Gastrophysics Charles Spence, 2017-06-20 The science behind a good meal all the sounds sights and tastes that make us like what we re eating and want to eat more Why do we consume 35 percent more food when eating with one other person and 75 percent more when dining with three How do we explain the fact that people who like strong coffee drink more of it under bright lighting And why does green ketchup just not work The answer is gastrophysics the new area of sensory science pioneered by Oxford professor Charles Spence Now he s stepping out of his lab to lift the lid on the entire eating experience how the taste the aroma and our overall enjoyment of food are influenced by all of our senses as well as by our mood and expectations The pleasures of food lie mostly in the mind not in the mouth Get that straight and you can start to understand what really makes food enjoyable stimulating and most important memorable Spence reveals in amusing detail the importance of all the off the plate elements of a meal the weight of cutlery the color of the plate the background music and much more Whether we re dining alone or at a dinner party on a plane or in front of the TV he reveals how to understand what we re tasting and influence what others experience This is accessible science at its best fascinating

Fieldwork for Design David Randall,Richard Harper,Mark Rouncefield,2007-04-24 This book looks at why ethnographic approaches have been turned to in the design of computing devices for the workplace for the home and elsewhere It presents a history of ethnography both as it was practiced before computer science picked it up and since most especially in the CSCW and HCI domains It examines further the various ethnographic or fieldwork frameworks currently popular explaining and examining what each claims and entails The focus of the book throughout is on the practical relationship between theory and practice a relationship that is often misunderstood yet fundamental to successful design The book is illustrated with real examples from the authors various experiences in academic and commercial settings reporting on the use of ethnography before during and after design innovation and implementation The result is a book that provides the working knowledge
