Serials Librarianship Ross Bourne, 1980 *Serials Management in Libraries* Muhammad Riaz, 1992 It is the first comprehensive work which covers every aspect of serials management to meet the academic need of students and teachers of library science and serve as guide for serials librarians after defining what constitutes serials and tracing their historical development. The work concentrates on the acquisition policy and systems. Various systems of serials control and organization have been examined. Technical aspects like classification cataloguing have been deeply studied and different methods of display and forms of storage examined in details. Almost every aspect of reference service through serials including documentation indexing and abstracting aids have been covered. Organization of government documents gets special attention. Usefulness of microforms as surrogate of print serial publications is discussed. Finally the use of computer for serials control has been elaborately explained. *Non-standard Collection Management* M. Pearce, 2018-11-09 First published in 1992 this volume recognises that it is not unusual when practising librarianship to come across small to medium collections within the library which because they are different from the main collection are outside the librarian's experience or are a new type of material not properly managed or exploited. Therefore this volume contains chapters on a range of materials which are united by a certain rarity in the experience of most librarians. It is aimed at those who need to know how to progress from scratch with a collection but not necessarily to take it into complete specialization. There is information about characteristics of each type of material as well as guidance for their management. Lists of further reading are provided and a note of some important collections. *Basic Serials Management Handbook* Judith Szilvássy, 2013-02-07 No detailed description available for Basic Serials Management Handbook **Handbook of Research on Practices and Outcomes in Virtual Worlds and Environments** Yang, Harrison Hao, Yuen, Steve Chi-Yin, 2011-07-31 Handbook of Research on Practices and Outcomes in Virtual Worlds and Environments not only presents experienced professionals with the most recent and advanced developments in the field but it also provides clear and comprehensive information for novice readers.
