful and implicitly wise Mere intellectualizing or talking about problems can keep clients stuck in their old patterns of behavior Focusing introduces the concept of the felt sense a moment in process when there is a potential to experience more than is already known and to break through old frozen stuck patterns Clients who see real change during the course of their therapy work are often those who can contact and stay with a felt sense but how to help them do so is not obvious Ann Weiser Cornell who has been teaching Focusing to clinicians for more than 30 years shows how to help clients get felt senses and nurture them when they appear how to work with clients who have difficulty feeling in the body how to facilitate a felt shift how to support clients who experience dysregulating emotional states and much more Beginning with a clear explanation of what makes Focusing so potentially transformative she goes on to show how to effectively incorporate Focusing with other treatment modalities and use it to treat a range of client issues notably trauma addiction and depression Designed to be immediately applicable for working clinicians and filled with practical strategies clinical examples and vignettes this book shows step by step how to bring Focusing into any kind of clinical practice Cornell expertly demonstrates the Focusing process unfolding moment by moment in the therapy room and illuminates its powerful capacity to support a client's growth and change *The Kitsune Collection* Melissa

ground breaking observations on his relationships with P D Ouspensky and A R Orage especially why he wanted to collaborate with them and why that broke down It shows that Gurdjieff was fundamentally a mystic and that his contemplation like methods were probably drawn from Mt Athos and its hesychast tradition It shows the continuity in Gurdjieff s teaching but also development and change His original contribution to Western Esotericism lay in his use of tasks disciplines and contemplation like exercises to bring his pupils to a sense of their own presence which could to some extent be maintained in daily life in the social domain and not only in the secluded conditions typical of meditation It contends that he had initially intended not to use contemplation like exercises as he perceived dangers to be associated with these monastic methods and the religious tradition to be in tension with the secular guise in which he first couched his teaching As Gurdjieff adapted the teaching he had found in Eastern monasteries to Western urban and post religious culture he found it necessary to introduce contemplation His development of the methods is demonstrated and the importance of the three exercises in the Third Series Life Is Real only then when I Am is shown together with their almost certain borrowing from the exercises of the Philokalia G I Gurdjieff P D Ouspensky A R Orage George Adie *Mysticism Meditation Contemplation Fourth Way Hesychasm Western Esotericism* **U.S. Civilian Space Policy** United States.
