Sensors In Bioprocess Control:

Sensors in Bioprocess Control John Twork, 2020-07-24 This volume presents the reader with an overview of current chemical sensor technology and outlines a framework relating industrial bioprocess monitoring to modern process control technology It deals with conventional multivariable control technology focusing on bioprocess applications *Sensors for Bioprocess Control* Neil Cleland, 1988 *Development of soft sensors for monitoring and control of bioprocesses* Robert Gustavsson, 2018-10-31 In the manufacture of bio therapeutics the importance of a well known process is key for a high product titer and low batch to batch variations Soft sensors are based on the concept that online sensor signals can be used as inputs to mathematical models to derive new valuable process information This information could then be used for better monitoring and control of the bioprocess The aim of the present thesis has been to develop soft sensor solutions for upstream bioprocessing and demonstrate their usefulness in improving robustness and increase the batch to batch reproducibility in bioprocesses The thesis reviews the potential and possibilities with soft sensors for use in production of bio therapeutics to realize FDA s process analytical technology PAT initiative Modelling and hardware sensor alternatives which could be used in a soft sensor setup are described and critically analyzed Different soft sensor approaches to control glucose feeding in fed batch cultures of *Escherichia coli* are described Measurements of metabolic fluxes and specific carbon dioxide production was used as control parameters to increase product yield and decrease the variability of produced recombinant proteins Metabolic heat signals were used in uninduced cultures to estimate and control the specific growth rate at a desired level and thereby also estimate the biomass concentration online The introduction of sequential filtering of the signal enabled this method to be used in a down scaled system The risk and high impact of contaminations in cell cultures are also described An in situ microscope ISM was used as an online tool to estimate cell concentration and also to determine cell diameter size which enabled the detection of contaminant cells at an early stage The work presented in this thesis supports the idea that soft sensors can be a useful tool in the strive towards robust and reliable bioprocesses to ensure high product quality and increased economic profit *Control in Bioprocessing* Pablo A. López Pérez, Ricardo Aguilar López, Ricardo Femat, 2020-03-10 Closes the gap between bioscience and mathematics based process engineering This book presents the most commonly employed approaches in the control of bioprocesses It discusses the role that control theory plays in understanding the mechanisms of cellular and metabolic processes and presents key results in various fields such as dynamic modeling dynamic properties of bioprocess models software sensors designed for the online estimation of parameters and state variables and control and supervision of bioprocesses Control in Bioengineering and Bioprocessing Modeling Estimation and the Use of Sensors is divided into three sections Part I Mathematical preliminaries and overview of the control and monitoring of bioprocess provides a general overview of the control and monitoring of bioprocesses and introduces the mathematical framework necessary for the analysis and characterization of bioprocess dynamics Part II Observability and
