**Separatism and Women's Community** Dana R. Shugar, 1995-01-01 This is the kind of book I've been looking for Bonnie Zimmerman author of *The Safe Sea of Women Lesbian Fiction* 1969 1989 The energy spent on all sides of debates about women's separatism demonstrates the vitality of separatism as an important issue Excited by the prospect that changes in their personal lives could reverberate through the nation many women have organized rural communes and urban business collectives putting ideas into practice *Separatism and Women's Community* reviews debates in separatist theory historical narratives by members of separatist collectives and utopian novels that envision how collectives might be formed Shugar compares the ideas and proposals of theorists including Robin Morgan Shulamith Firestone Joyce Cheney Joan Nestle Ti Grace Atkinson and the Radicalesbians with the experience of women from collectives as diverse as Cell 16 the Combahee River Collective the Gutter Dyke Collective the Seattle Collective the Bloodroot Collective and the Lavender Woman Collective of Chicago Despite the attempts to connect action and thought many women were ill prepared for the problems they found in collective life Women who theorized that oppression based on difference was a man made phenomenon were confronted by other women who challenged their racism classism or homophobia The community had to respond to these confrontations in ways that would strengthen rather than destroy their tentative connections with other women Dana R Shugar is an assistant professor of English and women's studies at the University of Rhode Island [Reader's Guide to Women's Studies](#) Eleanor Amico, 1998-03-20 The Reader's Guide to Women's Studies is a searching and analytical description of the most prominent and influential works written in the now universal field of women's studies Some 200 scholars have contributed to the project which adopts a multi layered approach allowing for comprehensive treatment of its subject matter Entries range from very broad themes such as Health General Works to entries on specific individuals or more focused topics such as Doctors *New Perspectives on Environmental Justice* Rachel Stein, 2004-06-25 Women make up the vast majority of activists and organizers of grassroots movements fighting against environmental ills that threaten poor and people of color communities *New Perspectives on Environmental Justice* is the first collection of essays that pays tribute to the enormous contributions women have made in these endeavors The writers offer varied examples of environmental justice issues such as children's environmental health campaigns cancer research AIDS HIV activism the Environmental Genome Project and popular culture among many others Each one focuses on gender and sexuality as crucial factors in women's or gay men's activism and applies environmental justice principles to related struggles for sexual justice The contributors represent a wide variety of activist and scholarly perspectives including law environmental studies sociology political science history medical anthropology American studies English African and African American studies women's studies and gay and lesbian studies offering multiple vantage points on gender sexuality and activism Feminist womanist impulses shape and sustain environmental justice movements around the world making an understanding of gender roles and differences crucial for the

they are constructed It considers the typically linear narratives that are based on simplifications exaggerations and omissions and the histories they construct an approach that leads to totalizing official histories that reduce otherwise messy narratives to one dimensional interpretations of a heroic and celebratory nature This book questions the basis on which these mediated histories are constructed highlights other hidden histories that have otherwise been neglected and explores a range of topics including consumerism the production pressure behind documentaries punk fanzines Rolling Stones covers and more

Fisher,2001 *No Angel in the Classroom* Teaching through Feminist Discourse presents a theoretically complex yet down to earth and personal account of feminist teaching in higher education Starting with a nuanced interpretation of consciousness raising longtime feminist educator Berenice Malka Fisher develops her philosophy of feminist teaching as a form of political discourse Through reflection on a series of candid classroom stories she analyzes knotty problems faced by academics and activists What counts as knowledge in discussion of feminist issues Can teachers exercise authority without being authoritarian What is the role of caring in political deliberation Should safety be considered when students and teachers address volatile topics How can feminist and other teachers committed to social justice give serious attention to the intersections of gender race and sexual orientation This groundbreaking book is intended for the beginning and veteran teachers and others concerned with the contribution of education to extending social justice Fisher s work offers a pedagogical vision that inspires both passion and critical thinking **Community Psychology, CourseSmart**

