Ammerman, 2007 Social scientists sometimes seem not to know what to do with religion In the first century of sociology's history as a discipline the reigning concern was explaining the emergence of the modern world and that brought with it an expectation that religion would simply fade from the scene as societies became diverse complex and enlightened As the century approached its end however a variety of global phenomena remained dramatically unexplained by these theories Among the leading contenders for explanatory power to emerge at this time were rational choice theories of religious behavior Researchers who have spent time in the field observing religious groups and interviewing practitioners however have questioned the sufficiency of these

market models Studies abound that describe thriving religious phenomena that fit neither the old secularization paradigm nor the equations predicting vitality only among organizational entrepreneurs with strict orthodoxies In this collection of previously unpublished essays scholars who have been immersed in field research in a wide variety of settings draw on those observations from the field to begin to develop more helpful ways to study religion in modern lives The authors examine how religion functions on the ground in a pluralistic society how it is experienced by individuals and how it is expressed in social institutions Taken as a whole these essays point to a new approach to the study of religion one that emphasizes individual experience and social context over strict categorization and data collection The Meeting of Civilizations Moshe

Ma'oz,2009-10-07 The horrific acts of anti Western and anti Jewish terrorism carried out by Muslim fanatics during the last decades have been labelled by politicians religious leaders and scholars as a Clash of Civilizations This book states that these acts cannot be considered an Islamic onslaught on Judeo Christian Civilisation *The Role of Religion in Modern Societies*

Detlef Pollack,Daniel V.A. Olson,2012-08-21 Does modernization lead to the decline of religion This question lies at the centre of a key debate in the sociology of religion During the past decade American scholars using primarily American data have dominated this debate and have made a strong case that the answer to this question is no Recently however a new crop of European scholars working with new sources of European data have uncovered evidence that points toward an affirmative answer This volume pays special attention to these trends and developments to provide the reader with a more well rounded understanding of the many ways in which religion interacts with modernization Respected scholars such as David Voas Steve Bruce and Anthony Gill examine modern societies across the world in this splendid book which will interest sociologists political scientists historians and theologians in equal measure Secular War Stacey Gutkowski,2013-11-27 How have long standing and unconscious secular assumptions about religion shaped the post 9 11 climate and its wars Stacey Gutkowski explores this little examined yet crucial element of British perceptions of and policy towards Jihadism over the last decade to draw critical conclusions about the relationship between war and the secular She points to a surprisingly coherent body of secular beliefs that have fuelled policies in Iraq Afghanistan and counter terrorism and that have had mixed results responsible for both positive strategies and tragic errors The theory Gutkowski develops on the impact of this secular approach to warfare holds a broader global significance and cannot be viewed as just a British phenomenon This book addresses ongoing and critical debates such as the overreach of Western liberal interventionism in the Middle East and speaks to policy makers security analysts and students of IR Foreign Policy and Security Studies **The Muslim World**

**Fighting Words** Hector Avalos, Is religion inherently violent If not what provokes violence in the name of religion Do we mischaracterize religion by focusing too much on its violent side In this intriguing original study of religious violence Prof Hector Avalos offers a new theory for the role of religion in violent conflicts Starting with the premise that most violence is the result of real or perceived scarce resources Avalos persuasively argues that religion creates new scarcities on the basis of unverifiable or illusory criteria Through a careful analysis of the fundamental texts of Judaism Christianity Islam and Hinduism Dr Avalos explains how four scarce resources have figured repeatedly in creating religious violence sacred space e.g. the perception by three world religions that Jerusalem is sacred the creation of holy scriptures believed to be privileged revelations of God's will group privilege stemming from such beliefs as a chosen people or predestination which also creates a group of outsiders and salvation by which concept some are accepted and others rejected Thus Avalos shows religious violence is often the most unnecessary violence of all since the scarce resources over which religious conflicts ensue are not actually scarce or need not be scarce Comparing violence in religious and nonreligious

contexts Avalos makes the compelling argument that if we condemn violence caused by scarce resources as morally objectionable then we must consider even more objectionable violence provoked by alleged scarcities that cannot be proven to exist He also examines the Nazi Holocaust and the Stalinist Terror which have been attributed to the pernicious effects of atheism or secular humanism By contrast Avalos pinpoints underlying religious factors as the cause of these horrific instances of genocidal violence This serious philosophical examination of the roots of religious violence adds much to our understanding of a perennial source of widespread human suffering Hector Avalos Ames IA is associate professor of Religious Studies at Iowa State University the author of five books on biblical studies and religion the former editor of the Journal for the Critical Study of Religion and executive director of the Committee for the Scientific Examination of Religion

**A Theology of Engagement** Ian S. Markham, 2008-04-15 This ground breaking book challenges readers to rethink the divide between liberal and orthodox approaches which characterises Christianity today Provides an alternative to the liberal orthodox divide in contemporary Christianity Defends Christianity's engagement with non Christian traditions Includes important discussion of theological method Illustrated with case studies involving human rights interfaith tolerance economics and ethics
