## **Sensuous Architecture The Art Of Erotic Building:**

**Sensuous Architecture** Christian Werner Thomsen, Angela Krewani, 1998 Architecture comprises sensuous even erotic elements In this ground breaking book the authors undertake the first ever examination of this aspect of architecture Having introduced us to the concept of sensuous architecture the book presents us with a chronological analysis starting with the summer residences on the Loire and in Germany and continuing with discussions on English landscape garden and the Marquis de Sade's torture chambers before coming full circle with immaterial media architecture and cybersex Sensuous Architecture The Art of Erotic Building lends insights into the cultural history of the bathroom the erotic symbolism of towers and grottoes in various cultures and anthropomorphic architecture Examples of particularly sensuous residential buildings are certain to provide architects and their clients with stimulating ideas In a chapter on present day urban ambiances the author argues that personal well being and the general quality of life in our cities depend on architecture satisfying both the mind and the senses in equal measure Painting sculpture and wrapping art as well as the relationship between architecture and eroticism in film are examined The book concludes with a plea for an architecture of the senses **Sensuous**

**architecture; the art of erotic building** C.W. Thomsen, 1998 **The Everyday and Architecture**, 1998 *New Wombs* Maria Luisa Palumbo, 2000-08-01 A sense of harmony and proportion has traditionally been achieved in architectural compositions by using the dimensions of the human body as the starting point Modern technology now enables us to go beyond these physical dimensions into a virtual world and this poses a challenge to architecture as we usually perceive it Interactive flexible and intelligent models are being called for Whilst technology is taking us into the realms of virtual reality architecture on the other hand is becoming more corporeal Postorganic is the term being used to express this merging of the body and architecture brought about by electronic media A radical change in perspective is blurring the distinction between the organic and mechanic and the artificial logic of the computer and the natural logic of man are fusing together

a common complaint about the loss of identity which to a substantial degree is being associated with the built environment in cities and specifically with their architecture Architecture and Identity takes a global multidisciplinary look on how identities in contemporary architecture are constructed The general hypothesis underlying this book is that in a globalized world identity in architecture cannot be easily derived from distinct indigenous patterns The book presents forty contributions from various disciplines aiming to destroy the myth of an inheritable or otherwise prefabricated identity Some authors dismantle constructs of identity that have long been considered as solid and unbreakable while others meticulously unravel the construction process of identities in *Books In Print 2004-2005* Ed Bowker Staff,Staff Bowker, Ed,2004 **Sensing**

**Cities** Monica Montserrat Degen,2008 As cities globally re design their urban landscapes they produce a different urban aesthetic and create new experiential milieus Urban regeneration processes generate radical physical social and cultural changes in neighbourhoods that demand new conceptual frameworks to address their impact upon daily urban life Sensing Cities investigates the reconfiguration of contemporary public space and life through the prism of the senses The book explores how the increased stylization of cityscapes requires an understanding of public life as a spatial sensuous encounter Degen examines how power relations in public spaces are embedded in exercised and resisted through the sensuous geography of place This sensory paradigm is then applied to compare two emblematic regeneration projects namely el Raval in Barcelona and Castlefield in Manchester By combining detailed ethnographic analysis and interviews with those involved in planning regeneration processes and those experiencing them the book argues that a changing sensuous landscape is crucial in redefining people s social practices attachments and experiences in places Focusing on two European cities at the forefront of urban design Barcelona and Manchester Degen draws on sociology geography anthropology cultural and architectural studies to provide a critical account of the politics of publicness in the entrepreneurial city With numerous photographs and maps this book stresses the ongoing embodied and active nature of regeneration as a lived social process rather than merely a physical or economic exercise Ultimately Sensing Cities examines how urban regeneration is made effective through the organisation of sensory experience This book is essential reading for students and researchers of Architecture Urban Studies and Human Geography Sex and Buildings Richard J. Williams,2013-07-15 Massive modern skyscrapers obelisks towers all are structures that thanks to their phallic shape are often associated with sex But other buildings are more subtly connected as they provide the frameworks for our sexual lives and act as reminders of our sexual memories This relationship between sex and buildings mattered more than ever in the United States and Europe during the turbulent twentieth century when a culture of unprecedented sexual frankness and tolerance emerged and came to dominate many aspects of public life Part architectural history part cultural history and part travelogue Sex and Buildings explores how progressive sexual attitudes manifest themselves in architecture asking what progressive sexuality might look like architecturally and exploring the successes and failures of buildings attempts to reflect it In search of structures that reflect
