Beethoven's Chamber Music in Context Angus Watson,2012 A noted violinist and conductor Watson is particularly well suited for his chosen task outlining the historical context and character of more than 50 of the chamber works that Beethoven composed during his years in Vienna Avoiding the pitfalls of becoming too critical or academic the author characterizes each composition in general terms only and does not discuss changing styles of performance Instead Watson provides information on a work s historical background and character and on the musical points of interest in each movement He pays special attention to the influence of Beethoven s large scale compositions on his chamber music and on the composer s increasing mastery of improvisation Filling a hole in scholarship on Beethoven s compositions this book will be greatly appreciated by professional and amateur musicians **String Builder, Book III** Samuel Applebaum, The Belwin String Builder is a string class method in which the violin viola cello and bass play together throughout Each book however is a complete unit and may be used separately for class or individual instruction The material in this book is realistically graded so that only a minimum of explanatory material is required Each melody is interesting and will provide the basis for a fine left hand technic and bow arm Available in three levels for violin viola cello bass piano accompaniment and teacher s manual