Luis,2018-10-23 How women only communities provide spaces for new forms of culture sociality gender and sexuality Women's lands are intentional collective communities composed entirely of women Rooted in 1970s feminist politics they continue to thrive in a range of ways from urban households to isolated rural communes providing spaces where ideas about gender sexuality and sociality are challenged in both deliberate and accidental ways Herlands a compelling ethnography of women's land networks in the United States highlights the ongoing relevance of these communities as vibrant cultural enclaves that also have an impact on broader ideas about gender women's bodies lesbian identity and right ways of living As a participant observer Keridwen N Luis brings unique insights to the lives and stories of the women living in these communities While documenting the experiences of specific spaces in Massachusetts Tennessee New Mexico and Ohio Herlands also explores the history of women's lands and breaks new ground exploring culture theory gender theory and how lesbian identity is conceived and constructed in North America Luis also discusses how issues of race and class are addressed the ways in which nudity and public hygiene challenge dominant constructions of the healthy or aging body and the pervasive influence of hegemonic thinking on debates about transgender women Luis finds that although changing dominant thinking can be difficult and incremental women's lands provide exciting possibilities for revolutionary transformation in society The Queerness of Home Stephen Vider,2022-01-21 Stephen Vider considers how the meanings of domesticity shifted for gay men and lesbians from the late 1960s to early 1980s from a site of supposed isolation or deviance to a source of identity community and pleasure His manuscript reveals the multiple uses appeals and limits of domesticity for LGBTQ people in the post World War II period in their efforts to make social and sexual connections and to appeal for expanded rights and freedoms For example the 1970s witnessed an efflorescence of gay communal households that proved to be seedbeds for alternative modes of domesticity using the privacy of domestic space to achieve broader social and political changes Vider brings a novel perspective to gay identity and culture examining domesticity as a meeting point between practices and discourse the local and national the private and the public **Women, Culture, and Community**

Elizabeth Hayes Turner, 1997 Why in the late 19th and early 20th centuries did southern women black and white advance from the private worlds of home and family into public life transforming the cultural and political landscape of their community Using Galveston as a case study Turner asks who were the women who became activists **Feminist Foundations** Kristen A. Myers, Cynthia D. Anderson, Barbara J. Risman, 1998-03-10 There can be no doubt that feminism and its influence on the academy has wrought enormous changes on the social sciences in general and sociology in particular This edited volume is an outgrowth of a discussion that began on the Sociologists for Women in Society Listserv in which participants were asked to talk about key pieces in feminist scholarship that had particularly influenced their sociological thinking Editors Kristen A Myers Cynthia D Anderson and Barbara J Risman have chosen articles that fall into what they consider the intellectual genres that compose feminist sociology This collection differs from others because the editors avoid organizing material by substantive specialty areas i e family race and ethnicity criminology or methods Their vision instead sees sociology as an integrated discipline where feminist contributions have systematically influenced the shape of the whole by similarly influencing the distinct parts In addition to simply compiling a comprehensive list of important articles from the last two decades the editors have invited major feminist scholars to comment and reflect on the articles in each section of the book These reflections help provide the historical and social context in which feminist scholarship has taken place This book will be of obvious appeal to feminist scholars and gender sociologists Yet as feminist thought rightfully takes its place away from the margins and toward the center of the discipline this book stands as a rich and useful resource for any contemporary theory course Histories of Architecture Education in the United States Peter L. Laurence, 2023-10-31 Histories of Architecture Education in the United States is an edited collection focused on the professional evolution experimental and enduring pedagogical approaches and leading institutions of American architecture education Beginning with the emergence of architecture as a profession in Philadelphia and ending with the early work but unfinished international effort of making room for women and people of color in positions of leadership in the field this collection offers an important history of architecture education relevant to audiences both within and outside of the United States Other themes include the relationship of professional organizations to educational institutions the legacy of late nineteenth century design concepts the role of architectural history educational changes and trans Atlantic intellectual exchanges after WWII and the Cold War the rise of the city and urban design in the architect s consciousness student protests and challenges to traditional architecture education and the controversial appearance of environmental activism This collection in other words provides a relevant history of the present with topics of concern to all architects studying and working today **Queer Frontiers** Joseph Allen Boone, 2000 Twenty three scholars artists and critics forecast the impact of queer theory on the future of sexuality Arguing that queer theory is poised to transform society s perception of gender itself this anthology locates itself at the forefront of various debates both inside and outside the academy
