*Burgundy* Marion Demossier, 2018-04-23 Demossier's engrossing analysis of Burgundy the wine the place the brand should be imbibed pun intended on many levels and slowly for best appreciation foodanthro.com Drawing on more than twenty years of fieldwork this book explores the professional social and cultural world of Burgundy wines the role of terroir the environmental factors that affect a crop's character and its transnational deployment in China Japan South Korea and New Zealand It demystifies the terroir ideology by providing a unique long term ethnographic analysis of what lies behind the concept While the Burgundian model of terroir has gone global by acquiring UNESCO world heritage status its very

legitimacy is now being challenged amongst the vineyards where it first took root From the introduction Superficially then Burgundy might appear to be simply acquiring recognition for its unchanging landscape tradition and culture Yet for all the power of its rich local identity folklore and culture which is broadcast to the world there hides underneath the comforting blanket of this seamless place untouched by change or conflict a far more complex reality Burgundy's listing as a World Heritage landscape emphasises its international reputation as a traditional and historical site of wine production and opens a new chapter in the production and marketing of its quality differentiation and authenticity It is also about readjusting Burgundy and the grands crus in response to a changing global market and the shifting kaleidoscope of world wine values

The Bounded Field Jaro Stacul, 2018-01-15 Regionalism is one of the most debated issues in contemporary western Europe Yet why the region rather than the nation state can have such a strong appeal for the construction of social and political identity remains largely unexplored Drawing on data collected in the mountainous Trentino region of northern Italy the author investigates how ideas about village boundaries and private property form the background against which regionalist ideologies are understood In suggesting that ideas about regionalism largely reflect views about private property he provides an alternative to theories of nationalism that overlook the articulation between official ideologies and discourses at the local level
