## Sensory Experience:

**The Metaphysics of Sensory Experience** David Papineau, 2021 What is going on when we are consciously aware of a visual scene or hear sounds or otherwise enjoy sensory experience David Papineau argues controversially for a purely qualitative account conscious sensory experiences are intrinsic states with no essential connection to external circumstances or represented properties *Sensory Experiences* Danièle Dubois, Caroline Cance, Matt Coler, Arthur Paté, Catherine Guastavino, 2021-12-15 *Sensory Experiences* Exploring meaning and the senses describes the collective elaboration of a situated cognitive approach with an emphasis on the relations between language and cognition within and across different sensory modalities and practices This approach grounded in 40 years of empirical research is a departure from the analytic reductive view of human experiences as information processing The book is structured into two parts Each author first introduces the situated cognitive approach from their respective sensory domains vision audition olfaction gustation The second part is the collective effort to derive methodological guidelines respecting the ecological validity of experimental investigations while formulating operational answers to applied questions such as the sensory quality of environments and product design This book will be of interest to students researchers and practitioners dealing with sensory experiences and anyone who wants to understand and celebrate the cultural diversity of human productions that make life enjoyable *A Cultural History of the Senses in Antiquity* Jerry Toner, 2014-10-23 The ancient world used the senses to express an enormous range of cultural meanings Indeed the senses were functionally significant in all aspects of ancient life often in ways that were complex and interconnected Antiquity was also a period where the senses were experienced vividly cities stank statues were brightly painted and literature made full use of sensory imagery to create its effects In a steeply hierarchical world with vast differences between the landed wealthy the poor and the slaves the senses played a key role in establishing and maintaining boundaries between social groups but the use of the senses in the ancient world was not static New religions such as Christianity developed their own way of using the senses acquiring unique forms of sensory related symbolism in processes which were slow and often contested The aim of this volume is to provide an overview of these structures and developments and to show how their study can yield a more nuanced understanding of the ancient world *A Cultural History of the Senses in Antiquity* presents essays on the following topics the social life of the senses urban sensations the senses in the marketplace the senses in religion the senses in philosophy and science medicine and the senses the senses in literature art and the senses and sensory media *Sensory Tourism* Ian S. Jenkins, Robert S. Bristow, 2024-11-13 Tourism offers countless global locations providing a multitude of sensory experiences These include commercialised tourism products such as saunas and floatation tanks through to natural phenomenon such as mountains and wilderness destinations Consequently sensory elements are a curious concept within tourism because every destination provides a sensory experience of one kind or another The first of its kind this book examines holidays and tourism through sensory perceptions which either encourage

or deter consumers It studies sensoryscapes and how they effect and affect tourism at destinations and be linked with the development of tourist niches reflecting the segmenting of the mass market tourism into smaller segments Finally it reflects on how with increased urbanisation there a growing need is to find quiet spaces free from urban or anthropogenic noise such as silent retreats and dark sky meditation holidays Escape has always been one of the main components of tourism development together with attraction to spatial locations that match tourists needs It will be of interest to those studying tourism management as well as wider social science disciplines

**Disjunctivism** Marcus Willaschek,2013-09-13 Does perception provide us with direct and unmediated access to the world around us The so called argument from illusion has traditionally been supposed to show otherwise from the subject s point of view perceptual illusions are often indistinguishable from veridical perceptions hence perceptual experience as such cannot provide us with knowledge of the world but only with knowledge of how things appear to us Disjunctive accounts of perceptual experience first proposed by John McDowell and Paul Snowdon in the early 1980s and at the centre of current debates in the philosophy of perception have been proposed to block this argument According to the traditional view a case of perception and a subjectively indistinguishable illusion or hallucination can exemplify what is fundamentally the same kind of mental state even though they differ in how they relate to the non mental environment In contrast according to the disjunctive account the concept of perceptual experience should be seen as essentially disjunctive encompassing at least two distinct kinds of mental states namely genuinely world involving perceptions and mere appearances This book presents seven recent essays on disjunctivism first published in two special issues of Philosophical Explorations An International Journal for the Philosophy of Mind and Action
