Sensory Discrimination Tests and Measurements Jian Bi, 2008-02-28 Sensory discriminative analysis forms a fundamental type of methodology and is used widely in sensory and consumer research *Sensory Discrimination Tests and Measurements Statistical Principles Procedures and Tables* provides a comprehensive discussion of sensory discriminative analysis from a statistical perspective A wide variety of test and measurement methods which were developed during the past decades and scattered in various statistical and non statistical journals are included in the book The book gives a unified picture of the state of the subject and reflects some features of advanced sensory discriminative analysis Designed to be both a reference manual and a research monograph practitioners will discover various useful test and measurement procedures More statistically oriented readers will find the statistical considerations behind the procedures *Sensory Discrimination Tests and Measurements* will be of interest to everyone concerned with testing and measuring sensory difference and consumer preference

Sensory Discrimination Tests and Measurements Jian Bi, 2015-09-22 Sensory testing and measurement are the main functions of sensory analysis In recent years the sensory and consumer field has evolved to include both difference testing and similarity testing and new sensory discrimination methods such as the tetrads have received more attention in the literature This second edition of *Sensory Discrimination Tests and Measurements* is updated throughout and responds to these changes and includes A wide range of sensory measurements Measurements of sensory effect d R index and Gini index Measurements of performance of trained sensory panel Intraclass correlation coefficients and Cronbachs coefficient alpha Measurements of relative importance of correlated sensory and consumer attributes drivers of consumer liking or purchase intent Measurements of consumer emotions and psychographics Measurements of time intensity Measurements of sensory thresholds Measurements of sensory risk with negative sensory effects Benchmark Dose BMD methodology Measurements of sensory shelf life SSL A balanced introduction of sensory discrimination tests including difference tests and similarity tests Bayesian approach to sensory discrimination tests Modified and multiple sample discrimination tests Replicated discrimination tests using the beta binomial BB corrected beta binomial CBB and Dirichlet multinomial DM models Sensory discrimination methods including the tetrads and the M N R and S Plus codes for all the measurements and tests introduced in the book Mainly intended for researchers and practitioners in the sensory and consumer field the book is a useful reference for modern sensory analysis and consumer research especially for sensometrics

Engineering Innovations in Sensory Science Mahendran Radhakrishnan, Anbarasan Rajan, 2025-08-08 Sensory analysis is significant in food product development and its importance impacts the maintenance of sensory qualities for food products While there are many books exploring sensory analysis and its methods this is the first of its kind to also explore the use of engineering tools and instruments to produce measurable and reliable data In exploring sensory analysis methods this book also focuses on the novel computer interface technologies to retrieve human sensory perceptions directly from the human body and convert

them into a measurable unit exploring the present status in computer interface technologies and scope for interventions to overcome obstacles Mahendran Radhakrishnan attained his PhD in Food Process Engineering from Tamil Nadu Agricultural University India Prior to this he received degrees in Industrial Biotechnology as well as Chemical Engineering He is presently Professor and Head of Department of Food Process Technology at National Institute of Food Technology Entrepreneurship and Management Thanjavur NIFTEM T Dr Mahendran s research focus includes Advances in Food Processing Technologies novel non thermal processing including Cold Plasma High Pressure Processing Applications in Agri Food Food Structure Shape Transformation 4D Printing and Super Critical CO2 Extraction Mahendran has authored over 150 publications in reputed journals Anbarasan Rajan is Food Process Engineer who earned his M Tech and Ph D in Food Process Engineering from the National Institute of Food Technology Entrepreneurship and Management Thanjavur NIFTEM T His primary research areas include nonthermal food processing 4D foods food shape morphing and sensory science

Statistics for Sensory and Consumer Science Tormod Næs, Per Bruun Brockhoff, Oliver Tomic, 2011-06-20 As we move further into the 21st Century sensory and consumer studies continue to develop playing an important role in food science and industry These studies are crucial for understanding the relation between food properties on one side and human liking and buying behaviour on the other This book by a group of established scientists gives a comprehensive up to date overview of the most common statistical methods for handling data from both trained sensory panels and consumer studies of food It presents the topic in two distinct sections problem orientated Part I and method orientated Part II making it to appropriate for people at different levels with respect to their statistical skills This book succesfully Makes a clear distinction between studies using a trained sensory panel and studies using consumers Concentrates on experimental studies with focus on how sensory assessors or consumers perceive and assess various product properties Focuses on relationships between methods and techniques and on considering all of them as special cases of more general statistical methodologies It is assumed that the reader has a basic knowledge of statistics and the most important data collection methods within sensory and consumer science This text is aimed at food scientists and food engineers working in research and industry as well as food science students at master and PhD level In addition applied statisticians with special interest in food science will also find relevant information within the book

