## **Serpentine Gallery Pavilion:**

*Sou Fujimoto* Naomi Pollock, 2016-05-23 The first comprehensive monograph on Japan's most creative experimental and visionary architect Sou Fujimoto. Occasionally an architect emerges whose vision is so fresh that it causes us to reconsider the very nature of architecture. Sou Fujimoto is one of those architects. Guided by instinct and keen observation, he casts convention aside. Instead, he blurs boundaries and routinely rethinks basic building blocks. Both comfortably familiar and curiously enigmatic, Fujimoto's dynamic work grabs our attention, then lingers on in our minds. Born and bred in Hokkaido, Fujimoto received his undergraduate degree in architecture from Tokyo University before embarking on an uncharted solo exploration that probed the possibilities of architecture. Unfettered by the ideas and practices of others, Fujimoto's work has clarity of thought and purity of execution seldom seen. Fujimoto garnered significant international attention for his popular 2013 Serpentine Pavilion in London. Fujimoto was the youngest architect to receive the highly regarded commission. In 2012, he was part of the Japanese team that won a Golden Lion award for Best National Participation at the Venice Architecture Biennale for their design of alternative housing concepts for the homes that were destroyed by the tsunami. The Serpentine Gallery Pavilion 2005 has been designed by the celebrated Portuguese Pritzker Prize-winning architect Álvaro Siza and the distinguished architect Eduardo Souto de Moura. As in past years, Cecil Balmond, Deputy Chairman of Arup, together with his team has worked closely with Siza and Souto de Moura to develop the scheme. This year's remarkable Pavilion is based on a simple rectangular grid which has been distorted to create a dynamic, curvaceous form. It comprises interlocking timber beams, a material that accentuates the relationship between the Pavilion and the surrounding Park. A translucent polycarbonate covering allows light to penetrate the Pavilion. This impermeable shell stops 1.3m from the ground so that the structure appears to hover above the lawn, poised like an animal with an arched back and taut skin, ready to pounce. 250 solar-powered lamps will illuminate the structure at dusk. [Peter Zumthor. Hortus Conclusus](#) Peter Zumthor, Serpentine Gallery, 2011. For his 2011 Serpentine Pavilion commission, Peter Zumthor provided visitors with a hortus conclusus, a secret garden whose contents were designed by Piet Oudolf, hidden within an enigmatic, plain black structure. This volume records the pavilion, which received rave reviews, with photographs and a fully illustrated index of the plants used. [Serpentine Gallery Pavilions](#) Philip Jodidio, 2011. Since 2000, the Serpentine Gallery in London's Kensington Gardens has called on some of the world's top architects to design summer pavilions, temporary structures that are erected next to the Gallery itself for a three-month period. The Serpentine, which was built in 1934 as a tea pavilion,

opened in 1970 as a showplace for exhibitions of modern and contemporary artists ranging from Matthew Barney to Dan Flavin Ellsworth Kelley Louise Bourgeois or Rachel Whiteread The pavilions in the Programme that was conceived in 2000 by the Serpentine Director Julia Peyton Jones are the work of international architects or design teams who at the time of the Serpentine s invitation have not completed a building in England A maximum of six months from invitation to completion is allotted The only architecture program of its type in the world the Serpentine Gallery Pavilions attract up to 250 000 visitors each summer The Serpentine Pavilion is regularly ranked in the top 5 most attended architecture and design exhibitions worldwide in The Art Newspaper s annual survey of museums and galleries visitor figures The architect Richard Rogers has stated The pavilions erected for reatively little money are unbelievably good I couldn t single one out that I have liked more than the others they have all been masterpieces Zaha Hadid Daniel Libeskind Toyo Ito Oscar Niemeyer MVRDV Alvaro Siza Eduardo Souto de Moura Rem Koolhaas Kjetil Thorsen Frank O Gehry Sanaa Jean Nouvel

2011 Peter Zumthor, 2011 The concept for this year's Pavilion is the hortus conclusus a contemplative room a garden within a garden One enters the building from the lawn and begins the transition into the central garden a place abstracted from the world of noise and traffic and the smells of London an interior space within which to sit to walk to observe the flowers With this Pavilion as with previous structures such as the famous Thermal Baths at Vals Switzerland or the Bruder Klaus Chapel in Mechernich Germany Zumthor has emphasised the sensory and spiritual aspects of the architectural experience from the precise yet simple composition and presence of the materials to the handling of scale and the effect of light At the heart of Peter Zumthor's practice is a refined selection of materials used to create contemplative spaces that evoke the spiritual dimension of our physical environment As always Zumthor's aesthetic goal is to customise the building precisely to its purpose as a physical body and an object of emotional experience      SANAA ,2009