Culinology Research Chefs Association, 2016-02-29 Culinology The Intersection of Culinary Art and Food Science will demonstrate how the disciplines of culinary arts and food science work hand in hand in the research and development of new manufactured food products for the commercial retail and foodservice industries It will be the authoritative source that will add value and relevance to this growing discipline and its practitioners Integrating culinary arts with food science and technology this book provides the best strategy for developing successful food products on a large scale Real world applications and business models ground the book and clearly illustrate how the concepts and theories work in business and industry

Discrimination Testing in Sensory Evaluation Lauren Rogers, Joanne Hort, Sarah E.

Kemp, Tracey Hollowood, 2024-08-09 Discrimination Testing in Sensory Evaluation Provides a complete and unified approach to discrimination testing in sensory evaluation Sensory evaluation has evolved from simple taste testing to a distinct scientific discipline Today the application of sensory evaluation has grown beyond the food industry it is a sophisticated decision making tool used by marketing research and development and assurance in industries such as personal care household care cosmetics fragrances automobile manufacturing and many others Sensory evaluation is now a critical component in determining and understanding consumer acceptance and behavior Discrimination Testing in Sensory Evaluation provides insights into the application of sensory evaluation throughout the entire product life cycle from development to marketing Filled with practical information and step by step guidance this unique reference is designed to help users apply paired comparison tests duo trio tests triangle tests similarity tests and various other discrimination tests in a broad range of product applications Comprehensive chapters written by leading experts provide up to date coverage of traditional and cutting edge techniques and applications in the field Addresses the theoretical methodological and practical aspects of discrimination testing Covers a broad range of products and all of the senses Describes basic and more complex discrimination techniques Discusses the real world application of discrimination testing in sensory evaluation Explains different models in discrimination testing such as signal detection theory and Thurstonian modelling Features detailed case studies for various tests such as A not AR 2 AFC and Ranking among others to enable practitioners to perform each technique Discrimination Testing in Sensory Evaluation is an indispensable reference and guide for sensory scientists in academia and industry as well as professionals working in R D quality assurance and control and marketing It is also an excellent textbook for university courses and industry vocational programs in Sensory Science *Sensory Evaluation Practices* Herbert Stone, Rebecca N. Bleibaum, Heather A. Thomas, 2020-10-18 Sensory Evaluation Practices Fifth Edition presents the latest developments and methods of sensory evaluation including those on the front end of innovation consumer acceptance preference multivariate statistical analysis discrimination testing descriptive analysis sensory claims substantiation for advertising and information management Additionally related social psychological methods such as laddering design thinking emotional profiling and applications of qualitative and consumer co creation and immersive techniques are explored This book will be an ideal reference for sensory professionals technical managers product specialists and research directors in the food beverage cosmetics and other consumer products industries of all sizes Emphasizes the importance of scientific sensory methodology used to measure and understand consumer perception Illustrates the importance of planning managing and communicating product sensory information in a way that is actionable to developers marketers and legal counsel Presents how sensory science is becoming more influential at the front end of innovation Discusses measurement the design of experiments and how to understand key sensory drivers that most influence consumers Explores the global nature of products and how companies can benefit by having fundamental training programs in sensory

and consumer science Contains demonstrated methods for test selection application and measurement and testing with the right consumer including more typical usage environments Includes worked examples for interpreting and displaying results Features a new chapter on how to get your research published

Discrimination Testing in Sensory Science Lauren Rogers, 2017-09-29 Discrimination Testing in Sensory Science A Practical Handbook is a one stop shop for practical advice and guidance on the performance and analysis of discrimination testing in sensory science The book covers all aspects of difference testing the history and origin of different methods the practicalities of setting up a difference test replications the statistics behind each test dealing with the analysis action standards and the statistical analysis of results with R The book is written by sensory science experts from both academia and industry and edited by an independent sensory scientist with over twenty years of experience in planning running and analyzing discrimination tests This is an essential text for academics in sensory and consumer science and any sensory scientist working in research and development in food home and personal care products new product development or quality control Contains practical guidance on the performance and analysis of discrimination testing in sensory and consumer science for both food and non food products Includes the latest developments in difference testing including both new methods and state of the art approaches Features extensive coverage of analysis with a variety of software systems Provides essential insight for academics in sensory and consumer science and any sensory scientist working in research and development in food home and personal care products new product development or quality control
